Mutual Life Assurance.

Scottish Provident Institution.

Established 1837. Incorporated 1848.

HEAD OFFICE: 6, ST. ANDREW SQUARE, EDINBURGH.

WHOLE LIFE ASSURANCE.

THE PREMIUMS, by limited payments or during life, are so moderate that at usual ages for Assurance **£1,200** or thereby may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) **£1,000** only—the **£200** being equivalent to an immediate and certain Bonus.

THE WHOLE SURPLUS is reserved for those who prove to be good lives, no share being given until the premiums paid, if accumulated at 4 per cent. compound interest, would amount to the sum assured.

THE SURPLUS for the Septennium ending 1908 was **£1,800,000.**

Over **70** per cent. of the policies which became claims during the Septennium received Bonuses which averaged close on **50** per cent. of the original assurances.

Examples of Premiums for £100 at Death (with Profits).

Age next Birthday.	25	30	35	40	45	50
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8

PROVISION FOR THE YOUNG.

A Savings Fund Policy. Example:—An Annual Premium of £10 secures to a child age 1 next birthday an assurance commencing at age 21 of **£1,276.**

At age 21 policy may be continued for life or converted into an Endowment Assurance. Surrender value at 21 equal to all premiums paid with 2½ per cent. compound interest. For rates, &c., at other ages see Prospectus.

ENDOWMENT ASSURANCE. *Special Class.*

Having a separate Fund participators in the Surplus derive the full advantage of the premiums which they pay, and the whole Surplus belongs exclusively to the policy-holders in the Class. Bonuses allocated on the compound system.

Bonus additions at the rate of **£1 15s.** per cent. per annum were allotted at last division, and intermediate Bonuses at same rate on sums assured and existing Bonuses.

ACCUMULATED FUNDS EXCEED £14,500,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Norwich, Nottingham, Southampton, Belfast, and Dublin.

LONDON: 3, LOMBARD STREET, E.C. WEST END: 17, PALL MALL, S.W.

NOTICE.

TO celebrate the 21st Anniversary of my announcement in "Whitaker" I have decided from the 1st of January, 1911, to send carriage free all orders of *private* customers in U.K., and to allow a corresponding abatement to those abroad. This will involve a great expense, but I am strongly of opinion the concession will tend to such an increase of business that no actual loss will result; and that the appreciation of my numerous clients will be shown by undiminished industry in the introduction of my cloths to their friends. W. B.

31 & 29, GREAT PORTLAND ST., W. (21st year) Wholesale, Retail, and Export.

Description of some of my Standard Goods. Detailed Catalogues on application.

IRISH FRIEZES (strong, rough TWEEDS). These are *par excellence* the Cloths for **Country Suits,** for **Travellers,** for **Sportsmen,** and for **Cold Climates,** being substantial, warm, pliable, hard-wearing, and almost weather-proof; made in various mixtures; dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price 3s. and 3s. 6d. yard, 28 inches wide.

IRISH HOMESPUNS.—These, like the FRIEZES, are admirable for Gentlemen's Country Suits, Fishing, Shooting Golfing, &c.; but lighter in weight, and more loosely woven. 28 in., 3s. yd. upwards.

Very stout **IRISH TWEEDS** for rough country wear at home or abroad. 2s. 9d. to 3s. 9d. yard. Splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick **FRIEZES,** plain, plaid, and napped, for heavy travelling, driving, and motoring Ulsters, double width, from 6s. 9d. to 12s. 6d. yard; also the warm, soft, and woolly Duffle Friezes.

Useful and substantial **TWEEDS** for ordinary wear, town or country, 2s. 9d. to 4s. yard, 28 inches. (For youths' wear many of these are excellent, being hard twisted and closely woven.)

"SAXONY" and **WORSTED TWEEDS** for professional or business wear, made from, or mixed with, fine colonial wools. 56 in., 6s. 9d. to 12s. 6d. yard, according to weight and degree of fineness.

Thin Hand Loom and **Power Loom TWEEDS** make capital suits for warm climates or for home summer wear, being light, woolly, and cool. Single width from 2s. 3d., and double width 4s. 6d. yard. Some of these are also admirably suited for Ladies' Gowns, Cloaks, and Ulsters, others for Cycling, and still others for small boys' suits.

DONEGAL HOMESPUNS, hand-spun and hand-woven by the peasantry, 2s. to 3s. 6d. yard, according to weight and merit, 27 to 30 inches wide. The thin ones are perfect for tropical climates, the medium and heavy for summer and winter lounge wear.

CONNEMARA, TIPPERARY, ANTRIM, CORK, KERRY and **MAYO Peasant-made HOMESPUNS, 2/6** yd. upwards.

A great variety of the famous **HARRIS, LEWIS, SHETLAND,** and **ST. KILDA** HOMESPUNS.

NATURAL WHITE, BROWN, and **GREY HOMESPUNS,** light, medium, and heavy.

DYED HOMESPUNS, beautiful and artistic colourings; exclusive.

IRISH HOMESPUN TWEEDS for a serviceable suit, and boys' wear, 28 in., 2s. 6d. to 3s. yd. Special **TWEEDS** for Mourning and Clerical wear, 2s. 6d. to 5s. 6d. yard, 28 in. wide.

NAVY SERGES of superior manufacture and hard wear, comprising the recognised yachting qualities, those for ordinary wear, and the rough, strong Royal Navy and Police **SERGES;** price according to quality and weight, 4s. 6d. to 10s. 9d. yd., 56 in. Also Black and Grey **SERGES.**

OVERCOATINGS, BLACK and **GREY COATINGS, WHIP-CORDS** or **RIDING TWEEDS** and **TROUSERINGS,** all of sterling value, and fixed, closest prices.

SUPERFINE FLANNELS & TWEEDS, also **CASHMERES;** for thinnest **TROPICAL SUITS**

TRAVELLING RUGS (IRISH & SCOTCH), in great variety, 10s. 9d. to 35s.

HAND-KNITTED HOSIERY, made by the Irish and Scotch peasantry. Socks, 15d. to 2s. 6d. pair. Stockings, plain ribbed, 2s. 9d. to 3s. 9d. pair; Fancy, 3s. 6d. to 5s. 6d. pair. Gloves, 15d. to 2/6 pair.

FLANNEL TWEEDS for thin tropical suits, made of selected home wools, including natural browns and useful mixtures; well spun and woven on hand-looms. They wear extremely well and wash without shrinking. Highly recommended for Indian, African, Australian, and Argentine wear. Also for travellers and explorers. 1s. 9d. to 3s. yard. **SHIRTINGS** for Colonial Wear.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to quality and purpose, also fancy as regards pattern, and whether for Town or Country wear. A promise should also be given that they will be returned carefully within a week, anywhere in the United Kingdom (those living in London are expected to call and view the stock for themselves);—abroad, by next mail after two weeks' time for examination.

With few exceptions I allow a discount of 10 % off above prices for orders aggregating over 100 yards at a time—7½ % ditto over 50 yards; and 5 % over 25 yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries; the higher discounts are great concessions.

Parties abroad, not caring to wait for Patterns to be sent to order from, may depend upon my exercising diligence and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance (as I know by experience the kind of cloths best suited to every climate and country). Any surplus will be at their disposal.

Arrangements have been made with tailoring firms of repute to make up these cloths if desired by Customers. Although we do not make the extravagant promises of some advertisers, we shall endeavour to maintain our reputation in this department also. To share in this arrangement, send usual measurements, or old suit, or call.

Average quantities for man's SUIT, 7 yds. 28 in., or 3½ yds. 56 in.; ditto for OVERCOAT, 5 to 7 yds. 28 in., or 2½ to 3¼ yds. 56 in. Weight varies from about 3 lbs. for a thin Homespun or Flannel to 8 lbs. for a thick Frieze.

Telephone: 8303 Gerrard. **(Estd. over 60 years.)** *T.A.*: "SELFHELP, LONDON."

Branch Depot: 93, NEW BOND ST., W. [199

Advertising that is always in Sight
Seen by all Classes—By Day and by Night

W. H. Smith & Son's
RAILWAY
ADVERTISING

Embracing Thousands of Stations and Carriages

The most popular method of appeal. Conspicuous, Attractive, Striking. A system that is always extending. The most remunerative form of advertising. Economical, Continuous, Efficient. Millions are daily impressed. ROWLAND'S
MACASSAR OIL
FOR THE HAIR

UNSURPASSED. UNEQUALLED.

Use it for your own and your children's hair and you will find it Preserves, Nourishes, Enriches and Restores it more effectually than anything else. Golden Colour for fair or grey hair.

It closely resembles the NATURAL OIL in the hair which Nature provides for its preservation, the loss of which causes the hair to become DRY, THIN, and WEAK, and ultimately fall off. No other preparation for the hair has this REMARKABLE PROPERTY.

Sold in 3 sizes, by Stores, Chemists, Hairdressers, and Rowland's, 67, Hatton Garden, London. Avoid spurious imitations and ask for ROWLAND'S MACASSAR OIL. [228

Oriental Carpets and Rugs.

Directly Imported by TRELOAR'S.

All purchasers of our Oriental Carpets and Rugs may be certain of the genuineness of the same, as we have in the chief buying centres special resident Agents, who select only the best for our customers.

Our resident Agent at Ouchak, where the finest Turkey Carpets are made, sends directly to us. We are therefore able to buy and sell at lowest prices. In many of the chief Hotels, Clubs, and Institutes all over the United Kingdom Treloar's Rugs and Carpets are in use. We are prepared at a moment's notice to supply any desires, and welcome an opportunity of supplying particulars.

Our special Mail Order Department enables us to execute postal instructions from any part of the world expeditiously.

Our Large Stock of Floor Coverings at the Ludgate Hill Show Rooms is worth a visit, but if you are unable to call, and you will state your desires, we will at once submit patterns, prices, &c.

FINANCES POPULATION COMMERCE AND
GENERAL STATISTICS OF THE

British Empire

THROUGHOUT THE WORLD,
WITH SOME NOTICE OF
OTHER COUNTRIES,
&c. &c.

LONDON
OFFICE: 12, WARWICK LANE,
PATERNOSTER ROW

PRICE HALF-A-CROWN.

NOTE.—WHITAKER'S ALMANACK is supplied to the Trade on the distinct understanding that it will not be sold to the Public at less than the published price.

PREFACE TO THE XLIII[RD] ANNUAL VOLUME.

(1911.)

THE Accession of King George V. and the General Election of January, 1910, have necessitated a great number of changes in the official sections of the ALMANACK. The Chief Events of the Reign of King Edward the Seventh are presented in a chronological summary; and the opportunity has been taken of remodelling the form in which the House of Commons is arranged. The alphabetical has given place to a geographical system of grouping, but the adoption of a simple numerical device obviates any difficulty of reference from the list of Members of Parliament to their Constituencies. Similarly, the pages devoted to the British Empire have been re-arranged by continents; and an account of the Government and Constitution of the Union of South Africa finds a place for the first time among the African Dominions.

Among the new features are comprehensive tables of the Monetary Units of the World and of the Weights and Measures of the Principal Countries. The Military and Educational Systems of the World, the Naval Programmes of the Maritime Powers, and the Administration of the British Army are again considered; the possibility of a reduction in Imperial Telegraphic Rates and the methods of Property Valuation are explained; the progress of the Drama and the events in the various branches of Sport are summarised; an estimate is made of the Wealth of the Nation, and the comparative incidence of Taxation in this and other countries; while the chief events of the political life of the nation are recorded in the Parliamentary Summary and in the list of Remarkable Occurrences.

In order to effect a simultaneous publication of this volume in all the cities of Europe at the usual period, and in distant parts of the world for Christmas and the New Year, it is necessary that some time should elapse between the day of going finally to press and the public sale of the complete book. As matters now stand there is a prospect in the immediate future of a General Election, the result of which can scarcely be ascertained until after the middle of December. Under the circumstances it has been decided to proceed with the publication of the 1911 edition on normal lines; and to provide a supplement, if it should be necessary, free of charge to all purchasers who comply with the conditions stated at the foot of this page.

12 WARWICK LANE,
LONDON, E.C., *14th November*, 1910.

*** To be cut out and sent in prepaid envelope to the above office, with purchaser's name and address filled in.

Eclipses, Occultations, and other Celestial Phenomena.

January 1. Day breaks at 6*h.* 21*m. morn.*, and Twilight ends at 6*h.* 4*m. aft.*, the length of the Day being 7*h.* 50*m.*

Jan. 3. Occultation of 35 Capricorni; magnitude 6·0 See p. 83.

Jan. 3. Earth at least distance from the Sun, 3*h. aft.*

Jan. 5. Mercury and Uranus in conjunction, 3*h. morn.* ☿ 1° 57′ N.

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 10·7*s.*

Jan. 5. Mercury and Venus in conjunction, 6*h.* 19*m. aft.* ☿ 2° 50′ N.

Jan. 6. Venus and Uranus in conjunction, 5*h.* 36*m. morn.* ♀ 0° 41′ S.

Jan. 9. Saturn in conjunction with the Moon, 5*h.* 12*m. morn.* ♄ 1° 4′ S.

Jan. 10. Mercury in inferior conjunction with the Sun, 10*h. morn.*

Jan. 11. Occultations of υ^1 and υ^2 Tauri; magnitudes 4·2 and 5·4 respectively. See p. 83.

Jan. 11–12. Occultation of BD+ 23°–715; magnitude 6·0. See p. 83.

Jan. 12. Occultation of 125 Tauri; magnitude 5·1. See p. 83.

Jan. 13. Occultation of 139 Tauri; magnitude 4·7. See p. 83.

Jan. 14. Neptune in conjunction with the Moon, 3*h.* 22*m. aft.* ♆ 5° 11′ S.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 9·4*s.*

Jan. 21. Juno in conjunction with the Moon, 1*h. aft.* Juno 1° 8′ N.

Jan. 23. Jupiter in conjunction with the Moon, 5*h.* 49*m. morn.* ♃ 0° 57′ N.

Jan. 26. Occultation of A Ophiuchi; magnitude 5·4. See p. 83.

Jan. 26. Mars in conjunction with the Moon, 10*h.* 34*m. aft.* ♂ 2° 59′ N.

Jan. 28. Mercury in conjunction with the Moon, 5*h.* 31*m. morn.* ☿ 5° 59′ N.

Jan. 28. Occultation of τ Sagittarii; magnitude 3·5. See p. 83.

Jan. 29. Uranus in conjunction with the Moon, 6*h.* 51*m. morn.* Uranus 4° 17′ N.

Jan. 30. Venus at greatest heliocentric latitude South, 6*h. morn.*

Jan. 31. Venus in conjunction with the Moon, 3*h.* 3*m. aft.* ♀ 3° 37′ N.

In this month the Mornings increase 24*m.*, and the Afternoons 46*m.*

Semidiameter of Sun and Planets.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star in the first week of the month, setting S.W. by W. ; and a morning star in the latter half, rising S.E. by E.

♀ VENUS is an evening star throughout the month, setting S.W. by W.

♂ MARS is a morning star, rising about 2*h*. before the Sun, in the S.E.

♃ JUPITER is a morning star, rising E.S.E.

♄ SATURN in the constellation Aries ; souths, in the middle of the month, shortly after 6 p.m. ; altitude about 48°.

the early part of the month the constellations elopardus, Lynx, Gemini, Monoceros, and is Major are on the meridian about midnight. Gemini there is a fine compressed cluster of ll stars, crowded together, nearly midway ween γ and ζ Geminorum. It can be best rved on the nights immediately before and r the 29th. There is a very fine cluster in Canis Major, in R.A. 6*h*. 43*m*. and Decl. 20° 39′ S., 4° South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished ; and with a low-power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes. Ceres, Vesta, and Neptune can be well observed in this month. See p. 92.

* The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the *Thermometer*, with the average for 65 years; the mean of *Barometer* at a height of 159 feet above the mean level of the sea; the daily *Rainfall*, the daily *Sunshine*, and the daily general direction and maximum force of the *Wind*.

The Moon.

Mean Longitude of Moon's Ascending Node, February 1, 44° 46′ ♉.

Eclipses, Occultations, and other Celestial Phenomena.

February 1. Day breaks at 5*h.* 52*m. morn.*, and Twilight ends at 6*h.* 46*m. aft.*, the length of the Day being 9*h.* 4*m.*

Feb. 2. Mercury at greatest elongation (25° 17′) West, 2*h. aft.*

Feb. 5. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 7·7*s.*

Feb. 5. Saturn in conjunction with the Moon, 0*h.* 43*m. aft.* ♄ 1° 18′ S.

Feb. 7. Occultation of A^2 Tauri; magnitude 6·1. See p. 83.

Feb. 7. Occultation of A^1 Tauri; magnitude 4·5. See p. 83.

Feb. 7. Mercury in descending Node, 8*h. aft.*

Feb. 7. Occultation of B.A.C. 1289; magnitude 6·1. See p. 83.

Feb. 8. Occultation of ν^1 Tauri; magnitude 4·2. See p. 83.

Feb. 10. Mercury and Uranus in conjunction, 4*h.* 41*m. aft.* ☿ 0° 5′ N.

Feb. 10. Neptune in conjunction with the Moon, 11*h.* 32*m. aft.* ♆ 5° 13′ S.

Feb. 11. Occultation of λ Cancri; magnitude 5·9. See p. 83.

Feb. 15. Occultation of *b* Virginis; magnitude 5·2. See p. 83.

Feb. 17. Occultation of 38 Virginis; magnitude 6·1. See p. 83.

Feb. 18. Mercury at greatest distance from the Sun, 2*h. morn.*

Feb. 19. Jupiter in conjunction with the Moon, 6*h.* 14*m. aft.* ♃ 1° 31′ N.

Feb. 20. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 6·1*s.*

Feb. 21. Occultation of δ Scorpii; magnitude 2·5. See p. 83.

Feb. 21. Occultation of B.A.C. 5335; magnitude 5·7. See p. 83.

Feb. 23. Occultation of *X* Sagittarii; magnitude (var.) 4 to 6. See p. 83.

Feb. 24. Mars in conjunction with the Moon, 11*h.* 10*m. aft* ♂ 3° 55′ N.

Feb. 25. Uranus in conjunction with the Moon, 5*h.* 54*m. aft* Uranus 4° 27′ N.

Feb. 27. Mercury in conjunction with the Moon, 2*h.* 8*m. aft* ☿ 3° 10′ N.

In this month the Mornings increase 50*m.*, and the Afternoons 49*m.*

Day of Week.

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

Rising, Southing, and Setting of the Principal Planets at intervals of Seven Days.

Morning and Evening Stars.

☿ Mercury is a morning star throughout the month, rising S.E. by E.

♀ Venus is an evening star, setting W.S.W. at first, and at end of month due W.

♂ Mars is a morning star, rising S.E.

♃ Jupiter rises about midnight, E.S.E., near to *a* Libræ.

♄ Saturn in Aries; souths between 4 and 5 p.m.; altitude about 48°.

In the early part of the month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars, preceding *a* Cancri about 8*m*. in R.A. and nearly the same declination, consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be best observed in this month on the nights immediately preceding and following the 28th. It does not consist of a very great number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8*h*. 34*m*. and Decl. 20° 20′ N., about 1° to the west of a line joining the stars *δ* and *γ* Cancri.

The triple star *ζ* in Cancer may be examined in this month: it will be found in R.A. 8*h*. 6*m*. 59*s*. and Decl. 17° 55′ N. Neptune can be observed in this month. See p. 92.

Eclipses, Occultations, and other Celestial Phenomena.

March 1. Day breaks at 4*h.* 55*m. morn.*, and Twilight ends at 7*h.* 31*m. aft.*, the length of the Day being 10*h.* 48*m.*

Mar. 2. Venus in conjunction with the Moon, 5*h.* 58*m. aft.* ♀ 2° 20′ N.

Mar. 4. Saturn in conjunction with the Moon, 10*h.* 22*m. aft.* ♄ 1° 39′ S.

Mar. 5. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 5·08*s.*

Mar. 6–7. Occultation of A^1 Tauri; magnitude 4·5. See p. 83.

Mar. 7. Occultation of A^2 Tauri; magnitude 6·1. See p. 83.

Mar. 7. Occultation of *k* Tauri; magnitude 5·6. See p. 83.

Mar. 10. Neptune in conjunction with the Moon, 5*h.* 23*m. morn.* ♆ 5° 22′ S.

Mar. 10. Occultation of ω^1 Cancri; magnitude 6·1. See p. 83.

Mar. 10. Occultation of ω^2 Cancri; magnitude 6·2. See p. 83.

Mar. 11. Occultation of λ Cancri; magnitude 5·9. See p. 83.

Mar. 11. Mars and Uranus in conjunction, 9*h.* 40*m. morn.* ♂ 0° 23′ S.

Mar. 19. Jupiter in conjunction with the Moon, 2*h.* 8*m. morn.* ♃ 1° 47′ N.

Mar. 20. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 4·3*s.*

Mar. 20. Mercury in superior conjunction with the Sun, 1*h. aft.*

Mar. 21. Occultation of 22 Scorpii; magnitude 4·8. See p. 83.

Mar. 21. Sun enters sign Aries. Spring commences, 5*h.* 54*m. aft.*

Mar. 23. Occultation of B.A.C. 6220; magnitude 6·1. See p. 83.

Mar. 25. Uranus in conjunction with the Moon, 4*h.* 49*m. morn.* Uranus 4′ 39″ N.

Mar. 26. Mars in conjunction with the Moon, 0*h.* 3*m. morn.* ♂ 4° 15′ N.

Mar. 27. Venus in ascending Node, 1*h. aft.*

Mar. 29. Venus and Saturn in conjunction, 5*h.* 50*m. morn.* ♀ 2° 25′ N.

Mar. 31. Mercury in conjunction with the Moon, 6*h.* 51*m. morn.* ☿ 2° 22′ N.

In this month the Mornings increase 1*h.* 7*m.*, and the Afternoons 50*m.*

Morning and Evening Stars.

☿ Mercury too near the Sun for observation till the end of the month, when it becomes an evening star, setting W. by N. In superior conjunction with the Sun on the 20th.

♀ Venus is an evening star, setting nearly due W. at first, at end of the month W.N.W.

♂ Mars is a morning star, rising S.E. by E.

♃ Jupiter in the constellation Libra, near to *α* Libræ.

♄ Saturn is an evening star, setting W.N.W.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3½′ to 4′ in diameter; it lies 2½° S.E. of *β* Ursa Majoris.

Virgo comes to the meridian about midnight towards the end of this month. Between Virgo and Coma Berenices is a large Nebula, one of the class known as "Spiral Nebulæ," situated in R.A. 12*h*. 14*m*. and Decl. 15° 0′ N. With a large telescope of 8 inches aperture it appears to be resolvable in the centre into two bright star-like points. This constellation is thickly strewed with nebulæ, which may be best observed on the evenings immediately before and after the 30th of the month. Juno can be observed in this month. See p. 92.

PHASES OF THE MOON.

☽ First Quarter 6*d.* 5*h.* 55*m.* Morning.
○ Full Moon 13 2 37 Afternoon.
☾ Last Quarter 21 6 36 Afternoon.
● New Moon 28 10 25 Afternoon.

Perigee 2*d.* 8*h.* M. 227,000.
Apogee 18*d.* 7*h.* M. 251,800.
Perigee 30*d.* 9*h.* M. 224,000.

RAIN FELL IN APRIL, 1910,
16 days; total fall, 2·63 inches; *above* the
erage, 1841-90, by 0·97 inch.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

2. Census Day, 1911.

5. Dividends on Consols, &c., due. Financial year, 1910-1911, for Imperial purposes ends to-day.

– Quarter Sessions to be held this week unless otherwise fixed.

9. Fire Insurances must be paid.

15. Parish Councils to hold their annual meeting on or within seven days of this date.

Mean Longitude of Moon's Ascending Node, April 1, 41° 39′ ♉.

Eclipses, Occultations, and other Celestial Phenomena.

April 1. Day breaks at 3*h.* 37*m. morn.*, and Twilight ends at 8*h.* 31*m. aft.*, the length of the Day being 12*h.* 50*m.*

Apr. 1. Saturn in conjunction with the Moon, 11*h.* 15*m. morn.* ♄ 1° 58′ S.

Apr. 1. Venus in conjunction with the Moon, 5*h.* 45*m. aft.* ♀ 0° 14′ N.

Apr. 2. Occultation of B.A.C. 1143; magnitude 6·1. See p. 84.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·4*s.*

Apr. 6. Neptune in conjunction with the Moon, 10*h.* 3*m. morn.* ♆ 5° 31′ S.

Apr. 13. Mercury at greatest heliocentric latitude N.

Apr. 15. Mercury at greatest elongation (19° 42′) East, 3*h. morn.*

Apr. 15. Jupiter in conjunction with the Moon, 5*h.* 6*m. morn.* ♃ 1° 41′ N.

Apr. 16. Occultation of B.A.C. 5354; magnitude 5·8. See p. 84.

Apr. 19. Occultation of B.A.C. 6063; magnitude 5·7. See p. 84.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 5·0*s.*

Apr. 21. Uranus in conjunction with the Moon, 2*h.* 12*m. aft.* Uranus 4° 45′ N.

Apr. 24. Mars in conjunction with the Moon, 1*h.* 11*m. morn.* ♂ 3° 45′ N.

Apr. 25. Mercury stationary, 8*h. morn.*

Apr. 28–29. A Total Eclipse of the Sun, invisible at Greenwich. See p. 81.

Apr. 29. Saturn in conjunction with the Moon, 2*h.* 46*m. morn.* ♄ 2° 17′ S.

Apr. 29. Mercury in conjunction with the Moon, 1*h.* 49*m. aft.* ☿ 1° 18′ N.

Apr. 29. Venus at least distance from the Sun, 10*h. aft.*

In this month the Mornings increase 1*h.* 2*m.*, and the Afternoons 48*m.*

10	1 25 59·9	88 49 56
19	1 26 1·4	88 49 53
28	1 26 3·7	88 49 50

Morning and Evening Stars.

☿ Mercury is an evening star, setting at first W.N.W., afterwards N.W. by W. At least distance from the Sun on the 3rd, at 2*h. morn.*

♀ Venus is an evening star, setting N.W. by W. about 2*h.* after the Sun.

♂ Mars is a morning star, rising E.S.E.

♃ Jupiter rises in the late evening, E.S.E., in the latter half of the month.

♄ Saturn is an evening star in the early part of the month, setting W.N.W.

At the latter part of April the constellations Draco, Bootes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, about 4° S.W. of η Ursæ Majoris, can be observed in this month. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." That this is not a true incandescent Nebula is shown by the absence of bright lines in its spectrum. In R.A. 15*h.* 14*m.*, Decl. 2° 28′ N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel was able to distinguish over 200 stars in this group in the field of his 40-ft. reflector, but found the middle portion so condensed that the individual stars could not be separated. The stars range from the 12th to 15th mag. The evenings about the 28th are the best for observing these objects. Juno may be observed in this month. See p. 92.

Mean Longitude of Moon's Ascending Node, May 1, 40° 4′ ♉.

Eclipses, Occultations, and other Celestial Phenomena.

May 1. Day breaks at 2*h.* 3*m. morn.*, and Twilight ends at 9*h.* 51*m. aft.*, the length of the Day being 14*h.* 44*m.*

May 1. Venus in conjunction with the Moon, 1*h.* 11*m. aft.* ♀ 1° 29′ S.

May 3. Neptune in conjunction with the Moon, 5*h.* 21*m. aft.* ♆ 5° 34′ S.

May 4. Occultation of *e* Geminorum; magnitude 5·5. See p. 84.

May 5. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 6·1*s.*

May 5. Mercury in inferior conjunction with the Sun, 6*h. aft.*

May 12. Jupiter in conjunction with the Moon, 4*h.* 53*m. morn.* ♃ 1° 19′ N.

May 13. Occultation of 1 Libræ; magnitude 4·7. See p. 84.

May 13. Occultation of 2 Libræ; magnitude 6·0. See p. 84.

May 13. A Penumbral Eclipse of the Moon, partly visible at Greenwich. See p. 81.

May 17. Mercury at greatest distance from the Sun, 1*h. morn.*

May 18. Uranus in conjunction with the Moon, 9*h.* 16*m. aft.* Uranus 4° 43′ N.

May 20. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 7·3*s.*

May 23. Mars in conjunction with the Moon, 1*h.* 54*m. morn.* ♂ 2° 19′ N.

May 26. Mercury in conjunction with the Moon, 5*h.* 8*m. aft.* ☿ 4° 5′ S.

May 26. Saturn in conjunction with the Moon, 7*h.* 15*m. aft.* ♄ 2° 38′ S.

May 29. Mercury and Saturn in conjunction, 2*h.* 28*m. morn.* ☿ 1° 35′ S.

May 30. Venus and Neptune in conjunction, 2*h.* 51*m. morn.* ♀ 2° 59′ N.

May 31. Neptune in conjunction with the Moon, 2*h.* 57*m. morn.* ♆ 5° 32′ S.

May 31. Venus in conjunction with the Moon, 4*h.* 50*m. morn.* ♀ 2° 35′ S.

May 31. Occultation of λ Cancri; magnitude 5·9. See p. 84.

In this month the Mornings increase 44*m.*, and the Afternoons 44*m.*

28	1	26	22·8	88	49	43

Morning and Evening Stars.

☿ Mercury is a morning star, rising N.E. by E., later E.N.E.
♀ Venus is an evening star, setting N.W.
♂ Mars is a morning star, rising E.S.E., and later E. by S.
♃ Jupiter rises in the early evening, E.S.E., in Libra.
♄ Saturn is a morning star towards the end of the month, rising E.N.E.

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars situated in R.A. 16*h*. 38*m*. and Decl. 36° 41′ N. This, like most of the star-clusters, is condensed in the centre, and may be easily resolved with moderate telescopic aid; and a few days about the 27th, when the Moon is absent, it may, if the opportunity is taken of a very clear night, be seen with the naked eye plainly between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Mean Longitude of Moon's Ascending Node, June 1, 38° 25′ ♉.

Eclipses, Occultations, and other Celestial Phenomena.

June 1. There is no real night in this month, but either daylight or twilight, the length of the Day being 16*h*. 13*m*.

June 1. Mercury at greatest elongation (24° 30′) W., 5*h*. *aft*.

June 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 8·3*s*.

June 8. Jupiter in conjunction with the Moon, 5*h*. 6*m*. *morn*. ♃ 1° 0′ N.

June 10. Occultation of 22 Scorpii; magnitude 4·8. (See p. 84.)

June 13. Occultation of B.A.C. 6220; magnitude 6·1. See p. 84.

June 15. Uranus in conjunction with the Moon, 2*h*. 16*m*. *morn*. Uranus 4° 35′ N.

June 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 8·7*s*.

June 21. Mars in conjunction with the Moon, 0*h*. 44*m*. *morn*. ♂ 0° 12′ N.

June 22. Sun enters the sign Cancer. Summer commences, 1*h*. 35*m*. *aft*.

June 23. Occultation of ο Arietis; magnitude 5·8. See p. 84.

June 23. Saturn in conjunction with the Moon, 10*h*. 38*m*. *morn*. ♄ 3° 3′ S.

June 25. Mercury in ascending Node, 11*h*. *morn*.

June 25. Mercury in conjunction with the Moon, 9*h*. 14*m*. *aft*. ☿ 3° 32′ S.

June 27. Neptune in conjunction with the Moon, 2*h*. 38*m*. *aft*. ♆ 5° 28′ S.

June 29. Venus in conjunction with the Moon, 5*h*. 8*m*. *aft*. ♀ 3° 40′ S.

June 30. Mercury at least distance from the Sun, 1*h*. *morn*.

In this month the Mornings increase 3*m*., and the Afternoons 14 *m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, rising E.N.E., then N.E. by E., and at end of month N.E.

♀ VENUS is an evening star, setting N.W. by W., and later W.N.W.

♂ MARS is a morning star, rising nearly due E. at first, and later E. by N.

♃ JUPITER still in the constellation Libra; souths about time of sunset; altitude about 26°.

♄ SATURN is a morning star, rising E.N.E.

the last week of June the constellations
so, Lyra, a portion of Hercules, Scutum
eski, and a part of Sagittarius will south
t midnight.

Sagittarius there is a notable and very exten-
Nebula, somewhat like a horseshoe in shape.
ill be found in R.A. 18*h.* 15*m.*, and Decl. 16°
S. The spectroscope shows this Nebula to
ist of a mass of incandescent gas. Professor
len says that one arm of the Nebula has changed its position since Herschel's time. In good weather it can be well seen with a small telescope.

In Sagittarius, a little West and North of λ, is a globular cluster of very minute stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing it except when southing.

Eclipses, Occultations, and other Celestial Phenomena.

July 1. In this month there i no real night till after the 20th the length of the day being 16*h* 30*m*.

July 1. Mars at least distanc from the Sun, 9*h*. *aft*.

July 3. Earth at greatest dis tance from the Sun, 6*h*. *morn*.

July 3. Jupiter stationary h the heavens, 10*h*. *morn*.

July 4. Mercury in superio conjunction with the Sun, 1*h morn*.

July 5. Mean time of Sun' semidiameter passing the mer dian, 1*m*. 8·4*s*.

July 5. Jupiter in conjunctio with the Moon, 9*h*. 21*m*. morn ☽ 0° 58′ N.

July 7. Venus at greates elongation (45° 29′) East, 4*h*. *aft*.

July 8. Mercury and Neptun in conjunction, 2*h*. 10*m*. *aft*. ☿ ☌ ♆ 2° 19′ N.

July 9. Occultation of B.A.C 6063; magnitude 5·7. See p. 84.

July 12. Uranus in conjunctio with the Moon, 9*h*. 19*m*. morn Uranus 4° 28′ N.

July 14. Neptune in conjun tion with the Sun, 9*h*. *aft*.

July 19. Mars in conjunctio with the Moon, 7*h*. 31*m*. *aft*. ♂ ☌ ☽ 2° 0′ S.

July 20. Mean time of Sun semidiameter passing the mer dian, 1*m*. 7·5*s*.

July 20. Saturn in conjunctio with the Moon, 11*h*. 11*m*. *aft*. ♄ ☌ ☽ 3° 33′ S.

July 21. Uranus in oppositio to the Sun, 6*h*. *morn*.

July 25. Neptune in conjunctio with the Moon, 2*h*. 42*m*. morn ♆ ☌ ☽ 5° 29′ S.

July 27. Mercury in conjunctio with the Moon, 8*h*. *morn*. ☿ ☌ ☽ 4° 6′ N.

July 28. Occultation of B.A.C 3837; magnitude 5·8. See p. 84.

July 28. Venus in conjunctio with the Moon, 9*h*. 18*m*. *aft*. ♀ ☌ ☽ 5° 47′ S.

July 29. Mercury in conjunctio with *α* Leonis (Regulus), 2*h*. *aft* ☿ ☌ ♌ 0° 9′ N.

In this month the Mornin decrease 34*m*., and the Afternoo 28*m*.

MORNING AND EVENING STARS.

☿ Mercury is an evening star, at first setting N.W., and afterwards W.N.W.

♀ Venus is an evening star, setting W.N.W. at first, and afterwards W. by N.

♂ Mars is a morning star at the beginning of the month, rising E. by N.

♃ Jupiter souths in the early evening; altitude about 26°.

♄ Saturn is a morning star, rising E.N.E.

he middle of July the constellations s, Vulpecula, Aquila, and Sagittarius will he meridian about midnight.

Annular Nebula in Lyra, situated between y, is the best example of the Annular Nebue heavens containing, as far as is at present , comparatively few examples of this class. uires a rather good telescope to see it well: n R.A. 18*h.* 50*m.* and Decl. 32° 54′ N. It exhibits a spectrum as if composed of an incandescent gas. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyræ and β Cygni. It is in R.A. 19*h.* 13*m.*, Decl. 30° 1′ N. The best nights for the observation of these objects are those just before and after the 25th.

Uranus may be well observed in this month. See p. 92.

Mean Longitude of Moon's Ascending Node, August 1, 35° 11′ ♉.

Eclipses, Occultations and other Celestial Phenomena.

August 1. Day breaks 1*h.* 31*m. morn.*, and Twilight ends at 10*h.* 41*m. aft.*, the length of the Day being 15*h.* 24*m.*

Aug. 1. Jupiter in conjunction with the Moon, 7*h.* 11*m.* ☌ ☽ 1° 13′ N.

Aug. 5. Mean time of Sun's semidiameter passing the meridian 11*m.* 6·1*s.*

Aug. 8. Uranus in conjunction with the Moon, 10*h.* 46*m. morn.* Uranus 4° 28′ N.

Aug. 10. Venus at greatest brilliancy, 1*h. aft.*

Aug. 13. Mercury at greatest elongation (27° 25′) East, 9*h. morn.*

Aug. 17. Mars and Saturn in conjunction, 3*h.* 53*m. morn.* ☌ ♂ 21′ N.

Aug. 17. Saturn in conjunction with the Moon, 8*h.* 2*m. morn.* ♄ 4° 2′ S.

Aug. 17. Mars in conjunction with the Moon, 8*h.* 12*m. morn.* ♂ 3° 40′ S.

Aug. 18. Occultation of *k* Tauri magnitude 5·6. See p. 84.

Aug. 20. Venus at greatest distance from the Sun, 7*h. morn.*

Aug. 20. Mean time of Sun's semidiameter passing the meridian 11*m.* 4·9*s.*

Aug. 21. Neptune in conjunction with the Moon, 1*h.* 20*m.* ☌ ♆ 5° 36′ S.

Aug. 22. Occultation of λ Cancri magnitude 5·9. See p. 84.

Aug. 23. Venus stationary, 4*h. morn.*

Aug. 25. Mercury in conjunction with the Moon, 4*h.* 12*m.* ☌ ☿ 7° 53′ S.

Aug. 25. Venus in conjunction with the Moon, 11*h.* 50*m.* ☌ ♀ 10° 23′ S.

Aug. 26. Mercury stationary, 1*h. aft.*

Aug. 29. Jupiter in conjunction with the Moon, 10*h.* 0*m. morn.* ♃ 1° 41′ N.

In this month the Morning decrease 47*m.*, and the Afternoon 57*m.*

Morning and Evening Stars.

☿ Mercury is an evening star, setting at first W. by N., afterwards nearly due W.

♀ Venus is an evening star, setting at first due W., afterwards W. by S.

♂ Mars is in Aries; about 5° south of the Pleiades at the end of the month.

♃ Jupiter is an evening star; sets W.S.W.

♄ Saturn rises in the late evening, at the end of the month, E.N.E.

he beginning of August, Cepheus, Cygnus, cula, Delphinus, and Capricornus south at ght.

ulpecula, 3½° due north of γ Sagittæ, is Dumb-bell" Nebula, generally considered vable, although under the higher powers rd Rosse's telescope there seemed some of resolvability shown. It is situated in 19h. 55m. and Decl. 22° 26′ N., and gives a um of bright lines.

There is a little bright globular cluster, 4° due south of ε Delphini, consisting of a mass of very small stars, not easy for small telescopes; ε Delphini is situated in R.A. 20h. 28m. 49s. and Decl. 11° 0′ N. – a tiny star, 9th mag. precedes it. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 23rd of this month. Uranus may be observed at the beginning of the month. See p. 92.

Mean Longitude of Moon's Ascending Node, September 1, 33° 32′ ♉.

Eclipses, Occultations, and other Celestial Phenomena

September 1. Day breaks 3*h.* 7*m. morn.*, and Twilight e at 8*h.* 53*m. aft.*, the length of Day being 13*h.* 35*m.*

Sept. 1. Occultation of 43 O uchi; magnitude 5·4. See p.

Sept. 2. Occultation of B.A 6190; magnitude 6·0. See p.

Sept. 4. Uranus in conjunct with the Moon, 4*h.* 37*m.* Uranus 4° 35′ N.

Sept. 5. Mean time of E semidiameter passing the m dian, 1*m.* 4·1*s.*

Sept. 13. Saturn in conjunc with the Moon, 1*h.* 48*m.* ♄ 4° 22′ S.

Sept. 14. Mars in conjunc with the Moon, 0*h.* 39*m.* ♂ 4° 32′ S.

Sept. 16. Occultation of B 1918; magnitude 6·1. See p.

Sept. 17. Neptune in con tion with the Moon, 9*h.* 28*m.* ♆ 5° 46′ S.

Sept. 18. Mercury statio 3*h. morn.*

Sept. 18. Occultation of ω^1 Ca magnitude 6·1. See p. 84.

Sept. 20. Mean time of semidiameter passing the dian, 1*m.* 3·8*s.*

Sept. 21. Mercury in con tion with the Moon, 4*h.* 13*m.* ☿ 4° 31′ S.

Sept. 21. Venus in conjun with the Moon, 11*h.* 11*m.* ♀ 13° 14′ S.

Sept. 24. Sun enters sign ♎ 4*h.* 18*m. morn.* Autumn mences.

Sept. 25. Mercury at gre elongation (17° 52′) West, 2*h.*

Sept. 26. Jupiter in conjun with the Moon, 4*h.* 5*m.* ♃ 2° 11′ N.

Sept. 29. Occultation of B 6072; magnitude 5·8. See p.

In this month the Mor decrease 45*m.*, and the Aftern 1*h.* 5*m.*

Morning and Evening Stars.

☿ Mercury is a morning star in the latter half of the month, rising E. by N.

♀ Venus is a morning star at the end of the month, rising due E. Not far from Mercury.

♂ Mars rises in the late evening, about midway between Aldebaran and the Pleiades, N.E. by E.

♃ Jupiter is an evening star, setting W.S.W.

♄ Saturn rises in the evening, E.N.E., between Aries and Taurus.

...he 1st of September, Cepheus, Pegasus, ...us, and Piscis Australis will be on the ...n at midnight.

...egasus is a fine globular cluster of very ...tars, 3½′ in diameter, 4½° north-west of ...i, much condensed towards the centre, ...the stars cannot be resolved; there are ...elescopic and several rather bright stars ...ield. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form, consisting of very small stars very much compressed. It is situated in R.A. 21*h.* 28*m.* and Decl. 1° 20′ S.

In the early evening at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21*h.* 35*m.* and Decl. 23° 40′ S., can be observed. The best evenings for observation are those immediately before and after the 22nd.

PHASES OF THE MOON.

○ Full Moon	8*d.*	4*h.*	11*m.*	Morning.
☾ Last Quarter	14	11	46	Afternoon.
● New Moon	22	4	9	Morning.
☽ First Quarter	30	6	42	Morning.

Perigee 12*d.* 7*h.* M. 228,800.
Apogee 27*d.* 11*h.* A. 251,700.

RAIN FELL IN OCTOBER, 1910,

on 14 days; total fall, 1·81 inch; *below* the average, 1841–90, by 1·00 inch.

MONTHLY NOTES.

October 1. Revising Barristers must complete revision of all lists of voters by 12th.—Pheasant shooting begins.—Common Lodging-houses to be whitewashed in the first week.

5. Dividends due. 9. Various Licences expire.

14. Fire Insurances must be paid.

17. Quarter Sessions begin.

24. Borough Councillors to be nominated.

Eclipses, Occultations, and other Celestial Phenomena.

October 1. Day breaks at *4h. 8m. morn.*, and Twilight ends at *7h. 32m. aft.*, the length of the Day being *11h. 40m.*

Oct. 2. Uranus in conjunction with the Moon, *0h. 4m. morn.* Uranus 4° 44′ N.

Oct. 3. Occultation of 35 Capricorni; magnitude 6·0. See p. 84.

Oct. 3–4. Occultation of 37 Capricorni; magnitude 5·7. See p. 84.

Oct. 5. Mean time of Sun's semi-diameter passing the meridian, *1m. 4·3s.*

Oct. 6. Occultation of ψ^1 Aquarii; magnitude 4·5. See p. 84.

Oct. 6. Occultation of ψ^2 Aquarii; magnitude 4·6. See p. 84.

Oct. 9–10. Occultation of 2 Arietis; magnitude 6·1. See p. 84.

Oct. 10. Saturn in conjunction with the Moon, *6h. 28m. aft.* ♄ 4° 27′ S.

Oct. 12. Mars in conjunction with the Moon, *5h. 52m. morn.* ♂ 4° 21′ S.

Oct. 13. Occultation of B.A.C. 1754; magnitude 5·7. See p. 84.

Oct. 15. Neptune in conjunction with the Moon, *3h. 33m. morn.* ♆ 5° 53′ S.

Oct. 18. Venus in conjunction with the Moon, *6h. 41m. aft.* ♀ 7° 39′ S.

Oct. 20. Mean time of Sun's semi-diameter passing the meridian, *1m. 5·4s.*

Oct. 22. Mercury in conjunction with the Moon, *2h. 2m. morn.* ☿ 0° 28′ N.

Oct. 22. Eclipse of the Sun, in visible at Greenwich. See p. 81.

Oct. 22. Venus at greatest brilliancy, *4h. aft.*

Oct. 23. Jupiter in conjunction with the Moon, *11h. 3m. aft.* ♃ 2° 40′ N.

Oct. 28. Occultation of B.A.C. 6628: magnitude 5·9. See p. 84.

Oct. 29. Uranus in conjunction with the Moon, *8h. 40m. morn.* Uranus 4° 48′ N.

In this month the Morning decrease *52m.*, and the Afternoon *1h. 4m.*

Mean Longitude of Moon's Ascending Node, October 1, 3° 57′ ♉.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star till near the end of the month, rising at first nearly due E., and afterwards E.S.E.

♀ VENUS is a morning star, rising nearly due E.

♂ MARS rises in the early evening N.E. by E.

♃ JUPITER is an evening star, setting W.S.W.

♄ SATURN rises in the early evening, E.N.E.

the 1st of October, Cassiopeia, Andromeda, s, and Cetus are on the meridian at mid-; while Cancer and Orion are rising, and ules and Capricornus setting.

Andromeda, near to ti e 4th mag. star υ, is ge and irresolvable Nebula in the form of an ated ellipse. It is situated in R.A. *oh. 37m.* Decl. 40° 43′ N. In Sept., 1885, a decidec r nucleus was observed in R.A. *oh. 36m. 31s.*, 40° 38′ N., probably unconnected with the la. Very many minute stars can be seen n the Nebula.

A fine double cluster of stars, situated midway on a line joining α Persei and γ Cassiopeiæ, may be observed in this month. The northern cluster is a magnificent collection of stars, 30′ in diameter, ranging in magnitude from the 6th to 14th. The smaller southern cluster, 15′ in diameter, is less rich in stars, and much condensed toward the centre. On fine nights, without moonlight, such as those about the 21st, these objects afford one of the most b autiful subjects for observation.

Pallas can be observed in this month. See p. 92.

Mean Longitude of Moon's Ascending Node, November 1. 30° 19′ ♉.

Eclipses, Occultations, and other Celestial Phenomena.

November 1. Day breaks at 5*h.* 1*m. morn.*, and Twilight ends at 6*h.* 27*m. aft.*, the length of the Day being 9*h.* 40*m.*

Nov. 5. Mean time of Sun's Semidiameter passing the meridian, 1*m.* 7·1*s.*

Nov. 6. Penumbral Eclipse of the Moon, partly visible at Greenwich. See p. 82.

Nov. 7. Saturn in conjunction with the Moon, 0*h.* 11*m. morn.* ♄ 4° 18′ S.

Nov. 7. Mercury and Jupiter in conjunction, 7*h.* 19*m. aft.* ☿ 1° 50′ S.

Nov. 7. Occultation of 32 Tauri; magnitude 5·8. See p. 84.

Nov. 10. Occultation of 47 Geminorum; magnitude 5·6. See p. 84.

Nov. 11. Neptune in conjunction with the Moon, 9*h.* 31*m. morn.* ♆ 5° 52′ S.

Nov. 11. Occultation of λ Cancri; magnitude 5·9. See p. 84.

Nov. 11–12. Occultation of ν^2 Cancri; magnitude 6·1. See p. 84.

Nov. 12. Occultation of ν^3 Cancri; magnitude 5·7. See p. 84.

Nov. 16. Venus in conjunction with the Moon, 6*h.* 58*m. aft.* ♀ 1° 13′ S.

Nov. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·8*s.*

Nov. 20. Jupiter in conjunction with the Moon, 6*h.* 47*m. aft.* ♃ 3° 7′ N.

Nov. 22. Mercury in conjunction with the Moon, 8*h.* 24*m. morn.* ☿ 1° 28′ N.

Nov. 25. Uranus in conjunction with the Moon, 5*h.* 41*m. aft.* ♅ 4° 44′ N.

Nov. 26. Venus at greatest elongation (46° 45′) West, 8*h. morn.*

Nov. 27. Occultation of B.A.C 7550; magnitude 6·1. See p. 84.

Nov. 28. Occultation of 51 Aquarii; magnitude 6·1. See p. 84.

Nov. 29. Occultation of ♃ Aquarii; magnitude 4·6. See p. 84.

In this month the Mornings decrease 49*m.*, and the Afternoon 40*m.*

1	28	11·4	88	50	20
1	28	6·6	88	50	23

n the 1st of November, Perseus, Aries, and is are on the meridian at midnight. n irresolvable Nebula 2′·5 to the East of γ romedæ may be observed in this month. It discovered by Miss Herschel, with a small cting telescope of twenty-seven inches in l length. It is a very elongated Nebula, 15′ long by 3′ broad, with a cleft, dark in the middle, and suggests the idea of a vast flat ring seen very obliquely. It is in R.A. 2*h.* 16*m.* and Decl. 41° 49′ N. The best evenings for observing it are those about the 20th.

Pallas can be well observed in this month. See p. 92.

MORNING AND EVENING STARS.

☿ MERCURY rises and sets too near to the Sun to be easily observed in this month.

♀ VENUS is a morning star, rising nearly due E., and at the end of the month E. by S.

♂ MARS in Taurus; souths about midnight; altitude about 60°.

♃ JUPITER too near the Sun for observation in this month.

♄ SATURN souths about midnight, early in the month; altitude about 53°.

Fasts and Festivals.
Remarkable Days—Events.

PHASES OF THE MOON.

○ Full Moon	6*d.*	2*h.*	52*m.*	Morning.
☾ Last Quarter	12	5	46	Afternoon.
● New Moon	20	3	40	Afternoon.
☽ First Quarter	28	6	48	Afternoon.

Perigee 7*d.* 1*h.* M. 222,600.
Apogee 22*d.* 2*h.* M. 252,700.

RAIN FELL IN DECEMBER, 1909, on 22 days; total fall, 2·40 inches; *above* the average, 1841–90, by 0·63 inch.

MONTHLY NOTES.

Dec. 10. Grouse and Black Game Shooting ends.

15. Last day for renewing solicitors' certificates.

– Notices to owners and occupiers affected by private Bills in Parliament must be delivered.

21. Election of Common Councilmen in the City of London.

25. Quarter Day. Bills of Exchange falling due this day must be provided for on the 23rd.

26. Bank and General Holiday. Bills of exchange falling due on 26th are not payable till the 27th.

31. Various Licences expire.

Eclipses, Occultations, and other Celestial Phenomena.

December 1. Day breaks at 5*h.* 41*m. morn.*, and Twilight ends at 5*h.* 57*m. aft.*, the length of the Day being 8*h.* 10*m.*

Dec. 3. Occultation of 29 Arietis; magnitude 6·1. See p. 84.

Dec. 4. Saturn in conjunction with the Moon, 7*h.* 39*m. morn.* ♄ 4° 5′ S.

Dec. 5. Mars in conjunction with the Moon, 3*h.* 55*m. morn.* ♂ 0° 50′ S.

Dec. 5. Occultation of B.A.C. 1189; magnitude 5·9. See p. 84.

Dec. 5. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 10·3*s.*

Dec. 6. Occultation of B.A.C. 1754; magnitude 5.7. See p. 84.

Dec. 7. Occultation of 136 Tauri; magnitude 4·6. See p. 84.

Dec. 7. Occultation of B.A.C. 1918; magnitude 6·1. See p. 84.

Dec. 7. Mercury at greatest elongation (20° 58′) East, 7*h. aft.*

Dec. 8. Occultation of 47 Geminorum; magnitude 5·6. See p. 84.

Dec. 8. Neptune in conjunction with the Moon, 5*h.* 22*m. aft.* ♆ 5° 45′ S.

Dec. 8. Occultation of ω^1 Cancri; magnitude 6·1. See p. 84.

Dec. 8. Occultation of ω^2 Cancri: magnitude 6·2. See p. 84.

Dec. 9. Occultation of λ Cancri; magnitude 5·9. See p. 84.

Dec. 16. Venus in conjunction with the Moon, 2*h.* 58*m. aft.* ♀ 3° 39′ N.

Dec. 18. Jupiter in conjunction with the Moon, 1*h.* 2*m. aft.* ♃ 3° 35′ N.

Dec. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 11·0*s.*

Dec. 22. Sun enters the sign Capricornus, 10*h.* 54*m. aft.* Winter commences.

Dec. 24. Occultation of 33 Capricorni; magnitude 5·3. See p. 84.

Dec. 31. Saturn in conjunction with the Moon, 3*h.* 59*m. aft.* ♄ 4° 1′ S.

In this month the Mornings decrease 24*m.*, and the Afternoons increase 4*m.*

Apparent Right Ascension of the Principal Planets at Mean Noon.

MORNING AND EVENING STARS.

☿ Mercury is an evening star till the end of the month, setting S.W. In conjunction with the Moon on the 21st, at 11*h.* 41*m. morn.* ☿ 5° 43′ N.

♀ Venus is a morning star, rising at first E. by S., and afterwards E.S.E.

♂ Mars in Taurus; souths about 10*h.* p.m. in middle of the month; altitude about 59°.

♃ Jupiter is a morning star, rising S.E. by E.

♄ Saturn souths in the late evening; altitude about 52°.

n the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus l be on the meridian.

n Taurus is a fine Nebula of a pearly white our 1½° North-west of ζ Tauri. Lord Rosse npared its appearance to that of a crab, and s generally known as the "Crab Nebula."

bout the middle of December Orion souths at night, and can be best observed in this month.

This magnificent constellation contains the grandest of all the Nebulæ, situated in the Sword-Scabbard. A line drawn from α Orionis through ζ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye on any clear night. Evenings about the 20th are the best.

Ceres can be observed in this month. See p. 92.

Subtract tide interval 0 50

Time of high water at Aberdeen ..... 7 59 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on *January 26th*:—

Time of high water at London Bridge *10h 59m.* Morn.
Add tide interval 2 15

Time of high water at Scarborough .. 1 14 After.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 12 hours must be added to the London Bridge times; the resulting difference will be the preceding day's afternoon tide, where the London morning tide was used. Sometimes the sum "high water at London Bridge"+"tide interval" will exceed 12 hours; in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was of the morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, *January 27th*, &c.:—

Time of high water at London Bridge on *January 28th* + 12 hours ..... *12h 38m.* Morn.
Subtract tide interval 0 50

Time of high water at Aberdeen, *Jan 27th* 11 48 After

Calendar of First and Second Proper Lessons

APPOINTED FOR SUNDAYS AND OTHER HOLY DAYS THROUGHOUT THE YEAR.

The Athanasian Creed to be read on the days marked*.		Morning Prayer.		Evening Prayer.

Standard Time.

It is well known that the "time of day" differs everywhere except in places on the same meridian, the difference in local times being caused by the rotation of the Earth on its axis from West to East in each twenty-four hours; and as the globe is divided astronomically into 360° of longitude, reckoned by us from the meridian of Greenwich, 180° to the East and 180° to the West, it is easily seen that each 15° is equal to one hour of time.

The notice, "London (Greenwich) time observed at all stations," formerly so familiar to the travellers by railway, was really the introduction to the use of *Standard Time*, and was inevitable when railway timetables were printed; but in a country so large as the Dominion of Canada, which extends over 80° of longitude, as also in the United States with nearly 60°, it soon became absolutely necessary to minimise the great inconvenience, and so the use of Standard Time was made legal.

By *Standard Time* is meant that the hour of each 15° of longitude becomes the local mean time for the zone or belt extending 7½° on each side of the central meridian; though in practice the zone has to be adapted to local circumstances, and so cannot conform to the exact line or meridian, but is arranged to suit boundaries of States or Provinces as may be most convenient. By way of illustration, it may be noted that in the Province of Ontario, Canada, by Act of the Legislature, the hour of 75° W. is Standard Time for the Province as far as 89° W., and that the S.W. point, 83° W., extends westerly beyond the eastern part of the State of Michigan, where the time of 90° W. is used; so at Windsor, Ontario, it is noon while in Michigan—more to the east—it is 11 A.M. The *Standard Time* as used in the chief cities of Canada and the United States may be noted: at Quebec, Montreal and Toronto, at Boston, New York and Washington, the time of 75° W., five hours earlier than Greenwich, is used; at Winnipeg in Manitoba, and at Detroit, Chicago and New Orleans, the time of 90°, six hours earlier than Greenwich, is used; at Regina and Denver it is the time of 105°, seven hours earlier than Greenwich; and in British Columbia and at San Francisco the time of 120° W., eight hours earlier than Greenwich, is used; and when 180° is reached another day begins in Eastern Siberia, at the Fiji Islands, and a little to the east of New Zealand.

The same rule applies to places east of Greenwich, where, of course, noon is earlier than at Greenwich according to the longitude. Spain adopted Standard—that is, Greenwich—Time early in the century. When noon at Greenwich it is 2 P.M. in Egypt and South Africa; it is 5½ P.M. in India, 8¾° E.; in Japan and Corea, 135° E., it is 9 P.M.; and in Eastern Australia, 150° E., it is 10 P.M.

The question has been asked very often, "Where does a day begin?"—that is, any special day, New Year's Day or Easter Day—and the answer is that for all peoples, nations, and languages, using maps with longitude East and West from Greenwich, each day begins at the meridian of 180°, slightly east of New Zealand in the South, and intersecting Eastern Siberia in the North, and so the last day of the nineteenth century and the first day of the twentieth were on the Earth together, not running concurrently or side by side, north and south of the Equator, as has been supposed, erroneously, but the latter following the former from 180° westerly to Greenwich, and on again to 180°, where it gave place to January 2nd.

TWELVE O'CLOCK NOON GREENWICH MEAN TIME,
AS COMPARED WITH THE CLOCK IN THE FOLLOWING PLACES.

* Peculiar to Russia.

Julian Calendar.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year—which, with the Romans, began with March—were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undecimum Kal. Jan.*), Dec. 13th being *Idibus Decembribus*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 1° and 66½°.

To use the table: With the Sun's declination, in the first column, and under the required latitude on the horizontal line, will be found the apparent time of sunset. Subtracting the time so found from 12*h*. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versâ*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

o obtain the Sidereal Time corresponding to a given Mean Solar Time, we must take, from the ond page of the month, the preceding Sidereal Time at Mean Noon, and add to it the Sidereal ivalents corresponding to the hours, minutes, and seconds of the given Mean Time. Should sum come out more than twenty-four hours, that amount must be subtracted from it. As an mple, let the Sidereal Time corresponding to the Mean Time of January 10, 8*h.* 5*m.* 54*s.*, be uired :—

		H.	M.	S.
Sidereal Time at Mean Noon, on January 10		19	15	34
Mean Time intervals and sidereal Equivalents.....	8*h.* =	8	1	18·85
	5*m.* =		5	0·82
	54*s.* =			54·15
Corresponding Sidereal Time	=	3	22	47·82

his Table may also be used to show the acceleration of Sidereal on Mean Solar Intervals by tracting the Mean Time arguments from their sidereal equivalents.

TO CHANGE INTERVALS OF SIDEREAL TIME INTO THE EQUIVALENT INTERVALS OF MEAN SOLAR TIME.

To obtain the Mean Time corresponding to a given Sidereal Time, take, from the second page of the month, the preceding Mean Time at Sidereal Noon, and add to it the Mean Time Equivalents corresponding to the hours, minutes, and seconds of the Sidereal Time.

As an example, convert the Sidereal Time 18*h*. 32*m*. 14*s*., on Aug. 6, into Mean Time:—

		H.	M.	S.
Mean Time at Sidereal Noon, Aug. 5		15	5	50
Sidereal intervals and Mean Time Equivalents	18*h*. =	17	57	3·07
	32*m*. =		31	54·76
	14*s*. =			13·96
Corresponding Mean Time, Aug. 6	=	9	35	1·79

* Probably 88 days. † The period of rotation of Venus has not been definitely ascertained.

N.B.—The numbers in the third column refer to the mean distances at inferior conjunctions for the inferior planets; at opposition, for the superior planets.

TIDES AND TIDAL WAVES.

r is not possible within the limits assigned to
t article to enter minutely into all the causes
vch produce the complex phenomena of the
rs, though the most prominent factors may
lexplained without having recourse to the
her mathematics necessary to a full compre-
sion of this difficult subject.

he Newtonian law of gravitation teaches us
hat every particle of matter in the universe
acts every other particle, with a force varying
ersely as the square of their mutual distances,
directly as the mass of the attracting particle."
ppose the Earth to be a sphere covered by a
of uniform depth, and the Earth and Moon
tively at rest, then the layer of water
nediately under the Moon will be attracted
re per unit of mass than the Earth, and
ped up towards the Moon; the layer of
er on the opposite side of the Earth will be
acted less than the solid Earth per unit of
s: being further off, the water here will be
ped up away from the Earth and Moon.
these opposite places there will be high
er, though in this latter case not quite so
h as in the former. The sea will thus have
y nearly the form of a prolate spheroid,
h the major axis passing through the Earth
Moon. At places situated on a circle 90°
m the major axis there will be low water.
s the Moon revolves around the Earth, and
Earth rotates on its axis, this figure never
time to perfect itself, and an imperfect form
it travels round the Earth in a lunar day,
ch is longer than a civil day by about
minutes. So that high water occurs, generally
aking, about that time later at the same place
h day.

esides the Moon, the Sun exerts a considera-
le disturbing force, producing tides exactly
ilar to those produced by the Moon, but
ller in effect, for although the mass of the
n is immensely greater than that of the Moon,
his distance from the Earth is such that the
io of his tide-producing force to that of the
on is as 1 to 2¼. The observed tide, there-
, is the effect of the superimposed lunar and
ar tides. Calculation shows that the difference
ween the major and minor axes of the spheroid
e to the Moon alone amounts to 58 in., and
ording to the ratio above would make the same
erence due to the Sun alone about 25¼ in.

he following heights of tides on the Thames,
h the distance of their respective stations from
mouth of the river, are from *Phil. Trans.*
ciii. 204):—

	Height.	Distance.
	ft. in.	m.
ndon Docks	18 10	60
ney	10 2	67½
w	7 1	73
hmond	3 10	76
dlington	1 4½	79

he lunar tides, according to the results of
ent investigation, are by friction slowly inter-
ing with the Earth's rotation, and therefore
gthening our day. This must go on through
ntless centuries till the Earth's time of rota-
n is equal to a lunation, when the lunar tides
l no longer exist, and our seas be disturbed
y by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of a year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of Summer and Winter: giving long days and Summer to the Northern Hemisphere when the Sun is North of the Equator, and short days and Winter when South of it.

From Spring, through Summer to Autumn, the Sun traverses exactly one-half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit and the Law of Areas—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. The Earth when farther from the Sun, as at the Summer Solstice, must move more slowly than at the Winter Solstice; because then the line joining the two bodies is longer. The effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of Stars, is one situated in the constellation Cetus, and known by the name of o Ceti, or Mira Ceti. It has a period of nearly 331·6 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. Quite recent observations seem to show that this Star has now settled down to the 8th magnitude, after having exhausted its changes of magnitude. It will be found in R.A. 2*h.* 14*m.* 51*s.* and South Declination 3° 23′.

Another remarkable Variable Star is Algol, β Persei. This has a very short period—not quite three days—and has a range of magnitude from 2·2 to 3·7. On page 80 will be found a history of this Star, and the times of minima throughout the year.

U Ophiuchi varies from the 6th to the 6¼ magnitude, with a period of 20*h.* 8*m.* It may be observed in June, southing about midnight on

the 9th. Will be found in R.A. 17*h.* 11*m.* 59*s.* and North Declination 1° 19′.

The Variable Star β Lyræ is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. 18*h.* 46*m.* 47*s.* and North Declination 33° 15′. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this Star.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5½ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R.A. 22*h.* 25*m.* 51*s.* and North Declination 57° 57′. August and September are the best months in which to observe it.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages.

The observation of the state of the sky taught the meteorologists of early times when to expect variations in the weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, warning of changes in the weather may be obtained. Among other instances, it is observed that sea birds, as stormy weather comes on, fly inland in search of food; wild fowl leave the marshy grounds for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees.

It was not until the discovery of the barometer, in 1643, that the first great step was made towards a knowledge of the nature of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aërial ocean which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer, for showing the amount of moisture it contained, and the anemometer, for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from as many stations as he desires the height of the barometer, direction and force of wind, &c., data

which will inform him of the condition and movements of the aërial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the weight or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to predict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and as such will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

The extended use of the telegraph, due to the introduction of wireless telegraphy on board ships, especially on the great liners between Great Britain and America, has already done much, and will probably do still more in the future, to improve our means for forecasting the weather.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from that point of intersection of the Equator and Ecliptic known as the Vernal Equinox. In the time of the ancient astronomers this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation, and is at present in the constellation Pisces. Modern astronomers, however, still speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian passing through the Vernal Equinox.

Since a well-regulated astronomical clock should show *0h. 0m. 0s.* when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate Mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated:—*From the given Right Ascension subtract the Sidereal time at the preceding Noon, and further diminish the result at the rate of 10 secs. an hour.* If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example:—At what time will Sirius South on March 15?

R.A. of Sirius + *24h.*	*6h. 41m. 13s.*
Sidereal time at Mean Noon (sub.)	*23h. 27m. 53s.*
	7h. 13m. 20s.
Diminish by the Acceleration for *7h. 13m. 20s.* at 10*s.* per hour	*1m. 12s.*
Approximate Mean time of Southing, March 15	*7h. 12m. 8s.*

In a similar manner the Sidereal time corresponding to any Mean time may be found by adding the Mean time to the Sidereal time at Noon of that day. As an example, let it be required to find the Sidereal time corresponding to *9h.* P.M. on September 15.

Sidereal time at Mean Noon	*11h. 33m. 19s.*
Mean time ..... (add)	*9h. 0m. 0s.*
	20h. 33m. 19s.
Add for Acceleration for *9h.* at 10*s.* per hour	*1m. 30s.*
Approximate Sidereal time September 15 at *9h.* P.M. ...	*20h. 34m. 49s.*

APPARENT DIMENSIONS OF SATURN'S OUTER RING, 1911.

The figures in the second and third columns of the preceding table give the apparent dimensions of Saturn's Ring as seen from the Earth, and refer to the outer limit of the outer Ring. The sign + signifies that the northern surface will be visible, and − the southern surface. The Ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the Ring.

The figures in the fifth and sixth columns represent respectively the illuminated portions of the discs of Mercury and Venus.

GREENWICH OBSERVATORY.

John Flamsteed (a *protégé* of Sir Jonas Moore, the mathematician, and of Sir Christopher Wren, the architect) was appointed "Astronomical Observator" by Charles II., the royal warrant being dated 4 March, 1675. A building was hastily run up on the summit of a hill in Greenwich Park from the designs of Wren at the cost of £520, realised in those impecunious times by the sale of some spoilt gunpowder. Flamsteed, whose name has been given to the hill where the Observatory stands, was ordained at Easter, 1675 (no doubt with a view to the extension of his knowledge of the heavens), and took up his residence at the Observatory in July, 1676, where he commenced operations with an iron sextant, lent him by Sir Jonas Moore, at a salary of less than £100 per annum, with no allowances for instruments. In spite of these difficulties he reformed all existing systems of astronomy, and, although deprived of his sextant by the Royal Society at his patron's death, continued his observations with improvised or purchased instruments. He died on 31 Dec., 1719, at the age of 73. In the total period of 237 years between the appointment of Flamsteed and the resignation of Sir William Christie there have been only eight occupants of the post, the average tenure being nearly 30 years, the maximum being 46 years (Maskelyne and Airy) and the minimum 3 years (Bliss).

ASTRONOMERS ROYAL.

Sir William Henry Mahoney Christie, K.C.B.	1881
Frank Watson Dyson	1910

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12′ in summer and 7′ in winter. The needle occupies its mean position about 10*h*. a.m., and again about 6*h*. p.m., throughout the year. It reaches its most westerly position about 2*h*. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of sun-spots across the sun's central meridian.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.

The Variable Star Algol (Beta Persei).

THIS is one of the most conspicuous and noteworthy variable stars in the heavens. The first definite record of its discovery is by Montanari, in 1669, and the accurate determination of its period was not effected until 1782 by Goodricke. At that time the star passed through all its gradations of brilliancy in 2*d*. 20*h*. 48*m*. 59*s*., but the period seems decreasing, for Chandler has recently found it 8½ seconds less. The star is usually a little fainter than 2nd mag., and remains so for about 2*d*. 11*h*., when it rapidly declines in lustre, and in about 4½ hours arrives at a minimum of 3¾ mag. There is then a revival of its brilliancy, and in 5½ hours it reaches its normal magnitude of 2¼. The following are the computed times of minima in 1911. Astronomical time is employed in the table.

HE following is a summary of the more promi-t and interesting astronomical objects and currences visible during the year. The in-mation is intended as a guide to that ever-reasing band of amateur observers who onsider the heavens." We have only at-apted to describe such events as are capable eing definitely predicted. There are various ats and wonders presented in the firmament ich do not admit of being foretold with uracy. Among the latter class of objects may included large Sun-Spots, displays of Auroræ eales, bright Comets, New Stars, and brilliant teors or Fireballs.

ECLIPSES IN 1911.

the year 1911 there will be four Eclipses, of the Sun, and two Penumbral Eclipses of Moon.

A Total Eclipse of the Sun, April 28–29, sible at Greenwich. Begins on the Earth erally on April 28, at 7h. 49m. morn., in longi-e 161° East of Greenwich, and latitude 32° h. Central Eclipse begins generally on il 28, at 8h. 46m. aft., in longitude 149° East Greenwich, and latitude 37° South. Central ipse ends generally on April 29, at 0h. 9m. n., in longitude 90° West of Greenwich, and titude 11° North. Ends on the Earth generally April 29, at 1h. 6m. morn., in longitude 103° st of Greenwich, and latitude 16° North. he line of Central Eclipse lies across the th and South Pacific Oceans.

t Adelaide, a Partial Eclipse is partly visible, s on April 29 at 7h. 12m. morn., Standard n Time, 194° from the vertex towards the t. Magnitude of Eclipse = 0·89.

he Sun rises at 6h. 51m. morn.

t Melbourne, a Total Eclipse is partly visible ng its partial phase; magnitude = 1·01. s on April 29 at 7h. 44m. morn., Standard n Time, 190° from the vertex towards the

he Sun rises at 6h. 59m. morn.

t Sydney, a Partial Eclipse is partly visible; nitude = 0·95.

test Phase .....29d. 6h. 46m. morn. } Standard

, 192° from the vertex towards the East.

he Sun rises at 6h. 28m. morn.

t Wellington, New Zealand, a Partial Eclipse sible; magnitude = 0·61.

ns .....29d. 7h. 28m. morn. } Standard
test Phase.....29d. 8h. 25m. morn. } Mean
s .....29d. 9h. 28m. morn. } Time.

first contact occurs 36° from the vertex rds the East, and last contact 182° towards East.

A Penumbral Eclipse of the Moon, May 13, y visible at Greenwich:

t contact with Penumbra ..... 3h. 46m. morn. } Green-
lle of the Eclipse ... 5h. 57m. morn. } wich
contact with Penumbra..... 8h. 7m. morn. } Mean Time.

he first contact takes place 65° from the h point of the Moon's limb towards the ; the last contact 337° towards the East.

Greenwich the Moon sets at 4h. 7m. morn.

. An Annular Eclipse of the Sun, October 2 visible at Greenwich. Begins on the Earth r rally at 1h. 20m. morn., in longitude 75° East o reenwich, and latitude 38° North. Central Eclipse begins generally at 2h. 26m. morn., in longitude 60° East of Greenwich, and latitude 45° North. Central Eclipse ends generally at 6h. 1m. morn., in longitude 178° East of Greenwich, and latitude 8° South. Ends on the Earth generally at 7h. 7m. morn., in longitude 162° East of Greenwich, and latitude 15° South.

At Bombay, a Partial Eclipse is visible: magnitude = 0·33.

Begins .....22d. 7h. 10m. morn. } Standard
Greatest Phase ...22d. 8h. 4m. morn } Mean
Ends .....22d. 9h. 3m. morn. } Time.

First contact occurs 56° from the vertex towards the East, and last contact 148° towards the East.

At Madras, a Partial Eclipse is visible; magnitude = 0·28.

Begins .....22d. 7h. 22m. morn. } Standard
Greatest Phase .....22d. 8h. 17m. morn. } Mean
Ends .....22d. 9h. 17m. morn. } Time.

First contact occurs 66° from the vertex towards the East, and last contact 147° towards the East.

At Hong Kong, a Partial Eclipse is visible; magnitude = 0·83.

Begins .....22d. 9h. 52m. morn. } Standard
Greatest Phase ...22d. 11h. 24m. morn. } Mean
Ends .....22d. 1h. 5m. aft. } Time.

First contact occurs 353° from the vertex towards the East, and the last contact 121° towards the East.

At Perth, West Australia, a Partial Eclipse is visible; magnitude = 0·02.

Begins .....22d. 0h. 58m. aft. } Standard
Greatest Phase .....22d. 1h. 16m. aft. } Mean
Ends .....22d. 1h. 30m. aft. } Time.

First contact occurs at 242° from the vertex towards the East, and the last contact 271° towards the East.

At Adelaide, a Partial Eclipse is visible; magnitude = 0·28.

Begins .....22d. 2h. 26m. aft. } Standard
Greatest Phase .....22d. 3h. 15m. aft. } Mean
Ends .....22d. 4h. 0m. aft. } Time.

The first contact occurs at 227° from the vertex towards the East, and the last contact 301° towards the East.

At Melbourne, a Partial Eclipse is visible; magnitude = 0·12.

Begins .....22d. 3h. 11m. a.t. } Standard
Greatest Phase .....22d. 3h. 50m. a.t. } Mean
Ends .....22d. 4h. 26m. aft. } Time.

The first contact occurs at 232° from the vertex towards the East, and the last contact 291° towards the East.

At Sydney, a Partial Eclipse is visible; magnitude = 0·25.

Begins .....22d. 3h. 1m. aft. } Standard
Greatest Phase .....22d. 3h. 55m. aft. } Mean
Ends .....22d. 4h. 44m. aft. } Time.

The first contact occurs at 223° from the vertex towards the East, and the last contact 307° towards the East.

At Wellington, New Zealand, a Partial Eclipse is visible; magnitude = 0·01.

Begins .....22d. 5h. 22m. aft. } Standard
Greatest Phase .....22d. 5h. 28m. aft. } Mean
Ends .....22d. 5h. 35m. aft. } Time.

The first contact occurs at 247° from the vertex towards the East, and the last contact 259° towards the East.

IV. A Penumbral Eclipse of the Moon, November 6, partly visible at Greenwich.

	Mean Time at Greenwich.
First contact with Penumbra	6*d.* 1*h.* 40*m.* aft.
Middle of Eclipse	6*d.* 3*h.* 37*m.* aft.
Last contact with Penumbra	6*d.* 5*h.* 34*m.* aft.

The first contact with the Penumbra occurs at 112° from the North point of the Moon's limb towards the East, and last contact 202° towards the East. The Moon rises at Greenwich at 4*h.* 15*m.* aft.

V. Eclipses of Jupiter's Satellites.

The following table contains *all* the Eclipses of the first Satellite, and only *those that are visible at Greenwich* of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D. and R. signifying respectively Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D. or R. in the second column.

At the beginning of the year, and until May 1, the disappearances and reappearances take place on the Western side of the Planet; from May 1 to October 20, on the Eastern side; from October 20 to the end of the year, on the Western side. In the astronomical telescope, which inverts the image, the Western side of the Planet will be on the left hand and the Eastern on the right, in the Northern hemisphere.

The mean time for any other place than Greenwich may be found by applying to the times given in the following table the difference of longitude, adding if the longitude of the place is *East* of Greenwich, and subtracting if *West*.

The angle from the vertex is measured from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360°.

THE SUN.

The Sun.—Sun-spots are most abundant at tervals of about eleven years, with intervening mes of minima. They usually lie along zones ot far N. and S. of the Equator, and transit the olar disc in about 13½ days. The spots should e carefully examined when near the limb, or dge, of the Sun's disc, for various modern ob-rvers question the view that they represent avities in the Sun's envelopes. When the imensions of a solar spot reach one minute f arc, it may be considered large enough to e visible to the naked eye, when the latter is rotected by a dark glass, and the Sun near the orizon and therefore not so intensely brilliant.

THE MOON.

The Moon.—Our beautiful satellite, of all elestial objects, affords the most interesting sc for the study of amateurs. Contrary to early all the other orbs of our system, we can ally observe her actual surface. Crater-pits, ng-plains, and "seas" stand out with all the harpness of a steel engraving and form a icture of surpassing loveliness, and this even in he smallest telescopes. The crescent Moon is y far the most attractive for study, as the bjects on the lunar surface show their dis-notive characters more readily at that phase, wing to the Sun shining upon them from a anting position and thus causing the moun-ins to cast dark shadows.

The full Moon is chiefly remarkable for show-g to advantage the wonderful system of streaks, white rays, of whose significance we have no owledge at present. The chief centres of these y-systems are the well-known ring-plains cho, Kepler, Aristarchus, Aristillus, and opernicus. By far the most extensive radiate m Tycho, a lunar volcano 54 miles in diameter d nearly 3 miles deep. Aristarchus is the ost brilliant crater on the Moon—so bright, in ct, that Herschel mistook it for a volcano in uption!

The Mare Imbrium is the largest of the dark eyish areas known as seas, and at its extreme wer (N.) edge lies the celebrated ring-plain ato. The diameter of Plato is 60 miles, and e walls average 3,800 feet, the loftiest peak ing nearly 7,300 feet.

MERCURY.

Mercury is not at all well placed for observa-n during most of 1911. The first favourable ngation will occur in April, when the planet ould be seen after sunset, near the western rizon, from about April 4 to 18. The time Mercury's setting and that of the Sun are ven in the calendar portion of this Almanack. nerally speaking, Mercury may be observed by naked eye when he sets over an hour and a lf *after* the Sun at the spring apparitions, and es over an hour and a half *before* the Sun at e autumn elongations.

Mercury will shine in the eastern sky before rise in September and during the first week October. The best time to observe him will from September 23 to October 7. The time rising will be found in the calendar of this nanack.

On an average Mercury can only be seen by the ked eye on about four evenings during the same parition in the spring, but on rare occasions ny more observations have been obtained.

It is often best to use an opera-glass when first looking for the planet, and the exact position with regard to other stars should carefully be noted, together with the time of rising (if seen in the morning) or setting (if seen in the evening), so that Mercury may not be mistaken for another star or *vice versâ*. He shines with a strongly sparkling light, like that of some of the stars when near the horizon, except when near elongation, at which time he often bears a strong resemblance to the steady yellow light of Jupiter. In the spring he should be looked for about ten days *before* the date of maximum E. elongation, and in the autumn for the same time *after* W. elongation. Although when at east elongation the planet is approaching the Earth he rapidly declines in brilliancy, because the illuminated portion of the disc becomes smaller as the phase gets more crescented.

His revolution period is 88 days, and, according to recent investigations, his axial rotation is nearly the same. His mean distance from the Sun is nearly 36,000,000 miles, and his diameter a little over 3,000 miles; he is therefore smaller than Titan, the largest of Saturn's satellites, and Ganymede, the largest of Jupiter's family. His speed of motion varies from 23 to 35 miles per second. Telescopically he presents a somewhat mottled disc, but very few definite shadings have been noticed, though those glimpsed seem more conspicuous and permanent than those on Venus.

VENUS.

Venus.—When viewed through a telescope at the time of her greatest brilliancy Venus appears as a beautiful crescent, like the Moon when about 3½ days old; though, of course, the markings sometimes seen on her disc are very faint and cloud-like owing to her extreme brilliancy and the dense atmosphere by which she is surrounded. As she approaches her inferior conjunction with the Sun she becomes more crescented, just as the Moon does when new; she is therefore not so conspicuous, though her real diameter is more than when at greatest brilliancy. The revolution period is 224 days 16 hours 49 minutes, but her rotation period is still unknown, though it is supposed by many well-known astronomers to be about the same as that of the Earth. Her mean distance from the Sun is 67,000,000 miles, and her diameter 7,500 miles. Her albedo (light-reflecting capacity) is very great, being about 65, whilst that of clouds is 72.

MARS.

Mars.—As Mars is at opposition to the Sun on November 25, the last three months of the year will be the best for the study of his interesting surface-markings. At this time he is very well situated, being visible throughout the night; his diameter having increased from 4·91″, in March, to 18·32″ in the middle of November. This, again, shrinks to 13·48″ by the end of the year.

The diameter of Mars is 4,200 miles, his revolution period is 687 days, and his rotation period 24 hours 37 minutes. Mars has two satellites, discovered by Prof. Asaph Hall on August 11 and 17, 1877, but both are too faint to be glimpsed except in the very largest telescopes. Deimos, the outermost, revolves in 30 hours 18 minutes; and Phobos, the larger, and nearer the planet, takes only 7 hours 39 minutes, or less than ⅓ the time of rotation of its primary.

MINOR PLANETS.

Ceres came to opposition on October 9, 1910. Her position at the commencement of 1911 is on the Equator, 7° N.W. of θ Ceti. Her magnitude is only about 8½ until the end of October and during November and December, when she brightens to magnitude 7. In conjunction with the Moon on November 12 at 1 A.M. (Ceres 48′ S.). At the end of the year she is in Cancer, about 7° E. of Pollux (β Geminorum) and 5° N.N.W. of γ Cancri, and should be seen by the aid of a telescope in the late evening. Ceres is the largest of the planetoids, her diameter being 477 miles. She was discovered by Piazzi in 1801.

Pallas is at opposition to the Sun on November 13, 1911, being 8th magnitude at the time. Her diameter is about 304 miles.

Juno is in conjunction with ζ Virginis on March 5 (Juno 2° 46′ S.), and at opposition to the Sun on April 5, her magnitude being 8·65. On that date she is in Virgo, midway between ζ and δ Virginis—*i.e.*, 5° E.S.E. of δ and 5° W.N.W. of ζ. In very close conjunction with δ Virginis on May 2, when the planetoid will be slightly N. of the star. Diameter, 120 miles.

Vesta, the brightest of the planetoids, does not attain maximum brilliancy this year. She was at opposition to the Sun in October, 1910, so can be best observed during January and February, 1911, when she is between the 7th and 8th magnitude. On January 1 she is in conjunction with α Piscium, in the S.E. region of Pisces (Vesta 2° N.). On February 8 she is in conjunction with ξ^2 Ceti (Vesta 1° N.). At the end of February she is in the extreme S. of Aries, 2½° N.E. of μ Ceti. In conjunction with the Moon on December 11 at 11 A.M. (Vesta 0° 28′ S.). Her diameter is 239 miles, and her light-reflecting capacity very great.

JUPITER.

Jupiter.—At the beginning of 1911 Jupiter is in Libra, 4° W.N.W. of α Libræ.

As he is at opposition on May 1, he is most favourably situated for study during April, May, and June. On May 1 he is again 4° W.N.W. of α Libræ.

Jupiter's revolution period is 11·86 years, at a mean distance from the Sun of 483,000,000 miles. Polar diameter is 84,570 miles, equatorial diameter 90,190 miles. Under propitious circumstances Jupiter comes within 369,000,000 miles of the Earth.

The marking known as the great Red Spot will be nearly central on Jupiter's disc on the following dates :—

Jan. 24	at 6.29 a.m.	June 11	at 8.3 p.m.
Feb. 24	,, 7.4 a.m.	,, 13	,, 9.41 p.m.
Mar. 16	,, 11.25 p.m.	,, 15	,, 11.19 p.m.
,, 19	,, 1.3 a.m.	,, 18	,, 0.58 a.m.
,, 21	,, 2.41 a.m.	July 14	,, 10.20 p.m.
April 14	,, 10.16 p.m.	,, 16	,, 11.59 p.m.
,, 16	,, 11.54 p.m.	,, 19	,, 1.38 a.m.
,, 19	,, 1.32 a.m.	Aug. 10	,, 7.46 p.m.
,, 21	,, 3.10 a.m.	,, 12	,, 9.25 p.m.
May 13	,, 9.8 p.m.	,, 14	,, 11.4 p.m.
,, 15	,, 10.46 p.m.	Sept. 10	,, 8.32 p.m.
,, 17	,, 12.24 p.m.	,, 12	,, 10.11 p.m.
		,, 14	,, 11.50 p.m.

At intervals of 12 days (which include 29 rotations) the Red Spot Hollow becomes central on Jupiter's disc at nearly the same time as before. So that should the observer see it central at any special date and time he can calculate its next transit by adding $9h.\ 55m.\ 40s.$, which is the mean rotation period. Its position is in the southern equatorial belt, just above the central white zone running across the planet's disc.

Jupiter's Satellites.—Satellite IV. (Callisto) will not transit or be eclipsed during this year.

Satellite III. (Ganymede), the largest and most brilliant of Jupiter's moons, will cross the disc of the planet on the following dates :—

Jan. 16.	Ingress 3.37 a.m.,	egress	5.8 a.m.
Feb. 28.	,, 3.26 a.m.	,,	4.23 a.m.
Apr. 11. (shdw.)	,, 10.15 p.m.	,,	11.56 p.m.
,, 12.	,, 0.34 a.m.	,,	1.14 a.m.
May 24.	,, 8. 6 p.m.	,,	9.21 p.m.
,, 24. ,,	,, 10. 7 p.m.	,,	11.45 p.m.
,, 31.	,, 11.26 p.m.	,,	12.47 a.m.
June 1. ,,	,, 2. 7 a.m.	,,	not visible.
July 6. ,,	,, 10. 3 p.m.	,,	11.40 p.m.
,, 13.	,, 8.56 p.m.	,,	10.45 p.m.
Aug. 25.	,, 9. 1 p.m.	,,	not visible.
Sept. 30.	,, 6.32 p.m.	,,	,,

Only Satellite IV. will be visible at about midnight on May 31, as Satellite I. is occulted and eclipsed, and Satellites II. and III. are in transit.

SATURN.

Saturn is stationary on January 3 in the extreme S. of Aries, 7° N. of α Piscium. He may be seen in the evening, as he is due S. at 7.13 P.M. and does not set until 2.7 A.M. on January 1. At quadrature to the Sun on January 21. As he is in conjunction with the Sun on May 1, not much will be seen of him during April, May, and the early part of June.

The best time to observe Saturn will be near the date of his opposition to the Sun on November 10, when he will rise at sunset and be visible all night. His position is some way to the S.W. of the Pleiades and W. of the Hyades.

Saturn's revolution period is 29½ years, and his rotation 10 hours 14 minutes 24 seconds : the equatorial diameter being 76,470 miles, or nearly nine times that of the Earth : he is, therefore, the second largest planet in our solar system.

Viewed through a telescope, the globe of Saturn shows a few belts and occasional light and dark spots ; but these do not change with such rapidity as those on Jupiter. Saturn has ten satellites, several of which are visible in telescopes of low power. The names and revolution periods are as follows :—

	D.	H.		D.	H.
I. Mimas	0	22·6	VI. Titan	15	23
II. Enceladus	1	8·9	VII. Hyperion	21	7
III. Thetys	1	21 3	VIII. Iapetus	79	22
IV. Dione	2	17·7	IX. Phœbe	546	12
V. Rhea	4	12·5	X. Themis	20	20

The orbital motion of Phœbe is retrograde—that is, like the hands of a watch—and therefore contrary to the other satellites of the planet. Titan, the largest, is about 1⅓ times the size of our moon, and Iapetus about the same as our satellite. Titan is at greatest distance E. or W. of Saturn on the following dates :—

W. elongation.	D.	H.	E. elongation.	D.	H.
Jan. 2	9·6		Jan. 2	10	
,, 18	8·4		,, 26	9	
Feb. 3	8·1		Feb. 11	9	
Sept. 15	9·8		,, 27	9	
Oct. 1	7·7		Oct. 9	8	
,, 17	5·5		,, 17	5	

URANUS.

Uranus.—The best time to observe Uranus is ar the time of his opposition to the Sun on ay 21, for on that date he rises at sunset d is visible throughout the night. It may possible for an exceptionally keen-sighted erver to glimpse him with the naked eye, as is then about the 6th magnitude. In a large escope and with a high power Uranus shows small and faintly belted disc. His four ellites are only visible in very powerful ruments Their names are Ariel, Umbriel, nia, and Oberon.

Uranus was discovered by Herschel in 1781. revolution period is over 84 years; but the ation period is still unknown. His diameter is ut 32,000 miles; and his distance from the Sun ies from about 1,702,000,000 to 1,868,000,000 es.

NEPTUNE.

Neptune, the most distant of the planets, is in ini during the whole year. His position on uary 1 is 4° E.S.E. of δ Geminorum and ut the same distance S.W. of κ. The best e to observe him is near the date of his osition to the Sun on January 11, when he s at sunset and is above the horizon all night. ng to his vast distance from the Earth he only be seen by the aid of powerful tele- es, and even then his disc is too small to w any surface-markings, though a few belts e been suspected. His satellite, though ally very large, is, of course, quite beyond reach of ordinary instruments.

he diameter of Neptune is about 35,000 miles, revolution period is 165 years, and his rota- period is unknown. The Sun as seen from tune would only appear as a brilliant star. tune was first detected visually by Dr. Galle, erlin, in 1846, not a degree from the place dicted by Le Verrier. Dr. Galle died in July,

COMETS.

Comets.—The majority of comets appear to olve in parabolic orbits or in such greatly ex- ed ellipses that they exhibit little deviation the parabola, and to have very long periods evolution. In fact, a proportion of these es have periodic times amounting to y thousands of years, and in a few instances undreds of thousands of years. Comets be- ing to the class revolving around the Sun in paratively limited times are in the minority, our knowledge of them is constantly on the ease. One well-known family of comets is wn as the Jovian group, as the more remote ion of their paths lies near the orbit of ter, and this great planet is supposed to materially brought about this arrangement owerful attraction exercised upon them in ages.

e small periodical comets, numbering about embers, and revolving around the Sun in ods differing from 3 to 9 years, are entitled pecial interest from the well-known char- r of their orbits and the fact that they be re-observed again and again simi- to the planetary members of the solar m. The majority of these short-period ets extend their flights to a little distance ide the path of Jupiter, and approach the to about the average distance of Mars.

It appears that though new comets of short period are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible), there are others which meet with disturbances in pursuing their paths sufficiently forcible to endanger, if not to terminate, their visible existences. Biela's double comet has not reappeared during the last half a century, and its material seems to have been distributed into a stream of November shooting stars. As an example of the increase in the number of known periodical comets, it may be stated that during the 17 years from 1788 to 1896 no less than 16 new comets of short period were discovered. The following table includes details of some of the best-known comets which are predicted to return during the ensuing few years:—

Date of Return.	Period in Years.	Name of Comet.
1911. January	7·101 ...	Brooks (1886).
March	7·390 ...	Faye.
August	3·300 ...	Encke.
1912. March	6·823 ...	Wolf.
December ...	6·400 ...	De Vico-Swift.
1913. January	13·667 ...	Tuttle.
March	6·874 ...	Holmes.
March	6 556 ...	Finlay.
1914. November ...	5·678 ...	Tempel-Swift.

In some cases the circumstances will be unfavourable, and the objects will probably escape observation at their next passage through perihelion, but the majority of those included in the list will doubtless return at the computed times, and be suitably observed. It forms a most entertaining branch of astronomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, so that in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by observers who are fortunate enough to discover them and give warning of their appearance before they have visibly developed the conspicuous features which belong to comets of the largest class.

A peculiar interest attaches to Encke's Comet, from the fact that at each return to perihelion its period of revolution was found to be continually diminishing, which led Encke to suspect that it encountered some resisting medium in space. The action of Jupiter alone, causing sometimes acceleration, and at other times retardation, fails to account for the gradually diminishing periodic time.

Halley's Comet was discovered, at this 1910 return, by Dr. Max Wolf, of Heidelberg, on September 11, 1909, when it was an exceedingly faint object. It was not until the end of April and during May, 1910, that it became visible to the naked eye from Greenwich. As seen from certain parts of America and tropical countries it was a very fine sight, but the British Isles were not at all favoured, the strong twilight, haze, and cloudy weather all dimming the comet's lustre. It could not for a moment compare with the great "Daylight Comet" of January, 1910, which rivalled Venus in brilliancy, and at one time had a tail well over 30° long to the unaided vision. The greatest length of the tail of Halley's Comet, as seen from England,

appears to have been about 12°, but from America over 107°, therefore we must blame our climate and not the comet for its failure to come up to our expectations. On October 22, 1909, a photograph of the spectrum of the comet was obtained at the Lick Observatory with a Slitless spectrograph on the Crossley reflector, after an exposure of two hours. It showed a continuous spectrum, extending from about λ 3,750 to λ 5,000, without the bright lines or bands usually seen in comet spectra. Similar observations at Mount Hamilton, taken early in December, 1909, showed a background of a faint continuous spectrum with condensations of light towards the ultra-violet end, with two bands which appeared to agree with those observed in Morehouse's Comet, and which were ascribed to cyanogen and nitrogen. At the end of December the light of the comet was mainly owing to the third cyanogen band. The researches of Prof. Fowler in this direction seem to show that the tails of comets consist of gas at a low pressure.

METEORIC SHOWERS.

Meteoric Showers.—Fireballs, meteors, shooting stars, or falling stars, as they are differently called, represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form impressive showers. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. It is not to be expected, however, that this particular system of falling stars will again show itself prominently until the years 1933 to 1937. The meteors return numerously every 33¼ years, but it appears that just before their last visit the planet Jupiter disturbed their orbit so much that the main collection of meteors was enabled to avoid encountering the Earth, and the observed showers were more scanty than usual. But some of the meteors are visible every year at the middle of November, and furrow the morning sky with their rapid flights and luminous streaks. This meteoric system appears to be identical with, and its material actually derived from, a periodical comet, which was discovered by Tempel in December, 1865. In November, 1911, very few of these Leonid meteors are expected in our skies, but observers should maintain an attentive watch for them at the important time. The maximum date is usually the morning of November 15 or 16, but it varies a little owing to leap year. Whenever any conspicuous meteors are seen, whether during a rich shower or on an ordinary night, their paths amongst the stars should be carefully and accurately recorded. The same advice applies to occasional fireballs, which often shine suddenly and startle spectators by lighting up the heavens very vividly for two or three seconds. Observers should always remember that mere descriptions of the brilliancy or general situation of these phenomena are practically useless for scientific purposes. What is required by those who critically discuss such observations relates specially to the exact path of the object in the heavens and to the duration of its visible flight. The following is a table of the radiant points of some of the more prominent meteoric streams visible during the year :—

No.	Epoch.	Radiant Point. R.A.	Radiant Point. Dec.	Name of Shower.
		°	°	
1	January 2–4 ...	230	+53	Quadrantids.
2	January 11	220	+13	ζ Bootids.
3	January 14–17...	295	+53	κ Cygnids.
4	Feb. 5—23.....	75	+41	α Aurigids.
5	February 20.....	263	+36	ρ Herculids.
6	March 1–4	166	+ 4	γ Leonids.
7	March 13—24 ...	161	+58	β Ursids.
8	April 12–24 ...	208	−10	α Virginids.
9	April 17—22 ...	218	−31	Hydrids.
10	April 20—22 ...	271	+33	Lyrids.
11	May 1—6	338	− 2	γ Aquarids.
12	May, June, July	253	−21	α Scorpiids.
13	May 7—18.....	237	+27	α Coronids.
14	May 24—27	194	+58	ε Ursids.
15	May 26—31	310	+80	κ Cepheids.
16	May 30—June 4	333	+27	η Pegasids.
17	June and Aug.	312	+61	α Cepheids.
18	June 10—28.....	335	+57	δ Cepheids
19	June—Aug.	302	+24	η Sagittids.
20	July 6—Aug. 22	284	−13	λ Aquilids.
21	July—Aug.	269	+48	γ Draconic.
22	July 6—Aug. 16	315	+48	α Cygnids.
23	July 15—28	304	−10	α Capricornids.
24	July—Aug.	280	+57	b Draconids.
25	July—Oct.	30	+36	β Triangulids.
26	July 23—Aug. 4	47	+43	α–β Perseids.
27	July 25—30	339	−11	δ Aquarids.
28	July—Aug.	339	−27	α Pisces Aus.
29	August 10—12...	45	+57	Perseids.
30	August 5—16 ...	292	+53	κ Cygnids.
31	Aug.—Sept. 16	353	−11	ψ Aquarids.
32	Aug. 12—Oct. 2	74	+41	α Aurigids.
33	August 15—25...	291	+60	o Draconids.
34	Aug. 21—Sep. 21	62	+37	ε Perseids.
35	Aug. 20—Sep. 10	334	+72	β Cepheids.
36	Sept. and Nov.	64	+22	ε Taurids.
37	September 27 ...	75	+15	o Orionids.
38	October 3—4 ...	133	+79	Camelopardids.
39	October 8—16 ...	44	+58	η Perseids.
40	October 11—24...	40	+20	ε Arietids.
41	October 17—24...	92	+15	Orionids.
42	October.....	100	+13	ξ Geminids.
43	Nov. 2—3	55	+ 9	ε Taurids.
44	Nov. 13—15	150	+23	Leonids.
45	Nov. 13—28	155	+40	Leo Minorids.
46	Nov. 17—23	25	+43	Andromedids.
47	Nov. 23—Dec. 1	193	+73	χ Draconids.
48	Nov. 30—Dec. 9	162	+58	β Ursids.
49	Dec. 1—14.....	108	+33	Geminids.
50	Dec. 7—10.....	119	+29	α Geminids.
51	Dec. 22—29	194	+32	Canis Venaticids

The Perseids (No. 29 in the foregoing list) display some singular characteristics, for they probably continue visible for more than a month, during which period their radiant point exhibits a diurnal motion of about 1° to the E.N.E. The places of this radiant on alternate days during about four weeks of the chief activity of the shower are as follows :—

DATES AND POSITIONS OF PERSEID RADIANT.

Date.	Radiant R.A.	Radiant Dec.	Date.	Radiant R.A.	Radiant Dec.
	°	°		°	°
July 19	18·9	+50·5	Aug. 4	36·4	+55·5

Telescopic Powers Suitable for Observing Celestial Objects.

Comets, and large nebulæ such as those in Orion and Andromeda, require very low powers and extensive fields of view, so that the objects may be viewed in their entirety, and their light efficiently concentrated to display the fainter portions. If it is decided to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector. The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers from 60 to 100, reveals the solar markings in detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with 50 and 75, though, for features of small extent, powers of 300 and 400 are necessary on a 10 or 12-in. glass. Solar and lunar eclipses are best visible under low powers, with fields sufficiently ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 50 or 200, but the air must be steady and the object not very near the horizon; those of Venus stand plain with far less power. These planets appear under the most satisfactory aspect near the period of sunrise or sunset, and indeed all observations of conspicuous planets are best made at such times. When the image is surrounded with dark sky the glare from a bright object is sometimes troublesome, for it is apt to aggravate telescopic defects and obliterate faint details.

The chief spots on Mars, such as the *Syrtis Major* and *Acidalium Mare*, may be distinguished with 90 on a 2-in. refractor, but powers of 300 to 350 and an 8-in. refractor or 10-in. reflector are desirable to exhibit the outlines of the darker, narrower markings, many of which are delicate streaks and spots requiring very sharp definition as well as ample magnification.

Jupiter's equatorial belts are perceptible in a 3-in. telescope, power 40, but for studying their variable appearances and the different velocities of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The latter has successfully employed 1540 with a 12½-in. reflector on Jupiter, but found no advantage over powers of 200 to 440. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and powers of 120 or 150.

Saturn and Mars usually appear well defined under higher powers than Jupiter. The division in Saturn's ring and his principal dark belt are to be readily glimpsed, when the globe is sufficiently inclined, with a 2½-in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. A good 4½-in. refractor will occasionally show Encke's division in the ring when this is visible, but at the best it is only a faint pencil-like marking; also the interior crape ring and five of the satellites; but the night must be good. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult, requiring careful scrutiny of the region just outlying the rings, where they will be usually recognised as tiny points of light.

In planetary work the observer will ultimately find it an advantage to accustom himself to one and the same power. If on special occasions or for particular purposes really high magnifiers are employed, they should be single lenses, as they possess a decided advantage in light and definition at the centre of the field.

Occultations of stars by the Moon may generally be well observed with a 3-in. glass, power 50 to 75.

For double stars the eye-piece required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eyepiece, power 25 or 30 and field about 1½°, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets, nebulæ, and parts of the Milky Way.

Standard Time, referred to the meridian of Greenwich, has been adopted for railways and other purposes in the countries mentioned in the following table:—

Country.	Central Meridian.	Fast or Slow on Greenwich Time.
Europe	15° E.	1*h.* fast.
Europe		
British S. Africa	30° E.	2*h.* fast.
Egypt		
Mauritius, &c.	60° E.	4*h.* fast.
Chagos Archipel...	75° E.	5*h.* fast.
India	82½° E.	5½*h.* fast.
Burma	97½° E.	6½*h.* fast.
Straits Settlements	105° E.	7*h.* fast.
Hong Kong	120° E.	8*h.* fast.
Siberia		
W. Australia...	135° E.	9*h.* fast.
Japan, Corea		

Country.	Central Meridian.	Fast or Slow on Greenwich Time.
South Australia	142½° E.	9½*h.* fast.
Victoria		
New South Wales	150° E.	10*h.* fast.
Queensland		
Tasmania		
New Zealand	172½° E.	11½*h.* fast.
Iceland	15° W.	1*h.* slow.
America.		
Atlantic	60° W.	4*h.* slow.
Eastern	75° W.	5*h.* slow.
Central	90° W.	6*h.* slow.
Mountain	105° W.	7*h.* slow.
Pacific	120° W.	8*h.* slow

Greenwich Time is used in Spain, Belgium, Gibraltar, and Faröe (Sheep Islands).

MEAN RIGHT ASCENSION AND DECLINATION OF ONE HUNDRED FUNDAMENTAL STARS, VISIBLE AT GREENWICH, FOR JANUARY 1, 1911.

α Cassiopeiæ, magnitude ranges from 2·2 to 2·8. δ Orionis, magnitude ranges from 2·2 to 2·7.
α Orionis, magnitude ranges from 1·0 to 1·4.

EXPLANATION OF THE ASTRONOMICAL TABLES.

Mean Right Ascension.

The Mean Right Ascension and Declination for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in the table. If the required date be earlier than 1911, the *signs* of the annual variations must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination means + and S. Declination −, and that the corrections must be added *algebraically*.

Configuration of Jupiter's Satellites.

This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites, those on the left hand being west of the Planet; a black circle is intended to show either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed) or else is behind the disc of Jupiter (occulted); the sign ☌ indicates that the Satellite in question is *on* the disc of the Planet.

Sidereal Time at Mean Noon.

This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or astronomical clock should show when the Mean Time clock points to Noon, and, in connection with the table on p. 75, serves to convert Mean Solar into Sidereal Time.

Mean Time at Sidereal Noon.

This column indicates the time which should be shown by the Mean Time clock when the first point of the sign Aries is on the meridian, or, in other words, when it is Sidereal Noon, and is useful for changing

α^1 Herculis, magnitude ranges from 3·1 to 3·9. β^1 Lyræ, magnitude ranges from 3·4 to 4·5.

Sidereal into Mean Solar Time with the help of the table on p. 76.

Following the Phases of the Moon on the first page of each month there will be found, as well as the *times* of Apogee and Perigee, the corresponding distances from the Earth to the nearest 100 miles.

The mean distance of the Moon from the Earth is 238,840 miles.

Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian" for the 5th and 20th days. This will be useful in determining time by the Dipleidoscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can be easily inferred with sufficient accuracy, the change in the apparent semidiameter being very slow.

Mean Right Ascension and Declination of some Fundamental Stars, Visible in the Southern Hemisphere, for January 1, 1911.

Name of Star.	Mag.	Right Ascension.	Annual Precess.	Declination.	Ann. Prec.
		H. M. S.	s.	° ′ ″	″

Gruis	1·9	22 2 37·7	+ 3·78	− 47 23 33	+ 17·5

η Argûs, magnitude varies from 1 to 7·5.

α Centauri.

It is supposed that this star, one of the brightest in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. Sir David Gill gave to it a parallax of 0·75″, which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS.

SIGNS OF THE ZODIAC.

♈ *Aries*, the Ram; ♉ *Taurus*, the Bull; ♊ *Gemini*, the Twins; ♋ *Cancer*, the Crab; ♌ *Leo*, the Lion; ♍ *Virgo*, the Virgin; ♎ *Libra*, the Balance; ♏ *Scorpio*, the Scorpion; ♐ *Sagittarius*, the Archer; ♑ *Capricornus*, the Goat; ♒ *Aquarius*, the Water-Bearer; ♓ *Pisces*, the Fishes.

ASTRONOMICAL DEFINITIONS.

THE time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

N. North; S. South; E. East; W. West.

h. hours; m. minutes of time; s. seconds of time; ° deg. of arc, or thermometer; ′ minutes of arc; ″ seconds of arc.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds—the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, certain of the Fixed Stars, and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena," on the third page of each month, are given the dates at which certain of these Occultations take place, with reference to the pages where details of each occurrence may be found. The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versâ* when viewed through an inverting or astronomical telescope. Stars to the sixth magnitude inclusive have been included in this summary.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

Rising, Setting, Right Ascension, and Declination of the Planets Uranus, Neptune, Ceres, Pallas, Juno, and Vesta, 1911, about the times of opposition, at Mean Noon of the respective dates.

URANUS.

ORGE III.	Grandson of George II.	1760	1820	81	59

Kings of Ireland.

HE line (or rather lines) of native sovereigns very long one; some Irish historians have ed the succession to about the period of the od, "before which time there were many nces," but, unfortunately, the records have not n preserved. According to Keating, the first ereigns after the Milesian Conquest, of whom re is any "absolute certainty," were Heber and emon, Milesian princes from Galicia in Spain, who conquered Ireland, and reigned jointly from the year 1300 B.C. till 1291, when Heremon alone ruled. Of their successors, who reigned from the year 1285 B.C. to the Christian Era, about 169 in number, only fifteen died comfortably in their beds; four died of the plague or some malignant distemper, the rest being assassinated, killed in battle, or dying other violent deaths.

The following is an "authentic list" of—

IRISH SOVEREIGNS AFTER THE BIRTH OF CHRIST.

	A.D.
raidhach-Fionfachtna—"a most just and ood prince"; slain by his successor	4
hadh-Fion—slain by his successor	24

Welsh Sovereigns and Princes.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301.

INDEPENDENT PRINCES, A.D. 840 to 1282.	
Roderick the Great	840
Anarawd, son of Roderick	877

Physicians in Ordinary, Sir J. Williams, Bt., M.D. ; A. J. R. Oxley, M.D.

Surgeon in Ordinary, Edgar Hoffmeister, M.B.

In broad sense this heading is commonly taken as identical with the one that follows; but there close upon 130 holders of titles of long-standing nobility who are not members of the Upper use of Parliament, their peerages being those of Scotland or Ireland only. But, as further plained below, there are about an equal number of Peers of those kingdoms who possess addi- nal titles which constitute them members of the Lords, these titles being in a majority of tances, though very far from all, inferior to those by which they are generally known. The full ails as to each are given under his leading title, and a reference is in every case supplied under other that he may hold, so that the table of equivalent titles formerly given in this work is no ger needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE COMPANIONAGE," pages 40–1.

THE HOUSE OF LORDS,

Magnum Concilium of the early chroniclers, consists of the Spiritual Lords of England (the 2 bishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United dom, and of Representative Peers of Scotland and Ireland, together with such Scottish and h Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound d, or bankrupt. The *full* Assembly would consist of 3 Princes of the Blood Royal, 2 Arch- hops, 22 Dukes, 23 Marquesses, 123 Earls, 42 Viscounts, 24 Bishops, 348 Barons, and 16 Scottish and rish Representative Peers: total 631. See WHITAKER'S PEERAGE, page 22, for complete table, wing numbers of Life Peers, Minors, &c. There are also 14 Ladies who are Peeresses in their right, whose titles and names, along with those of Scotland, are given below at page 117. male succession may occur in the Imperial Peerage in any Barony of England which was ferred by writ of summons; but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special ainders" have been granted to female relatives in the absence of males. We use the term mperial" as including the three series of Peers of "England" (up to June 20, 1707), "Great ain" (thence till close of 1800), and "United Kingdom" (1801 onward).

SCOTTISH AND IRISH PEERS.

There are in all 86 Scottish Peers and 172 Irish, but of the total 258 there are 133 possessing perial titles and 129 without them. Of the 86 Scottish, 50 have Imperial titles and 16 are cted or re-elected every Parliament to sit in the Lords; and similarly of the 175 Irish 81 hold perial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are which are inferior to the native ones, 29 are superior, 12 are identical in rank but differing in signation, and 15 are absolutely the same. Of the 4 Scottish Peeresses cited on page 117, that Ifort is subject to a degree of doubt, so that the lady does not assume it. There are other lines the Scottish Peerage which are open to female succession, and this is not subject to abeyance as England. In the Irish Peerage, on the other hand, the only titles open to female succession the Massereene Viscounty and the La Poer Barony, the latter now held by the Marquess of terford. It will be observed that Ireland possesses a great advantage over Scotland in the ds as it does in the Commons, its native Peers who hold Imperial titles numbering, as just ted, 81 as against 50 of Scotland, and its elected Representative Peers 28 as against 16. An Irish r who holds no Imperial title has also the special privilege of being able to seek election to the mmons for any constituency not in Ireland itself.

Contractions.—*S.* or *I.* appended to the date of creation denotes a *Scottish* or *Irish* title; the her addition of a * implies that the Peer in question holds also an Imperial title, which is ified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both es are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies the Peer is an elected Representative to the House of Lords. For the mark ° see heading to quesses; *b.* signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *div.*, divorced; minor.

COMPLETE LIST OF THE PEERS.

NCES OF THE BLOOD ROYAL (3). *Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

	Eldest Son or Heir.
Edward Albert Christian George Andrew Patrick David, Prince of Wales,	
Duke of Cornwall (1337) (*Scott. Duke, Rothesay*), K.G., *b.* 1894, *s.* 1910, *M.* (None)

Commanders of the Royal Victorian Order.
Judges of County Courts and Judges of the City of London Court.
Serjeants at law.
Masters in Lunacy.
Companions of the Bath, Star of India, St. Michael and St. George, Indian Empire.
Members 4th Class of the Royal Victorian Order.
Companions of the Distinguished Service Order.
Companions of the Imperial Service Order.
Eldest Sons of younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights in order of their Fathers.
Members 4th Class of the Royal Victorian Order.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.*

There are three Orders confined to Ladies: The Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriff, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 5s. net.

England, Great Britain, U. K., and 28 Ireland (marked I).

The House of Commons.

THE first Parliament of King George V. was elected in January and February, 1910, as the second Parliament of King Edward VII. The General Election had returned 397 Ministerialists (275 Liberals; 40 Labour Members; 82 Nationalists) and 273 Opposition (Conservatives and Unionists), distributed as shown in the following table:—

	Distribution of Members.				Position as to Parties (1910).		
	Counties.	Boroughs.	Universities.	Total Members.	Ministerial.	Opposition.	Majority.
England	234	226	5	465	226	239	13 *Opp.*
Wales	19	11	—	30	28	2	26 *Min.*
Scotland	39	31	2	72	61	11	50 *Min.*
Ireland	85	16	2	103	82	21	61 *Min.*
United Kingdom	377	284	9	670	397	273	124 *Min.*

The total number of electors upon the register in 1910 is given below, together with the Registrar-General's estimate of the population in the middle of the year 1910:—

Division.	Electors.	Population.
England and Wales	6,221,722	36,169,150
Scotland	785,208	4,929,251
Ireland	698,787	4,371,163
United Kingdom	7,705,717	45,469,564

POLITICAL PARTIES AND ORGANISATIONS.

LIBERAL.—The *Liberal Central Association*, 41, Parliament Street, Westminster, S.W., is the official organisation and headquarters of the Liberal Party. *Sec.*, Sir Robert Hudson. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W., is a union of Liberal Associations in England and Wales. The *Liberal Publication Department*, under the combined auspices of the two above bodies, and of the same address, issues periodical literature and political magazines. Among other organisations the *National Reform Union*, 5, Cross Street, Manchester, and 10, Adelphi Terrace, W.C., founded in 1864 for the advocacy of electoral reform and opposition to Protection, aims at inculcating Liberal principles by means of lectures and the distribution of literature; the *Eighty Club*, 3, Hare Court, Temple, E.C., was founded in 1880, and works on similar lines; the *Liberal League*, 20, Queen Anne's Gate, S.W., was formed for the purpose of bringing together, with a view to common action, all those who approved of the policy expounded by Lord Rosebery at Chesterfield, December 16th, 1901; *Home Counties Liberal Federation*, 42, Parliament Street, S.W.; the *London Liberal Federation*, 41, Parliament Street, S.W.; *League of Young Liberals*, 5, Duke Street, Adelphi, S.W.; *Liberal Social Council*, 92, Victoria Street, S.W.; the *Women's Liberal Federation*, 124, Victoria Street, S.W.; and the *Women's National Liberal Association*, 138, Palace Chambers, Westminster, S.W. The *Scottish Liberal Association* is at 7, West George Street, Glasgow, and at 95, Princes Street, Edinburgh; the *Scottish Women's Liberal Association* is at the Glasgow office. The *Chief Liberal Whip* (Patronage Secretary to the Treasury) is The Master of Elibank. *Other Whips*, J. H. Whitley, W. W. Benn, and C. Partington, with J. W. Gulland (for Scotland), E. J. Soares, and T. H. Illingworth.

CONSERVATIVE.—The *National Union of Conservative and Constitutional Associations*, St. Stephen's Chambers, Westminster, S.W., was founded in 1867, and is a federation of Conservative and Constitutional Associations and Clubs in England and Wales. As constituted at present, it consists of 39 Provincial Divisions, a Council of about 200 members, which meets quarterly, and a Conference, which meets annually. It has five Committees, viz.: Executive, Organisation, Publication, Lecture, and Finance, which have the important duties of strengthening, stimulating, and creating electioneering organisation in the constituencies, publishing and distributing the whole of the Party literature for the education of the electorate, and providing and controlling the staff of speakers and lecturers. *Secretary*, Thomas Cox. *Librarian*, W. J. Marshall. The *Conservative Central Office* is the Parliamentary department; *Principal Agent*, Percival Hughes. The *National Union of Conservative Associations for Scotland* is at 1, Castle Street, Edinburgh. *National Conservative League*, Thornton Heath, Surrey. The *Primrose League*, 64, Victoria Street, S.W., founded in 1883, is the educating body, and aims at the Maintenance of Religion, of the Union, and of the ascendency of the British Empire: *Grand Master*, Rt. Hon. A. J. Balfour, M.P.; *President Ladies' Council*, Miss Balfour; *Registrar*, F. Willis; *Clerk of the Council*, R. Bennett. The *Conservative Whips* are Sir A. Acland Hood, Viscount Valentia, H. W. Forster, Lord Balcarres, Marquess of Hamilton, H. P. Pease, and Lord Edmund Talbot. *Junior Imperial and Constitutional League*, St. Stephen's Chambers, S.W. *United Club*, Mitre Court, Temple, E.C. *Union Defence League*, 25, Victoria Street, S.W.

LIBERAL UNIONIST.—The *Liberal Unionist Council*, 9, Great George Street, Westminster, was formed in 1886, and re-constituted in 1904. Its main object is the prevention of the separation of the governments of Great Britain and Ireland. *President*, Rt. Hon. J. Chamberlain, M.P.; *Sec.*, J. Boraston. The *Liberal Unionist Whip* is Viscount Morpeth.

LABOUR.—The Labour Party in Parliament is composed of 40 Labour Party nominees. The Parliamentary organisation is the *Labour Party*, 28, Victoria Street, Westminster, S.W., which endorses candidates selected by Trade Unions or

Socialist Societies affiliated to the Party, pays 25 per cent. of the Returning Officers' expenses, and contributes £200 a year towards the maintenance of elected members. *Sec.*, J. Ramsay MacDonald, M.P. *Chairman of the Parliamentary Party*, Geo. N. Barnes, M.P. The *Labour Whips* are G. H. Roberts and C. Duncan. The *National Women's Labour League*, 8, Jedburgh Street, Clapham, S.W., aims at the direct Labour representation of women in Parliament.

SOCIALISTS.—The *Social Democratic Party*, Chandos Hall, 21A, Maiden Lane, Charing Cross, W.C., and the *Independent Labour Party*, 10, Red Lion Court, Fleet Street, E.C., have many aims and some members in common. The *Fabian Society*, 3, Clement's Inn, Strand, W.C., preaches an intellectual Socialism to the middle classes. *The Anti-Socialist Union of Great Britain*, 58, Victoria Street, is a central organisation to oppose Socialism.

IRISH PARTIES.—The *United Irish League* represents the Nationalist Party, and the Nationalist Whips are Capt. A. J. C. Donelan, Pat O'Brien, E. Haviland Burke, and J. P. Boland. The Irish Unionist Party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin. *Sec.*, R. G. Carden, D.L. *Irish Unionist Whip*, J. B. Lonsdale, M.P.

FREE TRADE.—The *Free Trade Union*, 8, Victoria Street, S.W., resists a reactionary tariff policy and safeguards the free import of food and raw material.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W., was founded in 1903, in furtherance of Mr. Chamberlain's proposals for the reform of the Fiscal System of the United Kingdom. *Sec.*, T. W. A. Bagley.

SUFFRAGE.—The *People's Suffrage Federation*, 34, Mecklenburgh Square, W.C., works for Adult Suffrage after a short residence. The principal organisation for putting forward the claims of women to the Parliamentary franchise are the *National Union of Women's Suffrage Societies*, 14, Great Smith Street, Westminster, S.W., with over 200 affiliated societies; the *London Society for Women's Suffrage*, 58, Victoria Street, S.W., is a society in the above Union, and has over 3,500 members; the *Women's Social and Political Union*, 4, Clement's Inn, W.C.; the *Women's Freedom League*, 1, Robert Street, Adelphi, W.C., which aims at securing for women a Parliamentary vote as it is or may be granted to men; the *Lancashire and Cheshire Women's Textile Workers' Representation Committee*, 5, John Dalton Street, Manchester; and the *Women's Co-operative Guild*, Kirkby Lonsdale; the *Conservative and Unionist Women's Franchise Association*, 48, Dover Street, W., aims at a qualified suffrage for women, and opposes universal suffrage of either sex. The offices of the *Women's Local Government Society* are 17, Tothill Street, S.W. *The Women's National Anti-Suffrage League*, Caxton House, Tothill Street, Westminster, S.W. (*Chairman*, The Countess of Jersey; *Treas.*, J. Massie), seeks to prevent the Parliamentary enfranchisement of women. *Sec.*, Miss L. Terry Lewis.

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

PUBLIC ACTS OF PARLIAMENT.

PASSED UP TO THE ADJOURNMENT, *August 3rd*, 1910.

10 EDWARD VII. AND 1 GEORGE V.—1910.

1. Treasury (Temporary Borrowing).
2. War Loan (Redemption).
3. Ancient Monuments Protection.
4. Consolidated Fund (No. 1).
5. East India Loans (Railways and Irrigation).
6. Army (Annual).
7. Development and Road Improvement Funds.
8. Finance.
9. Consolidated Fund (No. 2).
10. Police (Scotland) Act (1890) Amendment.
11. Census (Ireland).
12. Supreme Court of Judicature.
13. Police (Weekly Rest Day).
14. Appropriation.
15. Mines Accidents (Rescue and Aid).
16. Duke of York's School (Chapel).
17. County Common Juries.
18. Isle of Man Customs.
19. Municipal Corporations.
20. Diseases of Animals.
21. Public Works Loans.
22. Trusts (Scotland).
23. Companies (Converted Societies).
24. Licensing (Consolidation).
25. Children Act (1908) Amendment.
26. Regency.
27. Census (Great Britain).
28. Civil List.
29. Accession Declaration.
30. Agricultural Holdings (Scotland) Amendment.
31. Jury Trials Amendment (Scotland).
32. Registration of Births, Deaths and Marriages (Scotland).
33. Hotels and Restaurants (Dublin).
34. Small Holdings.

SPEAKERS OF THE COMMONS SINCE 1660.

PARLIAMENT OF ENGLAND.

1660.	Sir H. Grimston.	1680.	W. Williams.
1661.	Sir E. Turner.	1685.	Sir John Trevor.
1673.	Sir J. Charlton.	1688.	H. Powle.
1673.	Edwd. Seymour.	1694.	Paul Foley.
1678.	Sir Robt. Sawyer.	1698.	Sir T. Lyttleton.
1679.	Serjeant William Gregory.	1700.	Robert Harley.
		1702.	John Smith.

PARLIAMENT OF GREAT BRITAIN.

1708.	Sir Richd. Onslow.	1761.	Sir John Cust.
1710.	Wm. Bromley.	1770.	Sir F. Norton.
1713.	Sir Th. Hanmer.	1780.	C. W. Cornwall.
1715.	Spencer Compton.	1788.	Hn. W. Grenville.
1727.	Arthur Onslow.	1789.	Hy. Addington.

PARLIAMENT OF UNITED KINGDOM.

1801.	Sir John Mitford (*created Lord Redesdale*).
1802.	Charles Abbot (*created Lord Colchester*).
1817.	Charles M. Sutton (*cr. Visct. Canterbury*).
1835.	James Abercromby (*cr. Lord Dunfermline*).
1839.	Chas. Shaw-Lefevre (*cr. Visct. Eversley*).
1857.	J. Evelyn Denison (*cr. Visct. Ossington*).
1872.	Sir H. W. B. Brand (*cr. Visct. Hampden*).
1884.	Arthur Wellesley Peel (*created Visct. Peel*).
1895.	William Court Gully (*created Visct. Selby*).
1905.	James William Lowther.

Parliamentary Summary, 1909–1910.

Session 1909.

THE BUDGET.—On *Oct.* 22 Mr. Lloyd George, gave a revised estimate of the revenue, and said that the alterations in the land taxation proposals would bring an addition of £125,000 to the original estimate, but by concessions affecting licences £500,000 would be lost. In all there would be a diminution of revenue of £2,100,000, against £1,850,000 added, and to meet the shortage of £250,000 he would take another half a million from the Sinking Fund. Mr. Austen Chamberlain moved the rejection of the Bill, and after three days' debate this was defeated by 379 against 149. On *Nov.* 22 the Earl of Crewe moved the second reading in the Lords, whereupon Lord Lansdowne brought forward a motion that the House was not justified in giving its consent to the Bill until it had been submitted to the judgment of the country. Meeting the Opposition Leader's resolution, Lord Loreburn said it was impossible that any Liberal Government could ever again bear the heavy burden involved in the rejection of their Bills which they had had to bear during the previous four years. Lord Rosebery, while condemning the Bill, announced that he could not support Lord Lansdowne's motion; and Lord Balfour of Burleigh, the Archbishop of Canterbury, and Lord James of Hereford also opposed the Unionist Leader's proposal. In winding up the debate after it had proceeded over six days, Lord Crewe said if the Liberals came back from the country with a majority, they would set themselves at once to obtain guarantees which would prevent the indiscriminate destruction of their legislation by the House of Lords. The amendment was carried by 350 to 75. The Prime Minister, on *Dec.* 2, moved a resolution declaring that the action of the Lords in refusing to pass into law the financial provision made by the Commons for the services of the year was a breach of the Constitution and an assumption of the rights of the Commons, and this was carried by 349 to 134—a majority of 215. Mr. Asquith said the Commons would be unworthy of its traditions if it allowed another day to pass without making it clear that it did not mean to brook this interference and usurpation. The Government had advised the Crown to dissolve Parliament at the earliest possible date. On the following day Parliament was prorogued. In the King's Speech was the following reference to the situation:—"Gentlemen of the House of Commons,—I thank you for the liberality and care with which you provided for the heavy additions to the national expenditure, due to the requirements of Imperial defence and social reform. I regret that that provision has proved unavailing."

HOUSING AND TOWN PLANNING.—The Commons on *Nov.* 1 considered the Lords' amendments to this Bill, which Mr. Burns said numbered 181. Of these, 39 were moved or accepted by the Government, and 24 were inserted to harmonise the Bill with existing law. Eighteen important, but not vital, amendments were carried against the Government, and these necessitated 47 consequential amendments; 19 minor amendments were agreed to, and 30 others were consequential. The vital amendments which, said Mr. Burns, the Government regarded as destructive, were only four or five, and the Commons disagreed with these by considerable majorities. Others were disagreed with on the ground that they infringed the rights of the Commons. The Lords on *Nov.* 19 considered the Commons' amendments, and the objections by the representative House were accepted and the Bill passed.

LONDON ELECTIONS BILL.—The measure constituting London a single Parliamentary borough, all the divisions polling on one day, was ordered by a Standing Committee to be reported to the House without amendment, and was read a third time on *Oct.* 18 in the Commons. When Lord Denman moved its second reading in the Lords, on *Nov.* 8, the Bill was, on the motion of Lord Derby, rejected by 157 against 40.

IRELAND.—When the Committee stage of the Irish Land Bill—a measure similar to that briefly introduced in the Commons in 1908—was reached in the Lords, a number of amendments were made, against the strong opposition of the Government, the chief being the deletion of the clause for compulsory purchase by the Land Commissioners. A compromise was reached in which compulsion was accepted, and on *Nov.* 26 the Lords passed the Bill, which became law.

THE DISSOLUTION.

Parliament was dissolved on Jan. 15, 1910, at which date the strength of the various political parties was as follows:—Liberal, 373; Labour, 45; Nationalist, 84—Government total, 502. Conservatives and Unionists, 168. Government Majority, 334.

THE GENERAL ELECTION.

¶ A General Election took place in January and February, 1910, the first polls being taken on Jan. 14, and the last on Feb. 7. The principal points in the Government programme were the Abolition of the Lords' Veto and the maintenance of Free Trade. The Opposition relied upon plans for the Reform of the House of Lords and of the Tariff, and the maintenance of the Union with Ireland. At the conclusion of the campaign the parties numbered: Liberals, 275; Labour, 40; Nationalists, 75; Independent Nationalists, 7. Government total, 397. Opposition, 273. Government Majority, 124.

Session 1910.

KING'S SPEECH.—On *Feb.* 21 King Edward opened the Session in person. The Royal Speech foreshadowed no ordinary legislation, but contained the following sentences:—"Recent experience has disclosed serious difficulties, due to recurring differences of strong opinion between the two branches of the Legislature. Proposals will be laid before you, with all convenient speed, to define the relations between the Houses of Parliament, so as to secure the undivided authority of the House of Commons over finance and its predominance in legislation. These measures, in the opinion of my advisers, should provide that this House should be so constituted and empowered as to exercise impartially, in regard to proposed legislation, the functions of initiation, revision, and, subject to proper safeguards, of delay." In the Lords, the address was moved by Lord Farrer and seconded by Lord Saye and Sele, and agreed to in one sitting, the leading peers making brief references to the gravity of the situation. In the Commons, Mr. Percy Illingworth (Shipley) moved and Mr. C. E. Price (Central Edinburgh) seconded the address in reply. The main discussion centred round the

question of the relations of the two Houses. On the first day's debate Mr. Asquith said he had asked for no guarantees and had received none, but, he added, if the occasion should arise, he should not hesitate to tender such advice to the Crown as in the exigencies of the situation might be necessary. The Government proposed to proceed in the first instance by resolutions which were to be embodied in a Bill to be carried into law this Session. The Government, the Prime Minister declared, had only two objects in view—to carry on the King's Government with credit and efficiency so long as they were responsible for it, and to put an end, at the earliest possible moment, by the wisest and most adequate methods they could devise, to a constitutional position which enabled a non-representative and irresponsible authority to thwart the purpose and mutilate the handiwork of the chosen exponents of the people's will. Mr. Redmond said it was imperative that the Veto scheme of the Government should be produced at once. If Ministers could give a reasonable assurance that they could carry their Veto Bill this year, the Nationalists would, he said, vote for the Budget. On behalf of the Labour Party, Mr. George Barnes asked that instead of proceeding by resolution the Government should present their Veto Bill at once. After this view had been advanced by several Liberal members, Mr. Churchill said when the proposals were placed before the House the Government would stake their existence upon carrying them into law. A Tariff Reform amendment to the address, moved by Mr. Austen Chamberlain, was defeated by 285 to 254 after two days' discussion, the Nationalists abstaining; and another amendment, drawing attention to the critical condition of the hop industry, was rejected by 228 to 185. The address was agreed to on *Feb.* 25.

THE RELATIONS BETWEEN THE TWO HOUSES. —The main work of the Session had commenced on *Feb.* 28 when Mr. Asquith outlined the Government's resolutions upon the question of the Veto, and said they regarded the placing, with all possible promptitude, upon the Statute Book, of provisions setting the Commons free from the Veto, not only as the first condition of the legislative dignity and utility of the Commons, but as their own primary and paramount duty. "Upon its successful accomplishment," the Prime Minister continued, "we shall stake not only our fortunes, but our existence as a Government." Mr. Redmond promised the support of the Nationalists on condition that the Ministry carried out their pledges; and without opposition the House agreed to a motion giving the Government the whole time until March 24. Replying to questions, Mr. Asquith indicated that the Government's resolutions on the relations between the two Houses were to be passed before the Budget of the previous Session, and on *March* 29 he moved that the House should resolve itself into a Committ e to consider the question. He said he thought there was need of a Second Chamber in this country, but except in name there was no bicameral system. Mr. Balfour showed that the Unionist Party meant to oppose the resolutions at all stages, and Mr. Redmond assured the Government of the hearty support of the Nationalists; while Mr. Barnes said the Labour Party would support Mr. Asquith, although they desired more drastic proposals. An amendment, moved by Sir Robert Finlay, declining to proceed with the Government's proposals, but expressing willingness to consider the reform of the existing Second Chamber, was defeated by 357 against 251, and the motion to go into Committee was passed. A closure resolution having been carried, the first resolution was considered on *April* 6 and 7. This declared that the House of Lords should be disabled from rejecting or amending Money Bills (which were defined), and after an amendment had been defeated by a majority of 101, the resolution was adopted by 339 to 237. The second resolution laid down that any Bill other than a Money Bill which the Commons passed in three successive sessions, and which the House of Lords rejected each time, should become law; and on *April* 14, after four days' debate and the defeat of five amendments, this was carried by a majority of 105; the third and last resolution limiting the duration of Parliament to five years, being accepted on the same day by 334 to 236. The resolutions were reported, and Mr. Asquith then introduced a Bill founded thereon. He said if the Lords failed to accept the Government policy or declined to accept it, they should feel it to be their duty immediately to tender advice to the Crown as to the steps which would have to be taken if that policy were to receive statutory effect in the present Parliament. If the Government did not find themselves in a position to ensure that statutory effect should be given to their policy in the existing Parliament, they would either resign or recommend a dissolution of Parliament, and in no case would they recommend a dissolution except under such conditions as would secure that in the new Parliament the judgment of the people, as expressed at the General Election, would be carried into law. Meanwhile, on *March* 9, Lord Rosebery gave notice of three resolutions upon the need of a strong Second Chamber, to be secured by reforming the House of Lords. He said there was a profound consciousness that some modification in the constitution of that House was desirable, and that there was great objection to the hereditary principle. The Earl of Crewe said the Government did not intend to offer any opposition to the motion to go into Committee. This course was agreed to, and after two days' discussion Lord Rosebery's resolutions were passed, the only division being on a declaration that the necessary preliminary of reform was the acceptance of the principle that the possession of a peerage should no longer in itself give the right to sit and vote in the House.

THE BUDGET OF 1909–10. — In moving the adoption of a time-table limiting the discussion on the Budget for 1909–10, Mr. Asquith, on *April* 18, said the financial proposals were in all substantial and essential respects identical with those approved by the late House of Commons. "Our fortunes as a Government," he declared, "and possibly our fortunes as a party, are bound up with this Budget." The Prime Minister emphatically stated that there had not been and was not then anything in the nature of an agreement between the Nationalist Party and the Government. Mr. Redmond supported the motion, and it was carried by 345 to 252, the Independent Nationalists, led by Mr. William O'Brien, voting with the Opposition. On the following day the Chancellor of the Exchequer introduced the Budget. He said the expenditure for the past year was £157,945,000, and the revenue £131,697,000, showing a realised deficit

of £26,248,000. This would be more than made up out of the arrears of the revenue which would have been collected in 1909 if the Budget had passed. The balance on the right side would be £2,962,000. He added that if the Budget had been passed £1,300,000 would have been saved, and the Treasury would thus have had £4,200,000, after making provision for the services of the year. On *April* 20 the consideration of the resolutions was taken, and they were carried by majorities varying from 83 to 86. The Finance Bill was then brought in and read a first time amid cheers. On the second reading, Mr. William O'Brien moved that "inasmuch as the announcement of this Bill has already done a cruel injury to more than one great Irish industry, and seriously shaken the confidence of the new occupying proprietors as to their future, and as it proposes to impose upon Ireland unjust additions to her already excessive taxation, the Bill be read a second time upon this day six months." The amendment was rejected by 328 against 242, and the second reading was carried by the same figures, giving a majority of 86. One day was given to the Committee stage, at which an amendment making it plainer that increment duty was not to be charged on purely agricultural land was accepted. The Bill passed through Committee, and was read a third time after its rejection had been defeated by 324 against 231. On *April* 28 the Lords passed the Bill without a division, and the Royal Assent was given on the following day, the anniversary of the introduction of the Budget. At the same time an act to amend the Development and Road Improvement Act, raising the number of Commissioners from five to ten, was also made law.

IRELAND.—Practically the only Irish matter of interest arose out of the disclosures made by Sir Robert Anderson that he contributed some of the articles on "Parnellism and Crime" to *The Times* in 1887; and on *April* 21, in the Commons, on the vote on account of nine millions for the Civil Service and Revenue Departments, Mr. T. P. O'Connor moved to reduce the vote by £900 in respect of the pension of Sir Robert Anderson. Mr. Churchill condemned the procedure of 1887, but thought they ought not to deprive Sir Robert of his pension. Some uproar resulted from a remark by Mr. J. H. Campbell relating to Mr. Parnell and the Phœnix Park murders, and the Nationalists refused to allow him to proceed as he declined to withdraw the statement. Mr. Churchill thereupon moved the closure, which was carried by 232 against 111, and the amendment was rejected by 164 against 94.

THE KING'S DEATH.

THE DEATH OF KING EDWARD.—The deeply lamented death of King Edward materially changed the whole Parliamentary situation. Both Houses were enjoying a brief respite from work when, on *May* 6, the nation was plunged into mourning by the loss of the Sovereign; but on the following day, in accordance with precedent, the two Houses met formally, and continued to do so daily until May 11, when Mr. Asquith in the Commons and Lord Crewe in the Lords announced the receipt of messages from King George. The Prime Minister, in moving votes of condolence with the new Sovereign and with the Queen Mother, made an impressive speech. He said that among the qualities which so admirably fitted King Edward for the purpose of his kingly task, he placed first King Edward's strong sense of public duty. He recognised in the fullest degree both the powers and the limitations of a constitutional monarch. "He has left his people," Mr. Asquith declared, "a memory and an example which they will never forget—a memory of great opportunities greatly employed; an example which the humblest of his subjects may treasure and strive to follow, of simplicity, courage and self-denial, of tenacious devotion, up to the last moment of his life, to work, to duty, and to service." The Queen Mother, Mr. Asquith described as enthroned in the love of the British people. "Let us assure King George," the Premier concluded, "that it is not only the eager hope, but the confident belief of the people that he will show himself to be a worthy son and successor of the great King whom we mourn to-day." Mr. Balfour said they ought not to think of the King as a dexterous diplomatist. It was because he was able naturally and simply, through the incalculable gift of personality, to embody in the eyes of all men the friendly policy of this country that King Edward was able to do the work in bringing the nations together which it fell to the lot of few men, whether kings or subjects, to accomplish. Mr. Enoch Edwards (Labour) added a few words on behalf of his party, and the resolutions were carried *nem. con.* Performing a similar duty in the Lords, the Earl of Crewe said no sovereign had been the personal friend of his people in the sense in which King Edward was. Lord Lansdowne said the late King had pledged himself to walk in the footsteps of his mother, and that as long as breath remained in his body he should work for the good of his people. How nobly had that pledge been fulfilled, said his Lordship. The motion was agreed to. The two Houses attended the first portion of the funeral ceremony in Westminster Hall, and then adjourned until *June* 8, and on reassembling replies from King George and the Queen Mother were received.

THE NEW REIGN.

THE CIVIL LIST.—On *June* 14 a message was read from the King in both Houses regarding the provision of a Regency; and in the Commons the Chancellor of the Exchequer brought up another message in which the new Sovereign stated that the demise of the Crown had rendered it necessary that renewed provision should be made for the Civil List. On the following day a committee of twenty-one members was appointed to consider the latter question; and on *July* 22 Mr. Lloyd George moved a resolution, based on the report of this committee, declaring that there should be charged on the Consolidated Fund the following annual sums: For the King's Civil List, £470,000; for retired allowances, £18,000; in the event of the marriage of the Prince of Wales, £10,000 for the Princess, to be increased to £30,000 in the event of Her Royal Highness surviving the Prince of Wales; for the benefit of the other sons of the King, £10,000 in respect of each who attained the age of 21, and a further sum of £15,000 in respect of each who married; for the daughters, £10,000 in respect of each who attained the age of 21 or who married; and for the Queen in the event of her surviving the King, £70,000. He also moved that it was expedient to amend the law relating to the Civil List. The Chancellor of the Exchequer said the Crown followed the usual course in surrendering all the hereditary revenues

except those of the Duchies of Lancaster and Cornwall. Mr. Barnes, the Labour Leader, at once moved to reduce the King's Civil List to £385,000, on the grounds that the Duchies ought to be regarded as public property, that the amount proposed was excessive, and because the proposals limited discretion and tied up future Parliaments. The amendment having been rejected by 206 to 26, Mr. Barnes next moved the omission of the provision proposed for the Princess of Wales in the event of the Prince marrying, and this was defeated by 218 to 21. An attempt by Mr. Keir Hardie to omit the provision for the children of the King and Queen was beaten by 207 to 20, and the resolutions were carried by 197 to 19. On *July* 25 the Civil List Bill obtained its first reading, and on the following day it was read a second time, after an amendment by Mr. Barnes seeking to transfer the revenues of the Duchies to the public exchequer had been rejected by 221 against 52. Labour amendments of a similar nature were defeated in the Committee stage on the following day by large majorities. The measure left the Commons on *July* 28, and was read a third time in the Lords on *Aug.* 1. The Prime Minister on *June* 15 introduced the Regency Bill, which provided that should a Regency be necessary Queen Mary should have full authority to exercise and administer royal power and government in the event of the heir apparent coming to the Throne before he attained his majority. The measure was given a second reading without a division on *June* 21, and on *July* 5 it passed through Committee. The third reading was carried on *July* 22, the consideration being marked by a tie on the question of reinserting words struck out in Committee, and the Speaker gave a casting vote for the amendment restoring the Bill to its original form. The Lords passed the measure with but slight discussion.

THE ACCESSION DECLARATION.—The most contentious piece of legislation which resulted from the demise of King Edward was the Bill for amending the declaration regarding the Roman Catholic faith which the Sovereign is required to make on his accession. Introduced by the Prime Minister on *June* 28, it was read a first time by 383 to 42. Mr. Asquith said the duty of uttering the old formula at the beginning of his reign was most repugnant to King Edward. The proposal of the present Government was to substitute for the existing form a declaration of the Sovereign's personal belief in terms which could not possibly give offence. Mr. Balfour supported the alteration, as did the Nationalists, but the representatives of Ulster and a few other members opposed the Bill. The second reading, moved by Mr. Asquith on *July* 27, was carried by 410 against 84, after Mr. Asquith had announced that the proposed form of the Declaration would be altered as follows:—"I do solemnly and sincerely, in the presence of God, profess, testify, and declare that I am a faithful Protestant, and that I will, according to the true intent of the enactments to secure the Protestant succession to the Throne of my realm, uphold and maintain such enactments to the best of my power." Mr. Balfour supported the second reading, but some of his prominent supporters opposed and voted against it. On *July* 28 the amendment was carried without a division in Committee, and a number of other amendments were defeated by large majorities. The third reading was carried by 245 against 52 on *July* 29. On the motion for the second reading in the Lords, on *Aug.* 1, Lord Kinnaird moved the postponement of the consideration of the measure until after the autumn recess, but the second reading was agreed to unanimously. On the Committee stage, Lord Kinnaird moved an amendment which would require the King to declare against trans-substantiation, but no division was challenged, and the Bill was read a third time without amendment. On *Aug.* 3, when Parliament adjourned until *Nov.* 15, the Royal Assent was given to the Accession Declaration Bill, the Civil List Bill, and the Regency Bill.

THE VETO CONFERENCE.—The death of King Edward materially altered the situation in connexion with the relations between the two Houses, and a movement for compromise was started. On *June* 13 the Prime Minister announced that negotiations had passed between himself and the Leader of the Opposition which he hoped might lead to an early meeting between them. Four days later the conference thus foreshadowed held its first meeting, and it was intimated that the discussions would be untrammelled. The parties consisted of Mr. Asquith, Lord Crewe, Mr. Lloyd George, and Mr. Birrell on the Government side, and Mr. Balfour, Lord Lansdowne, Mr. Austen Chamberlain, and Lord Cawdor on behalf of the Opposition. No official announcement was made until *July* 28, the eve of the adjournment for the autumn recess, when Mr. Asquith said: "The representatives of the Government and the Opposition have held twelve meetings, and have carefully surveyed a large part of the field of controversy. The result is that our discussions have made such progress, although we have not, so far, reached an agreement, as to render it, in the opinion of all of us, not only desirable, but necessary, that they should continue. In fact, I may go further and say that we should think it wrong at this stage to break them off. There is no question of their indefinite continuance, but if we find, as a result of our further deliberations during the recess, that there is no prospect of an agreement that can be announced to Parliament in the course of the present Session, we should bring the conference to a close." In this position the matter was left until the Autumn Session.

THE BUDGET OF 1910–11.—The Budget of the year was introduced on *June* 30 by Mr. Lloyd George, who said that, while the revenue had been affected seriously by the postponement of the preceding year's Finance Act, nothing had hindered the growth of expenditure, which was £171,857,000, with a deficit amounting to £26,248,000, in addition to arrears of payments into the local taxation account. The amount which he had to supply was £198,930,000. He had, he said, collected arrears of taxation amounting to £26,570,000, so that last year's deficit had been all but wiped out already. In addition, he had money in hand with which to take up Treasury bills and temporary borrowings necessitated by the rejection of the preceding Budget, and the Exchequer balances had been nearly restored. The commercial outlook for the year was, the Chancellor declared, distinctly bright, and he hoped to see a greater volume of trade than had ever been known in the history of the country. He admitted that his estimate of the revenue from the whisky tax was wrong by millions, but he could not alter the tax,

because of its beneficent results in the decrease of drunkenness. The total revenue would be £199,791,000, leaving a surplus of £861,000. Of this, £102,000 would be surrendered, bringing the surplus down to £759,000. Part of this he intended to use for the removal of the pauper disqualification for old age pensions, the scheme coming into operation on the following Jan. 1. The Government saw their way, he continued, to start in 1911 a great national scheme of insurance against unemployment and invalidity. The scheme would be on a contributory basis, with a liberal State subsidy. He asked, in conclusion, what country could show such a record, and what other fiscal system in the world could boast of such success. Mr. John Redmond renewed his protest against the whisky tax, but the discussion lacked the life of those resulting from the previous year's Budget. Proceedings in Committee were also quiet, and on *July* 25 the Finance Bill was brought in and read a first time, the further stages being postponed until the Autumn Sitting.

INDIAN BUDGET.—In the Commons, on *July* 26, the Hon. E. S. Montagu, the Under Secretary, introduced the Indian Budget, remarking that the agricultural prosperity of India might be said to have been completely re-established. The statistics as to plague were not as hopeful as he would wish, but the people were realising more and more the necessity for remedial measures. The position of India was, he said, one which, handled well, contained the promise of greater justification for British rule, but which, handled badly, was bound to have serious results. His Majesty's Government were determined to assist the Indian Government in its unflinching war against sedition and manifestations of unrest. He announced that there would be a Minister for Education in the Viceroy's Council. The Indian Councils Act had exceeded the anticipations of its authors, but he warned the House against confusing the demand for legitimate reform with sedition. An amendment deploring the enactment and administration of restrictive legislation was defeated by 277 against 48.

NAVY.—In the Commons, on *March* 14, Mr. McKenna said the bulk of the increase in the year's naval estimates, which amounted to some £40,600,000, was due to the charge for new construction. He declared that in home waters in March, 1912, Great Britain would have twelve vessels of the Dreadnought type, battleships and cruisers, exclusive of the Colonial ships. Mr. Arthur Lee denied that the two-Power standard was being maintained, and accused the Government of starving the shipbuilding vote; while Lord Charles Beresford, who in an earlier debate had condemned "the insane development of the Dreadnought," declared that the Fleet was not strong enough, and not properly organised for war. Replying on *July* 14 to an amendment moved by Mr. Dillon for a reduction of the vote for shipbuilding, repairs and maintenance, the Prime Minister said the Government would be false to the trust reposed in them if they did not maintain an ample navy with a margin of security, for that was the only insurance for a nation like Great Britain. Mr. McKenna said the Admiralty's motto was, "Be safe and sober." Mr. Dillon's amendment was rejected by 298 against 70.

ARMY.—Speaking on *March* 7, Mr. Haldane said that in February the Territorial Force numbered 276,000, or within 10 per cent. of the strength it was likely ever to attain. Recruiting for the Regular Army was very satisfactory. The Army Annual Bill went through Parliament with little discussion, receiving the Royal Assent on *April* 29. On *June* 13 Mr. Haldane announced that, to his great regret, Lord Kitchener did not desire to take up his appointment to the Mediterranean Command; but the Government, considering the appointment of much importance, proposed to continue it. During a debate in the Lords on *July* 18, initiated by Lord Portsmouth, Lord Esher said that in his opinion the maximum number of men likely to be raised for the Territorials in London had been reached. The Government must face the fact, he added, that the total number of the Territorial Force would be about 275,000 men.

WOMEN'S SUFFRAGE. — Mr. Shackleton, on *June* 14, brought in a Bill, which was read a first time, for the extension of the Parliamentary franchise to women occupiers; and on *June* 23 Mr. Asquith, after a Cabinet meeting which had considered the question, announced that the Government were prepared to give time for a full second reading debate. In view of their announced intention not to prosecute contentious legislation, they could not, however, offer any further facilities. The debate took place on *July* 11 and 12, when Mr. F. E. Smith moved the rejection of the Bill, declaring that he was utterly unconvinced that there was a considerable volume of opinion in favour of women suffrage among the women of England. This motion was seconded by Mr. Annan Bryce. The debate and division were on non-party lines, and the second reading was carried by 299 against 190; but a motion to send the Bill to a Committee of the whole House, instead of to a Grand Committee, was adopted by 320 against 175, and further progress with the measure was consequently rendered impossible.

THE ADJOURNMENT.

The Session ended on *Aug.* 3, and Parliament was adjourned until *Nov.* 15. During the opening stages an impending Dissolution was mentioned to take place on *Nov.* 28.

THE BALANCE OF PARTIES SINCE 1880.

Year.	Ministry.	Opposition.	Majority.
1880	357 *Lib.*	295 { 233 *Cons.* 62 *Nat.*	62 *Lib.*

Admiral of the Fleet Lord Fisher, G.C.B.	Rt. Hon. James Bryce.
Field-Marshal Prince Yamagata.	Sir Joseph Dalton Hooker.
Field-Marshal Prince Oyama.	Professor Henry Jackson.
Admiral Count Togo.	Alfred Russel Wallace.
	Sir William Crookes, F.R.S.
	Thomas Hardy.
	Secretary and Registrar, Col. Hon. Sir Henry Chas. Legge, K.C.V.O.

The Civil List.

ANNUITIES TO THE ROYAL FAMILY.

The Land Revenues of the Crown have been collected on the public account since 1760, when King George III. surrendered them in return for a fixed annuity. The annuities payable to Their Majesties and to the members of the Royal Family are known as the Civil List, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations, which were adopted by the House of Commons :—

Their Majesties' Privy Purse	£110,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Princess Christian of Schleswig-Holstein	6,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,200	Duchess of Edinburgh	6,000
Unappropriated	8,000	Duchess of Albany	6,000
	£470,000	Princess Beatrice (Henry of Battenberg)	6,000
		Duchess of Mecklenburg-Strelitz	3,000
		His late Majesty's Daughters	18,000

Prime Minister	Herbert Henry Asquith, K.C.	*unpaid*
Lord High Chancellor	Lord Loreburn, G.C.M.G.	£10,000

Solicitor-General	William Hunter, K.C	2,000

IRELAND.

Lord Lieutenant	Earl of Aberdeen, K.T.	£20,000
Lord Chancellor	Sir Samuel Walker, Bart.	8,000
Attorney-General	Redmond Barry, K.C.	5,000
Solicitor-General	Charles A. O'Connor	2,000

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In **1905** the office of Prime Minister was officially recognised. The first mention of a King's Secretary of State is under Henry III. In **1433**, owing to press of work in France, two Secretaries were appointed, and until **1794** two seems to have been the normal number. From **1688** to **1782** one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home,

and other Officers of State.

Irish, and Colonial business. In 1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed.

ADMIRALTY, Whitehall, S.W.

The management of all maritime affairs, the government of the Royal Navy, jurisdiction in maritime cases, and the appointment and commissioning of Naval Officers, was in early times the province of the "Lord High Admiral," the ninth Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" since 1708 (except for a short time in 1827, when the Duke of Clarence was Lord High Admiral), the duties being performed by "Commissioners for executing the Office of Lord High Admiral of the United Kingdom." These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a Political "First Lord" (who, by virtue of the importance of his office, is a Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord and Controller," and a "Fourth Sea Lord," now always selected from Officers of the Service, with a Political "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The *net* amount provided in the Navy Estimates 1910-11, for administration, is £538,800.

(See NAVAL DEPARTMENT, *pp.* 210-212.)

AGRICULTURE AND FISHERIES. Board of, 4 & 8 Whitehall Place; 3 St. James's Square, and 43 Parliament Street, S.W.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connection with Diseases of Animals, and the functions of the Land Commissioners for England. Technically, the membership of the Board is analogous to that of the Local Government "Board," and "Board" of Education, but in effect the establishment consists of a President, a Parliamentary Secretary, a Permanent Secretary, Assistant Secretaries, &c., and the main functions are to prevent the introduction or spread of certain diseases among animals, to control the transit of animals and the exportation of horses, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry in Great Britain, to administer the Grant voted by Parliament to the Board for Agriculture, Education in England and Wales, to collect and publish agricultural statistics, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in Great Britain so far as the latter relate to agricultural produce, to control the redemption of tithe rent charge and the enclosure of common land, to enfranchise copyhold land, to administer the Small Holdings and Allotments Acts and the Acts relating to the improvement of land by private owners, to administer the Acts relating to Sea, Salmon and Freshwater Fisheries as regards England and Wales, and to conduct the English share of the International Fisheries Investigations in the North Sea. The Board also publish a monthly "Journal," price 4*d.* By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time altered. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate Vote. By an Order in Council of 28 March, 1903, the supervision of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1910-11 was estimated at £185,710.

ARMS, COLLEGE OF, or HERALDS' COLLEGE, Queen Victoria Street, E.C.

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Fulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O.

Registrar, H. Farnham Burke, C.V.O., F.S.A.

CHARITY COMMISSIONERS,
Ryder Street, St. James's, S.W.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1874 the powers previously exercised by the Endowed Schools Commissioners were substantially transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899.

Senior Examiner, D. B. Mair .....£700 to £900
Staff Officer, J. C. Henwood, I.S.O.....£500

COLONIAL OFFICE, Downing Street, S.W.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Colonies, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £58,300 for 1910-1911.

Principal Secretary of State for the Colonies, Rt. Hon. Lewis Harcourt, M.P. £5,000
Priv. Sec., Lionel Earle, C.M.G. £300
Assist. do., A. J. Harding, £150; F. W. S. Maclaren, M.P.; J. C. C. Davidson .....*unp.*

UNDER-SECRETARIES.

Permanent, Sir Francis J. S. Hopwood, G.C.M.G., K.C.B. £2,000
Private Secretary, W. C. Bottomley £150
Parliamentary, Col. Rt. Hon. J. E. B. Seely, D.S.O., M.P. £1,500
Private Secretary, R. V. Vernon.....£150
Asst. Secs., G. C. N. Nicholson and G. P. Collins, M.P. .....*unp.*
Assist. Und.-Sec., Sir C. Prestwood Lucas, K.C.M.G., C.B. £2,500
Do. do. (*Legal*) Hugh Bertram Cox, C.B. £1,200
Do. do. Hartmann Wolfgang Just, C.B., C.M.G. £1,200
Do. do. George V. Fiddes, C.B., C.M.G. £1,200
Chancellor of the Order of St. Michael & St. George, The Duke of Argyll, P.C., K.T., G.C.M.G., G.C.V.O.
Chief Clerk, Chas. Alex. Harris, C.B., C.M.G. £1,150
Principal Clerks, Geo. Wm. Johnson, C.M.G.; H. J. Read, C.M.G.; Charles Strachey; H. C. M. Lambert, C.B.; A. E. Collins; W. D. Ellis; G. E. A. Grindle £850 to £1,000
Legal Assistant, John Shuckburgh Risley £750
1st Class Clerks, J. F. N. Green; T. C. Macnaghten; E. H. Marsh, C.M.G.; C. T. Davis; F. G. A. Butler; W. A. M. Hobinson; A. Middleton; E. R. Darnley; R. Geikie; R. E. Stubbs *(acting)*.....£600 to £800
2nd Class Clerks, R. V. Vernon; W. C. Bottomley; A. J. Harding; H. R. Cowell; R. H. Griffin; E. J. Harding; A. B. Keith; H. F. Batterbee; J. R. W. Robinson; J. Anderson; D. L. H. Baynes; A. Gray; A. C. C. Parkinson; J. E. W. Flood ....£200 to £500
Accountant, A. H. H. Engelbach, I.S.O....£600 to £700
Assist. Accountant, W. H. Eggett .....£300 to £450
Librarian, C. Atchley, I.S.O. .....£500 to £600
Chief Registrar, W. F. Westbrook .....£300 to £500
Dep. to do., M. J. Drayson .....£340 to £400
Supt. of Printing, E. D. Rockett .....£300 to £450
Asst. to do., A. H. Bridgman .....£200 to £300
Clerk for Legal Instruments, C. H. Niblett £375 to £500
2nd Div. Clerks (Higher Grade), W. Scott; T. Wilson; W. E. Hobson; J. A. Smith; E. E. Wilkinson £250 to £350
Medical Adviser, Sir Patrick Manson, M.D., K.C.M.G., F.R.S.

Emigrants' Information Office.—£1,700.
31 Broadway, S.W.—(10 to 5. Sat. 10 to 1.30.)

Pres., Committee of Management, The Secretary of State for the Colonies.

Director, A. E. Stephenson.....£850 to £1,000
Assistant do., J. A. Barnes.....£600 to £800
2nd Class Clerks, F. B. Montague; H. D. Fisher; J. C. Fisher.....£300 to £500

CORNWALL, DUCHY OF, Buckingham Gate, S.W.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since been born Duke of Cornwall, the revenues of the Duchy accruing to the Duke. The internal government of the Duchy was amended by the Acts of 1863 and 1893, and certain peculiar juridical powers abolished. The accounts of the Duchy will be found on page 465.

Lord Warden of the Stannaries, The Lord Balfour of Burleigh, K.T.
Keeper of Privy Seal, The Earl of Mount Edgcumbe, G.C.V.O.
Attorney-General, Sir Charles Alfred Cripps, K.C.V.O., K.C., M.P.
Receiver-General, The Lord Revelstoke.
Auditor, Sir Lesley Charles Probyn, K.C.V.O.
Sec. and Keeper of Records, Walter Peacock.
Solicitor, R. E. Tucker.

CROWN AGENTS FOR THE COLONIES,

Whitehall Gardens, S.W. (Stock Transfer Office, 1 Tokenhouse Buildings, E.C.).

The Crown Agents for the Colonies are appointed by the Secretary of State for the Colonies, and act as business and financial agents in this country for the Governments of the Crown Colonies and Protectorates, some 50 in number. The self-governing Dominions have Agents of their own (see p. 453).

Crown Agents, R. L. Antrobus, C.B., £1,800; Maj. M. A. Cameron, C.M.G., late R.E., £1,500 to £1,800; W. H. Mercer, C.M.G.....£1,300 to £1,500
Secretary, P. H. Ezechiel.....£600 to £1,000
Chief Clerk and Accountant, E. G. Antrobus.....£700 to £950
Assistant Accountant, N. E. O. Willis.....£600

Head of Engineering Inspection Dept., A. M. Heath, A.M.I.C.E.....£700 to £1,000
Head of General Stores Dept., H. F. Smith.....£550 to £700
Head of Shipping Dept., W. E. James.....£550 to £700
Head of Appointments Dept., H. Martin £550 to £700

CUSTOMS AND EXCISE, BOARD OF, E.C.

Commissioners of Customs were first appointed in 1671 and housed by the King in London, the present "Long Room" replacing that built by Charles II. and rebuilt after destruction by fire in 1718 and 1814. In 1830 the Customs business of Ireland was transferred to London. The Excise Department was formerly under the Inland Revenue Department, and was amalgamated with the Customs Department on 1 April, 1909.

Chairman, Sir Laurence N. Guillemard, K.C.B.....£2,000
Private Sec., H. H. Ryder.
Dep. Chairman, F. Sydney Parry, C.B.....£1,500
Commissioners, Richard F. Crawford, £1,200; William G. Lewis, I.S.O., £1,200; James B. Meers, C.B. £1,400
Private Sec. to Deputy Chairman and Commissioners, Edward J. E. Craven.

Laboratory.

See Government Laboratories.

DURHAM, COUNTY PALATINE OF.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until arrogated by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Temporal Chancellor, John Scott Fox, K.C.
Attorney-General, Edward Tindal Atkinson, K.C.
Solicitor-General, Herbert F. Manisty, K.C.
Registrar of Chancery Court, A. O. Smith.
Steward & Clerk of Halmote, Hon. Mr. Manley.
Deputy do. and Clerk, G. Young Wall.
Mining Surveyor, Sir Lindsay Wood, Bt.
Receivers, Smiths, Gore, Norton & Co.

EDUCATION, BOARD OF,

Whitehall, S.W.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The Grants towards Elementary Education in 1909-1910 were estimated at £21,182,405; towards Secondary Education, £791,800; other aided schools and classes, £537,505; Training of Teachers, £555,000; cost of administration, £204,693; and of Inspection and Examination, £244,180.

EXCHEQUER AND AUDIT DEPARTMENT, Victoria Embankment, E.C.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 § 3 (1866), in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (1) Exchequer:—To authorise Issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proof of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon.

The net expenses of the Department were estimated at £63,400 in 1910-11.

FOREIGN OFFICE, Downing Street, S.W.

(Office hours 11 to 6.)

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Officer had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), three Assistant Under-Secretaries, a Librarian, a Head of the Treaty Department, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £67,372 in 1910–11.

FRIENDLY SOCIETIES' REGISTRY,

Central Office, 28 Abingdon Street, S.W.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the central office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, and a great number of local and personal Acts. The administrative expenses of the Registry were estimated at £9,439 in 1910–1911.

Chief Registrar, J. D. Stuart Sim £1,500
Assist. Registrar, T. Hall Hall £800
Do., G. Dudley Barlow £700
Chief Clerk, G. Brown, I.S.O. £500
Statistical Clerk, W. H. Tozer £400
Actuarial Clerk, A. M. Loveaux £400
2nd Divn. Clerks (*Higher Grade*), G. T. Knecht; E. Bennett; T. Jordan ..... £250 to £350

GENERAL REGISTER OFFICE,

Somerset House, W.C.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning such registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1838, his work being enormously increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office were estimated at £56,822 in 1910–1911 (including £2,996 for the Census Office).

Registrar-General, Bernard Mallet £1,200
Chief Clerk, A. C. Waters, I.S.O. £900
Sup. of Statistics, T. H. C. Stevenson, M.D. ..... £800 to £900
Do. Accounts and Stores, A. J. Mundy ..... £700 to £800

HOME OFFICE, Whitehall, S.W.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy. The administrative expenses of the Home Office were estimated at £224,078 in 1910-11.

INLAND REVENUE,
Somerset House, W.C.

"Inland Revenue" is derived from Death Duties, Stamps, and Taxes, and is partly collected by the Post Office. The principal share, however, is collected by the Board of Inland Revenue, established in 1849, and consisting of a Chairman, Deputy-Chairman, and two Commissioners, with Joint Secretaries, Assistant Secretaries, and a staff of officials. The estimated cost of the Department in 1910-11 was £1,324,000 (the establishment charges of the Chief Office being £339,545).

LANCASTER. DUCHY OF.

Office, Lancaster Place, Strand, W.C.

Lancaster was erected into a "Palatine" Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 merged into the Crown through the accession of Henry IV. Its revenues have always been kept separate, though vested in the Sovereign and his heirs. The Judicature Act has left only the Chancery Court of the Duchy, but while the Chancellor is a Political Officer of the Government, and may or may not be learned in the law, a lawyer is appointed Vice-Chancellor. The accounts of the Duchy for the year 1908-9 will be found on p. 465.

Chancellor, Rt. Hon. J. A. Pease, M.P.....£2,000

LOCAL GOVERNMENT BOARD,

Whitehall, S.W.

The Local Government Board was created by the Local Government Board Act, 1871, and consists of the Lord President of the Council, the Secretaries of State, the Lord Privy Seal, the Chancellor of the Exchequer, and a Political President. The functions of the Board and of various Local Bodies were dealt with on p. 341 of the 1905 issue. The administrative expenses of the Board were estimated at £271,849 in 1910-11.

Resident Supt. House of Lords, J. K. Williams ...£300

METEOROLOGICAL OFFICE,
South Kensington, S.W.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all oceans, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and storm warnings are based, and other work incidental thereto. The Kew Observatory at Richmond and the Observatory at Eskdalemuir formerly in connexion with the National Physical Laboratory are now administered by this Office. The administrative expenses are met by a Government grant, which amounts to £16,850 annually.

Director and Chairman of Committee, W. N. Shaw, LL.D., SC.D., F.R.S.

Marine Superintendent, Comm. M. W. Campbell Hepworth, C.B., R.D., R.N.R.

1st Class Clerks, W. Allingham; T. D. Bell; F. J. Brodie; J. E. Cullum (*Valencia Observatory*); C. Harding; H. Harries.

MINT, THE ROYAL, Tower Hill, E.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £350,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I., and the last Warden was Lord Maryborough (1814–23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £169,438 for 1910–1911.

Master and Worker, Chancellor of the Exchequer.
Deputy Master and Engraver of H.M. Seals, Rt. Hon. William Grey Ellison-Macartney £1,500
Chief Clerk, F. L. D. Matthews ..... £500 to £700
Sen. Clerk & Reg., D. J. Scourfield ..... £300 to £400
Staff Clerk, C. T. Folkerd ..... £300 to £400
Superintendent, Operative Department, Edward Rigg, I.S.O., M.A. ..... £700 to £900
Assistant do., T. R. Sacheverell; W. J. Hocking ..... £360 to £500
Chemist and Assayer, T. K. Rose, D.Sc. ... £700 to £900
Assistant Assayers, S. W. Smith, B.Sc.; J. Phelps, M.A. ..... £350 to £550

Branches of the Royal Mint.

Sydney, New South Wales.
Deputy Master, E. H. S. von Arnheim £1,100
Superintendent, D. J. K. Colley ..... £550 to £750

Melbourne, Victoria.
Deputy Master, E. S. Wardell £1,100
Superintendent, M. L. Baggs ..... £800 to £900

Perth, Western Australia.
Deputy Master, J. F. Campbell £1,100
Superintendent, A. Ventris ..... £700 to £800

Ottawa, Canada.
Deputy Master, J. Bonar, LL.D. ..... £900 to £1,100
Superintendent, A. H. W. Cleave ..... £650 to £900

MUSEUM, THE BRITISH, Bloomsbury, W.C.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1857, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Act of 1842, which secures a copy of every publication for the Library. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £175,895 (including Natural History Museum) in 1910–11, and were met by a vote under "Education, Science, and Art." Class IV. of the Civil Service Estimates.

Director and Principal Librarian, Frederic George Kenyon, F.B.A., D.Litt. £1,500
Assistant Secretary, A. R. Dryhurst ..... £600 to £700
Assistant, 1st Class, E. B. Nicholson, B.A. £300 to £500
Clerk in Charge of Accounts, C. P. Cooke £400 to £500
Minor Staff Officers, J. Knowles; J. F. Isaac ..... £300 to £400
Keeper of Printed Books, George K. Fortescue, LL.D. ..... £700 to £800
Assistant Keepers, Arthur W. Kaye Miller, M.A.; George F. Barwick, B.A.; A. W. Pollard, M.A. ..... £520 to £650
Superintendent of Reading Room, G. F. Barwick, B.A.
Assistants, 1st Class, Cyril J. Davenport, V.D., F.S.A.; W. Barclay Squire, M.A., F.S.A., F.R.G.S.; J. A. J. de Villiers; L. H. E. Taylor; Robert F. Sharp, B.A.; R. A. Streatfeild, B.A.; F. D. Sladen, B.A.; H. Symons, B.A. ..... £300 to £500
Assistants, 2nd Class, P. Wilson, M.A.; L. C. Wharton, B.A.; G. D. R. Tucker, M.A.; W. A. Marsden, B.A.; H. Thomas, D.Litt.; A. J. K. Esdaile, B.A.; J. V. Scholderer, M.A.; F. W. Jekyll, B.A.; A. Forbes Johnson, B.A.; F. C. W. Hiley, M.A.; A. I. Ellis, M.A.; H. Mattingly, M.A.; I. A. K. Burnett, M.A.; F. P. Sprent, B.A.; E. W. B. Lynam, B.A. ... £150 to £300
Keeper of Manuscripts and Egerton Librarian, G. F. Warner, F.B.A., D.Litt. ..... £700 to £800
Assistant Keepers of MSS., I. H. Jeayes; J. P. Gilson, M.A. ..... £520 to £650
Assistants, 1st Class, Henry John Ellis; John A. Herbert, B.A.; A. Hughes-Hughes; D. T. Baird Wood, M.A. ..... £300 to £500
Assistants, 2nd Class, H. Idris Bell, M.A.; R. E. W. Flower, B.A.; A. C. Stewart, M.A.; G. T. Hales, B.A. ..... £150 to £300
Keeper of Oriental Printed Books and MSS., Lionel D. Barnett, Litt.D. ..... £700 to £800
Assistants, 1st Class, Rev. G. Margoliouth, M.A.; Lionel Giles, M.A. ..... £300 to £500
Assistant, 2nd Class, Edward Edwards, M.A. £150 to £300
Keeper of Prints and Drawings, Sidney Colvin, D.Litt. ..... £700 to £800
Assist. do., R. Laurence Binyon, B.A. ..... £520 to £650
Assistant, 1st Class, Campbell Dodgson, M.A. ..... £300 to £500
Assistant, 2nd Class, A. Mayger Hind, B.A. ..... £150 to £300
Keeper of Egyptian and Assyrian Antiquities, Ernest A. Wallis Budge, Litt.D. ..... £700 to £800
Assistants, 1st Class, L. W. King, M.A., F.S.A.; H. R. H. Hall, M.A. ..... £300 to £500
Assistants, 2nd Class, P. D. Scott-Moncrieff, M.A.; F. S. P. Handcock, B.A. ..... £150 to £300
Keeper of Greek and Roman Antiquities, Arthur H. Smith, M.A., F.S.A. ..... £700 to £800
Assistant, 1st Class, H. B. Walters, M.A., F.S.A. ..... £300 to £500
Assistants, 2nd Class, F. H. Marshall, M.A.; E. J. Forsdyke, B.A. ..... £150 to £300
Keeper of British and Mediæval Antiquities and Ethnography, C. H. Read, LL.D., P.S.A. £700 to £800
Assistant do., O. M. Dalton, M.A., F.S.A. £520 to £650
Assistants, 1st Class, R. L. Hobson, B.A.; R. A. Smith, B.A., F.S.A. ..... £300 to £500
Assistant, 2nd Class, T. A. Joyce, M.A. ... £150 to £300
Keeper of Coins and Medals, H. A. Grueber, F.S.A. ..... £700 to £800
Assist. Keeper, W. W. Wroth ..... £520 to £650
Assistant, 1st Class, G. F. Hill, M.A. ..... £300 to £500
Assistants, 2nd Class, John Allan, M.A.; G. C. Brooke, B.A. ..... £150 to £300
Solicitors, Messrs. Warrens, 99 Gt. Russell Street.

MUSEUM, THE NATURAL HISTORY, Cromwell Road, S.W.

The Natural History Collections in the British Museum were removed to South Kensington in 1881, the new museum being opened in the same year. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £57,202 (*plus* £8,200 under Class I.—Office of Works) in 1910–11.

Director, L. Fletcher, M.A., F.R.S. £1,200
Assistant Secretary, Charles E. Fagan £700
Assistant, 1st Class, Basil H. Soulsby, B.A., F.S.A. ..... £300 to £500
Clerks, W. H. R. Holl; W. J. Anderson ... £95 to £350
Assistant, 1st Class (Library), B. B. Woodward... £500
Keeper of Zoology, Dr. Sidney F. Harmer, M.A., F.R.S. £800
Assistant Keeper, Edgar A. Smith, I.S.O. £650
Assistants, 1st Class, George A. Boulenger, F.R.S.; Oldfield Thomas, F.R.S.; Fras. Jeffrey Bell, M.A.; W. R. Ogilvie Grant; Sir George Francis Hampson, Bart.; Charles J. Gahan, M.A.; Randolph Kirkpatrick; Francis A. Heron, B.A.; Dr. W. T. Calman; Ernest E. Austen; C. T. Regan, M.A.; J. H. Durrant ..... £300 to £500
Assistants, 2nd Class, G. J. Arrow; A. S. Hirst; J. G. Dollman, B.A.; W. P. Pycraft; G. Meade-Waldo, B.A.; F. W. Edwards, B.A.; K. G. Blair, B.Sc.; G. C. Robson, B.A. ..... £150 to £300
Keeper of Geology, Dr. A. S. Woodward, F.R.S. ...£800
Assistant do., Dr. F. A. Bather, F.R.S. £650
Assistants, 1st Class, R. B. Newton; Dr. C. W. Andrews, F.R.S.; G. C. Crick ..... £300 to £500
Assistant, 2nd Class, W. D. Lang, B.A. ...£150 to £300
Keeper of Mineralogy, Dr. George T. Prior, M.A. ..... £700 to £800
Assistants, 1st Class, L. J. Spencer, M.A.; Dr. G. F. H. Smith, M.A. ..... £300 to £500
Assistant, 2nd Class, W. Campbell Smith, B.A. ..... £150 to £300
Keeper of Botany, Dr. A. B. Rendle, F.R.S. £800

Assistants, 1st Class, A. Gepp, M.A. ; E. G. Baker
.....£300 to £500
Assistants, and Class, H. F. Wernham, B.A. ; J. Ramsbottom, B.A. ; A. J. Wilmott, B.A. .....£150 to £300

NATIONAL DEBT OFFICE,
19 Old Jewry, E.C.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38 Vic., c. 45), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £14,092 in 1910-11.

Comptroller-General, Sir George Hervey, K.C.B. £1,500
Private Secretary, J. J. Bree £100
Assistant Comptroller, W. G. Turpin .....£800 to £1,000
Actuary, James Blakey, I.S.O. £250
Chief Clerk, A. T. King, I.S.O. £800
Principal Clerks, J. Blakey ; F. M. Ashley ; C. von Berg ; H. Manwaring .....£600 to £700
Assistant do., T. Gowland, £400 to £500 ; G. F. Ansell ; E. R. Kennedy ; H. Weatherill ; W. F. Doust .....£350 to £450
Brokers, Messrs. Mullens, Marshall & Co. £1,500

NATIONAL GALLERY, Trafalgar Square, S.W.

The National Gallery is the result of a Parliamentary grant of £37,000 in 1824 for the purchase of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876 and 1887.

Director, Sir Charles Holroyd £1,000
Keeper and Secretary, Hawes Turner £750

NATIONAL GALLERY, BRITISH ART
(The Tate Gallery), Millbank, S.W.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection.

Director, Sir Charles Holroyd .....*(see above)*
Keeper, D. S. MacColl .....£350 to £500

NATIONAL PHYSICAL LABORATORY,
Teddington, Middlesex.

The National Physical Laboratory, founded in 1899 for standardising and verifying instruments, for testing materials and for the determination of physical constants, is controlled by a Board representing the Royal Society and the great Technical Societies. In addition to capital sums, an annual grant of £8,000 is contributed by H. M. Treasury ; and subscriptions from the Technical Societies and other sources amount to about £1,000 a year. The Laboratory comprises departments of Physics, Engineering and Metallurgy. The Physics Department comprises Thermometric, Electrical, Metrological, and Optical Divisions. At Teddington is the National Experimental Tank for experiments on ship models, recently constructed. A special division has also been formed in the Engineering Department for research in Aeronautics.

Chairman, The President of the Royal Society.
Do. of Executive Committee, Lord Rayleigh, O.M., F.R.S.
Director, R. T. Glazebrook, D.Sc., F.R.S.
Supt. Observatory Dept., Richmond, Charles Chree, LL.D., F.R.S.
Chief Assist. Observatory Dept., T. W. Baker, F.R.Met.Soc.
Supt. Engineering Dept., T. E. Stanton, D.Sc.
Supt. Metallurgical Dept., W. Rosenhain, D.Sc.
Senior Asst., Physics Dept., J. A. Harker, D.Sc., F.R.S.
Supt. National Experimental Tank, G. S. Baker.

NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cross, W.C.

The first grant to the institution was made in 1857 ; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander.

Director, Keeper, and Secretary, C. J. Holmes
.....£500 to £600
Clerk and Actg. Asst. Keeper, J. D. Milner.

NAUTICAL ALMANAC OFFICE,
3 Verulam Buildings, Gray's Inn, W.C.

The "Nautical Almanac" was first published in 1767, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £3,764 in 1910-11.

Superintendent, P. H. Cowell, D.Sc., F.R.S. £650
Chief Assistant, P. L. Davis, F.R.A.S. .....£400 to £500
Assistants, W. H. Walmsley, B.Sc., F.R.A.S. ; B. F. Bawtree ; J. A. Sprigge ; W. F. Deak, M.A., F.R.A.S. ; T. C. Hudson, B.A., F.R.A.S. .....£100 to £400

OBSERVATORIES.

Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory were estimated at £10,739 in 1910-11.

Astronomer Royal, F. W. Dyson, F.R.S., F.R.A.S. £1,000
Chief Assistants, A. S. Eddington, M.Sc., F.R.A.S. (and a vacancy) .....£500 to £600
Assistants, Edward W. Maunder, F.R.A.S. ; Thomas Lewis, F.R.A.S. ; William G. Thackeray, F.R.A.S. ; H. P. Hollis, B.A., F.R.A.S. ; Andrew C. D. Crommelin, D.Sc., F.R.A.S. ; W. M. Bryant, B.A., F.R.A.S. *(Magnetic and Meteorological)* .....£320 to £450
Clerical Assistant, H. Outhwaite.....£250 to £350

Royal Observatory, Cape of Good Hope.—£9,438.

Astronomer, S. S. Hough, M.A., F.R.S. ....£900 to £1,000
Chief Assist., J. K. E. Halm, Ph.D., F.R.A.S.
.....£700 to £800
Assistants, W. H. Cox ; J. Lunt, D.Sc. ; R. T. Pett ; J. Power.....£350 to £500
Clerical Assistant, Arnold Pilling.....£350 to £450

PATENT OFFICE,
25 Southampton Buildings, W.C.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties are performed by a Comptroller-General with a staff of officials. The administrative expenses were estimated at £134,251 in 1910-11.

Comptroller-General, W. Temple Franks.....£1,500
Private Secretary, A. J. Martin.....£100
Registrar of Designs and Trade Marks, R. Griffin
.....£1,100
Chief Examiner, H. Hatfield, I.S.O. £1,200
Chief Clerk, W. G. L. Webb £1,000
Supervising Examiners, A. Cliff* ; W. Martin ; A. R. Wright ; W. H. D. Clark .....£700 to £800
Principals, F. W. Hodges, £650 to £850 ; R. P. Chope ; A. Neeves.....£650 to £800
Librarian, E. W. Hulme £650
Examiners, H. J. Adams ; F. Ogden ; P. H. Cathcart ; W. Groves ; J. E. Needham ; A. S. A. Ormsby ; F. M. Sexton ; J. Gray ; A. Sutton ; A. F. Ravenshear ; P. Gossling ; G. Rutherford* ; H. Lewis ; H. O. Mintz* ; T. E. Lones ; H. Newton ; W. A. Stiven ; R. Jenkins ; L. Bolton ; A. Whitwell ; J. H. Tomlinson ; R. Sandon ; W. Martin ; C. H. Powell ; T. H. Muras ; J. Reeves ; J. Layzell ; F. J. Cheshire ; T. H. Denning .....£550 to £700
Deputy Examiners, G. Gibbens ; C. C. Starling ; J. T. Walls ; A. E. Chipperfield ; W. Sackfield ; A. G. Page ; R. Adams ; W. S. Barratt ; H. J. Haycraft ; G. F. Hambly ; R. W. Simmonds ; F. Fisher ; F. W. Dunn ; W. A. Taylor ; E. A. Gero ; S. A. Willmott ; T. T. Bedford ; A. Nicholls ; R. J. Sowter ; F. Charlesworth ; A. S. Cox ; D. Robinson ; R. T. G. French ; J. W. Barker ; F. P. Johns ; M. F. Levey ; A. J. Wilson ; D. Walton ; A. Wilson ; F. G. Smith ; V. Lough ; F. Ackroyd .....£400 to £550
Assistant Examiners, J. J. Lee ; H. J. Wickham ; V. G. Alexander ; B. Moss ; H. W. Heath ;

* Receives an allowance of £100 for special duty

PORT OF LONDON AUTHORITY.

Head Office, 109 Leadenhall Street, E.C.

Office for River Dept., Victoria Embankment, E.C.

The Port of London Authority, established under the Port of London Act, 1908 (8 Edw. VII., ch. 68), on the 31st March, 1909, for the purpose of administering, preserving, and improving the Port of London, consists of 30 members—12 appointed and 18 elected.

The following undertakings were transferred to the Port Authority as from the 31st March, 1909:—Thames Conservancy (all rights, powers, and duties of the Conservators of the Thames in respect of the river below Teddington); London and India Docks Company; Surrey Commercial Dock Company; Millwall Dock Company; and Watermen's Company, except certain property and funds.

Chairman, The Lord Devonport (*appointed by the Board of Trade*).

APPOINTED MEMBERS.

By the Admiralty, Admiral A. M. Field, F.R.S.; (*Board of Trade*) S. E. Bates, J. G. Broodbank, H. Gosling; (*Corporation of London*) J. W. Domoney, Lord Ritchie of Dundee; (*Lond.C.C.*) J. Anderson, J. Duthie, Sir J. McDougall, W. H. Pannell; (*Trinity House*) Captain A. W. Clarke.

ELECTED MEMBERS.

The first elected members have been appointed by the Board of Trade. In future 17 are to be elected by payers of dues, wharfingers and owners of river craft, and one by wharfingers.

I. H. Benn, M.P.; C. E. Brightman; C. Charleton; Sir E. Cornwall, M.P.; G. T. Crosfield; Lord Furness; C. F. Leach; L. A. Martin; H. T. Moore; Sir O. Philipps, K.C.M.G., M.P.; E. G. Saltmarsh; C. F. Torrey; Sir M. C. Turner; F. S. Watts; W. Weddel; R. White; W. Varco Williams.

General Manager & Secretary, Robert Philipson.

Chief Engineer, F. Palmer, C.I.E., M.I.C.E., &c.

Dock and Warehouse Manager, H. H. Watts.

Harbour Masters, (*Upper District*) Capt. R. S. Pasley, Temple Pier, E.C.; (*Lower District*) Capt. F. W. Kershaw, Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and, while efficiently discharging its multifarious duties, shows an annual profit of about £4,000,000, and also collects a large sum for the Inland Revenue Department. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1868, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The administrative expenses of the Post Office were estimated at £19,828,256 in 1910-11, viz.: Postal Services, £13,102,250; Packet Services, £760,224; Telegraph Services, £3,923,436; and Telephone Services, £2,042,246.

Postmaster-General, Rt. Hon. Herbert L. Samuel, M.P. £3,500

Private Secs., K. Kerr, £450; H. F. Sambrook, £150; Sir John N. Barran, Bart., M.P. .....*unp.*

PRIVY COUNCIL OFFICE, Whitehall, S.W.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now combined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on p. 128. Members of the Cabinet must be Privy Councillors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet

Lord President of the Council, The Viscount Morley of Blackburn, O.M. £2,000
Private Sec., G. Cunningham £300
Clerk of the Council, Sir Almeric W. FitzRoy, K.C.V.O. £1,500

Principal Clerk (in charge of accounts), F. W. B. Godrich..... £500 to £600

QUEEN ANNE'S BOUNTY, 3 Dean's Yard, S.W.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignitaries, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £300 in net annual value. The total amount distributed in 1909 was about £24,876. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, and in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.
Chief Clerk, Wm. Lipscomb.
First Class Clerks (Senior Division), George Simpson; Henry Groves; John F. Sapsford; V. Gonville Bromhead; R. G. Rowland.

THAMES CONSERVANCY,
2 Norfolk Street, Strand, W.C.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 12 Conservators in 1857, the powers being reconstituted in 1894. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.

Chairman, Lord Desborough, K.C.V.O.
Secretary, F. W. Geary

TRADE, BOARD OF,
Whitehall Gardens and Gwydyr House, Whitehall, S.W.

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1786. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Railway, Tramway, Water and Gas Companies, Electric Lighting, Harbours and Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the Trinity House accounts. The administrative expenses were £319,700 in 1909-10.

TREASURY, Whitehall, S.W.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1612. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is, *ex officio*, Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Patronage Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers on which he lays before Parliament the Budget, a Budget, which the Chancellor expounds to the House, these plans being accepted, modified, or rejected by the House.

FIRST LORD OF THE TREASURY—
The Rt. Hon. Herbert Henry Asquith, K.C., M.P. (*Prime Minister*) £5,000

Receiver, Thomas Edward Kebbel, M.A.

TRINITY HOUSE, Tower Hill, E.C.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren. The present duties of the Elder Brethren have reference to Pilotage, Lighthouses, Buoys, Beacons, &c., and attendance at the Admiralty Court to act as assessors, also to advise the Board of Trade in nautical matters. There are ten Acting Elder Brethren, of whom one is a retired officer of the Royal Navy and one retired Commanders in the Mercantile Marine; there are also two Elder Brethren who have retired from the Acting List and eleven Honorary Elder Brethren. The income of the Corporation derived from light dues levied on shipping entering and leaving British ports amounts to £300,000 per annum, which is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

ELDER BRETHREN.

H.M. The King; Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G. (*Master*); Capt. H. Acton Blake (*Deputy Master*); Capt. Sir G. R. Vyvyan, K.C.M.G. (*retired*); Capt. E. Barlow (*retired*); Rt. Hon. Lord George Hamilton, G.C.S.I.; Rear-Adm. H. B. Stewart; The Earl of Rosebery, K.G., K.T.; Capt. A. E. Bell; Capt. A. S. Thompson, C.B.; Capt. A. W. Clarke; Capt. R. Hoare; Rt. Hon. J. Chamberlain, M.P.; Capt. L. H. Crawford, C.B.; Rt. Hon. A. J. Balfour, M.P.; The Earl of Selborne, K.G.; Vice-Adm. H.S.H. Prince Louis of Battenberg, G.C.B.; Capt. O. P. TRUSTEE SAVINGS BANKS,

INSPECTION COMMITTEE, 9 Serle Street, W.C.

Trustee Savings Banks were first made the subject of legislation in 1816, and an Inspection Committee was appointed in 1891. The funds deposited with the Government amounted in 1909 to £55,025,009 (cash and stock) held on behalf of 1,804,805 depositors—an increase during the year of 19,093 depositors and £549,307 in funds.

Chairman, Sir Albert K. Rollit, D.C.L.
Vice-Chairman, Thomas A. Welton, F.C.A.
Secretary, W. S. Cameron.

WALLACE COLLECTION.

Hertford House, Manchester Square, W.

The Wallace Collection was bequeathed to the nation by the widow of Sir Rd. Wallace, Bt., K.C.B., M.P., in 1897 and Hertford House was subsequently acquired by the Government. The expenses were estimated at £7,191 in 1910-11.

Keeper & Secretary, Claude Phillips ..... £500 to £600
Inspector of Armouries, Guy F. Laking, M.V.O., F.S.A. *hon.*
Clerk, S. J. Camp ..... £100 to £300

WAR OFFICE, Whitehall, S.W.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army Annual Act of 1909 (9 Edw. VII. c. 3).

For **Army Council and Departments and Staffs of the War Office,** *see* pp. 224–6.

WOODS, FORESTS, AND LAND REVENUES.

Temporary Office, 83 Pall Mall, S.W.

The Land Revenues of the Crown in the United Kingdom, now under the management of the Commissioners of Woods, have been collected on the public account since 1760, when King George III. surrendered them and received in return an addition to his Civil List.

BORSTAL INSTITUTIONS.
(Borstal, Kent, Feltham, Middlesex, and Aylesbury (Girls)).
Gov. (*Borstal*), Capt. W. V. Eccles.

AN INCH OF RAIN.

THE statistics concerning rainfall are expressed in "inches," and are based upon observations recorded at the Royal Observatory, Greenwich. The expression "an inch of rain" refers to the marks upon a standard rain gauge, the amount of rain equivalent to the distance between two such marks being represented by nearly 101 tons over an acre of land, as follows:—

An inch of rain on the surface of an imperial acre = 43,560 sq. feet = 3,630 cubic feet = 100 993 tons.

The Navy List.

THE KING.

Naval Expenditure of the Powers.

THE following table deals with the Naval Expenditure and Construction of the seven principal Naval Powers of the World, the figures relating to the United Kingdom excluding the cost of Pensions, Coastguards, Reserves, Subsidies to Steamship Lines, and Naval Works, in order that a true comparison may result with the remaining countries, which do not include votes for such purposes:—

NAVAL POWER.	TOTAL EXPENDITURE.			FOR NEW CONSTRUCTION AND ARMAMENT.			TONNAGE OF VESSELS LAUNCHED.	
	1908.	1909.	1910.	1908.	1909.	1910.	1908.	1909.
	£	£	£	£	£	£	Tons.	Tons.
United Kingdom	32,181,309	35,831,800	40,603,700	8,660,202	11,227,194	14,957,430	77,202	92,957

The Union Jack Club, 91A Waterloo Road, London, S.E.

Patron-in-Chief, HIS MAJESTY THE KING. *Patroness-in-Chief*, HER MAJESTY THE QUEEN.

Patron, H.R.H. THE DUKE OF CONNAUGHT. *Patroness*, H.R.H. THE DUCHESS OF CONNAUGHT.

Object.—To promote the welfare and ameliorate the condition of sailors, soldiers, and marines; to maintain and conduct a residential club for their use, and to provide a club-house and all conveniences in connexion therewith.

The Union Jack Club was opened on 1st July, 1907, by His late Majesty King Edward VII. The Club, which is run on ordinary club lines, was erected by public subscription as a national memorial to sailors, soldiers, and marines who had died in the service of their country, for the use of Warrant Officers, Petty Officers, N.C.O.'s, and men in the Royal Navy, Army, and Royal Marines. The accommodation now includes 355 separate bedrooms, baggage room, baths, billiard-room (6 tables), barber's shop, dining-room, library and reading-room, smoking-room, coffee and writing-room, bicycle-shed, lockers, &c., &c. Since the opening of the Club to the 31st Oct., 1910, sleeping accommodation for 227,047 has been provided, of whom 114,044 were sailors and marines, and 113,003 soldiers. The need for additional bedrooms became so urgent that the extension wing, containing 147 extra rooms, was built in 1910. Notwithstanding this extension wing, the demand for bedrooms at holiday times and many week-ends is far in excess of the 355 available, and numbers have to be sent to selected lodging-houses and hotels in the neighbourhood. Great use of the Club is also constantly made for a few hours by service men passing through London. An annual report and balance sheet is issued every year and sent to all representative members, who consist of Warrant Officers, Petty Officers, N.C.O.'s, or men elected by the various ships and regiments, and to the individual members of the Association, together with a notice convening the Annual General Meeting in May.

Subject to the control of the Council, the affairs of the Club are managed by a General Committee, which includes six Warrant Officers, Petty Officers, N.C.O.'s, or men, who are elected annually from amongst the members.

A scheme is in process of being worked out, to which it is expected practical effect will be given in the near future, to provide a hostel for the wives and children of members when staying in, or passing through, London.

President of Council and Chairman of Committee, Col. Sir E. W. D. Ward, K.C.B., K.C.V.O. *Vice-President*, F. C. Wallis, F.R.C.S. *Hon. Treasurer*, G. J. Marjoribanks. *Comptroller and Secretary*, Major E. F. O. Gascoigne, D.S.O. *Telegrams*, "Anchorable, London." *Telephone*, Central 14298.

OFFICERS OF THE ORDERS OF KNIGHTHOOD.

GEORGE (1818). *Auspicium melioris ævi.*—THE SOVEREIGN; *Grand Master and First or Principal Knight Grand Cross*, H.R.H. the Prince of Wales, K.G., K.T., K.P., G.C.S.I., G.C.I.E., G.C.V.O., I.S.O.; *Prelate*, Rt. Rev. Henry Hutchinson Montgomery, D.D.; *Chancellor*, His Grace The Duke of Argyll, P.C., K.T., G.C.M.G., G.C.V.O.; *Secretary*, Sir F. J. S. Hopwood, G.C.M.G., K.C.B.; *King of Arms*, Sir M. F. Ommanney, G.C.M.G., K.C.B., I.S.O.; *Registrar*, Sir C. P. Lucas, K.C.M.G., C.B.; *Officer of Arms*, Sir William Alexander Baillie-Hamilton, K.C.M.G., C.B.; *Chancery*, Colonial Office, S.W.—G.C.M.G., Knight Grand Cross; K.C.M.G., Knight Commander; C.M.G., Companion.

THE MOST EMINENT ORDER OF THE INDIAN EMPIRE (1878). (Since enlarged five times.) *Imperatoris auspiciis.*—THE KING-EMPEROR; *Grand Master*, The Viceroy and Governor-General of India for the time being.—G.C.I.E., Knight Grand Commander; K.C.I.E., Knight Commander; C.I.E., Companion.

THE ROYAL VICTORIAN ORDER (1896). —THE SOVEREIGN; *Chancellor*, The Lord Chamberlain; *Secretary*, The Keeper of His Majesty's Privy Purse. —G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Member, marked 4th or 5th Class.

THE KNIGHTS BACHELOR do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood, and, strictly speaking, now rank as a Degree. Following on the establishment of the Central Chancery of the Orders of Knighthood, the Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights Bachelor" was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*President*, Sir Henry Pellatt, C.V.O.; *Hon. Registrar*, Sir William Bull, Kt., M.P.; *Hon. Secretary*, Willoughby Bullock, Esq.; *Offices and Library*, 3, Stone Buildings, Lincoln's Inn, W.C.

*The Deans and Chapters of certain Dioceses marked * in the following pages preferred several years ago to take, in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income; they are consequently suffering more or less from the agricultural depression of recent years.*

*Canterbury. £15,000.

Archbishop and Primate of All England, Rt. Hon. and Most Rev. Randall Thomas Davidson, D.D., G.C.V.O. (*cons.* 1891), 1903. (Lambeth Palace, S.E.) [Signs Randall Cantuar.]

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Birmingham; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwark; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester.

Lower House.

Prolocutor, The Very Rev. the Dean of Windsor.
The Very Rev. the Deans; the Venerable the Archdeacons; and the Elected Proctors.
Registrar, Harry Wilmot Lee, 3 Creed Lane, Ludgate Hill, E.C.
Actuary, Hugh Childers.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of Durham; Ripon; Chester; Newcastle; Wakefield; Liverpool; Manchester; Carlisle; Sodor and Man.

Lower House.

Prolocutor, Rt. Rev. the Bishop of Beverley, D.D.
The Very Reverend the Deans of the Province; the Venerable the Archdeacons; and the Elected Proctors.
Registrar, Hen. A. Hudson, Minster Yard, York.

THE HOUSES OF LAYMEN.

The House of Laymen for the Province of Canterbury, as also for that of York, consists of members elected by the various Diocesan Conferences, who are themselves elected by the Laity of their respective Parishes or Rural Deaneries. The members are elected with every fresh Parliament.

Royal Commissions.

ROYAL COMMISSIONS sitting as at 1 Nov., 1910:—

Ancient and Historical Monuments and Constructions (England)—Scotland House, Victoria Embankment, S.W.; *Sec.*, George H. Duckworth.

Ancient Monuments (Scotland)—29, St. Andrew Square, Edinburgh; *Sec.*, Alex. O. Curle, B.A., W.S., F.S.A.

Ancient Monuments (Wales)—Royal Commissions House, Old Palace Yard, S.W.; *Sec.*, Edward Owen, F.S.A.

Canada and West Indies Trade Relations—Colonial Office, S.W.; *Sec.*, H. R. Cowell.

Canals and Inland Navigation—54, Victoria Street, S.W.; *Sec.*, R. W. Dunwoody, A.M.I.C.E.

Church of England in Wales—68, Victoria St., S.W. (about to report).

Coast Erosion and Afforestation—Scotland House, Victoria Embankment, S.W.; *Sec.*, C. H. Grimshaw.

Divorce and Matrimonial Causes—Winchester House, 21, St. James's Square, S.W.; *Sec.*, Hon. H. Gorell Barnes.

Electoral Reform—Treasury, S.W.; *Sec.*, E. Hilton Young, M.A.

Historical MSS.—Rolls House, Chancery Lane, E.C.; *Sec.*, R. A. Roberts.

Irish Railways (Vice-Regal Commission)—13, St. Stephen's Green, Dublin; *Sec.*, G. E. Shanahan.

Land Transfer Acts—Royal Commissions House, Old Palace Yard, S.W.; *Sec.*, John Felix Waley.

Mines and Mines—Winchester House, 21, St. James's Square, S.W.; *Joint Secs.*, F. E. Bettany and G. W. Christal.

National University of Ireland—Earlsfort Terrace, Dublin; *Sec.*, Joseph M'Grath, LL.D.

Public Records—Royal Commissions House, Old Palace Yard, S.W.; *Sec.*, Hubert Hall, F.S.A.

Sewage Disposal—Royal Commissions House, Old Palace Yard, S.W.; *Sec.*, R. H. H. Keenlyside.

Tuberculosis Commission—Royal Commissions House, Old Palace Yard, S.W.; *Sec.*, Edward J. Steegmann, M.B.

University Extension in London—72, Queen Anne's Gate, S.W.; *Joint Secs.*, J. Kemp and H. F. Heath.

Vivisection—Scotland House, Victoria Embankment, S.W.; *Sec.*, Capt. Hon. Clive Bigham, C.M.G.

Colonial and Missionary Bishops of the Church of England.

St. Patrick's National Cathedral, Dublin.

Dean and Ordinary, Very Rev. John Henry Bernard, D.D., D.C.L.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representat ves (viz., 208 clerical and 416 lay)

Honorary Secretaries, Ven. Wm. Colquhoun, B.D. ; Ven. I. K. Latham, D.D. ; Sir J. C. Meredith, LL.D. ; Capt. R. Wade Thompson.

Secretary to the Representative Church Body (incorporated 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the General Synod, which meets annually.

Subject to the General Synod are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz. :—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital now amounts only to £408,517, charged with annuities to 101 annuitants. The funds, however, in the custody of the Representative Body amount in all to £9,087,534, made up of *Commutation* £408,517, *Parochial Sustentation* £5,690,444, *Episcopal Sustentation* £563,613, *Glebes purchased* £355,115, *Miscellaneous purposes* £2,017,397, and *Balances* £52,446.

Since 1869, members of the Church have paid in to the Representative Body a total sum of £7,117,478. The interest of the Parochial Sustentation Fund is approximately £211,706. The total amount of *assessment* for stipend paid by parishes, 1909, was £100,575, and the total amount paid for *stipends* under Diocesan Schemes was £272,482.

The number of members of the Church of Ireland, by the Census of 1901, was 581,089, or 13·0 per cent. of the entire population.

Churches, Mission Stations, &c., 404. Parsonages, 149. Clergy, 350. Communicants, 52,029.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are over 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1909 was 711,211. The sum of £526,700 was raised in 1908 for church and missionary purposes. Within the last 50 years 457 chapels, at a cost of £1,695,455, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1428. There are in addition 275 churches and mission stations, in all of which worship is regularly conducted. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves.—LORD HIGH COMMISSIONER, The Earl of Stair.

MODERATOR, 1910, Right Rev. Pearson McAdam Muir, D.D. *Agent*, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1909, there were 1,610 congregations and 27 preaching stations. The total membership exceeded 507,000, and there were 2,309 Sunday Schools, with 239,049 scholars and 25,221 teachers. In 15 Foreign Mission Fields there are 334 European Mission Agents and 4,216 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,178,648 0s. 3d. —*Offices*, 1 Castle Terrace, Edinburgh.

(2) *The Presbyterian Church in Ireland.* — According to the Census of 1901, the members of the various Presbyterian churches in Ireland were 443,494. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 649 ministers, 565 congregations, with 106,481 communicants, 85,779 families, 8,126 Sabbath-school teachers, and 94,728 scholars. During the year 1909-1910 this branch contributed by congregational effort £220,887 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £282,475. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 14 professors and 2 lecturers, and has 31 ministerial with 5 medical missionaries in foreign parts.—*General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 354 congregations, 10 preaching stations, and 86,421 members. It has a Theological College (Westminster College, Cambridge), and supports 82 missionaries abroad, including 34 women. In 1909 the amount raised for all purposes was £276,007.—*General Secretary*, Rev. W. M. Macphail, M.A. *Financial Sec.*, John Leggat, 7 E. India Avenue, E.C. *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C.

(4) The less numerous divisions are: The *Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington, in October, 1891, it was reported that there were more than 30,000,000 Methodists. This statement has been recently repeated by leading Wesleyans.—*Pres.*, Rev. J. Hornabrook; *Sec.*, Rev. S. Johnson.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings" the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. S. S. Henshaw.

3. *The Methodist New Connexion*, which was

formed in 1797 by the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference and at once founded a new community.

4. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.

5. *The United Methodist Free Churches*, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to leading Wesleyan officials was organised, which found expression in the Conference debates, but more strongly in anonymous pamphlets, on suspicion of being the authors and circulators of which three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

United Methodist Church.—The three latter denominations—the Methodist New Connexion, the Bible Christians, and the United Methodist Free Churches—secured an Act of Parliament in 1907 to authorise their union into one denomination, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline. A fund of 100,000 guineas was raised to commemorate the union.—*President*, Rev. H. T. Chapman; *Secretary*, Rev. J. Baxter.

6. *Independent Methodists.*—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.

Finances.—The *Wesleyans* raised in 1909–1910 £189,700 to sustain their very extensive missionary operations. At the same time their Home missionary income was £39,733; and £13,495 was expended for the training of candidates for the ministry, of whom there are 247 in the four theological colleges. The *Primitive Methodists* raised £25,686 for new chapels, and the *United Methodist Church* £13,151 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.	Ministers	Lay Preachrs.	Members	On Probation.	Chapels.	Sunday Scholars.

Wesleyan Reformers	22	532	7,859	337	197	22,310

Other Religious Denominations.

The INDEPENDENTS, or CONGREGATIONALISTS, in England come next to the Methodists; they are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated; in consequence great numbers repaired to North America; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902. There are 51 county and other Associations in England and Wales, with 4,666 churches and preaching stations containing 1,700,347 sittings; the number of ministers in the British Isles is 3,195. Of these 235 are temporarily without pastoral charge, 85 are engaged in collegiate and tutorial duties, 45 are occupied in secretarial work, and 422 by reason of age or ill-health have retired from pastoral duty. *Chairman of the Congregational Union of England and Wales*, 1910–11, Rev. C. Silvester Horne, M.A., M.P.; 1911–1912, Gerard N. Ford, J.P. *Secretary*, Rev. Richard J. Wells. *Office*, 16, Memorial Hall, Farringdon Street.

The *Countess of Huntingdon's Connexion*, with 42 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Sec.*, E. Dolby Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, London, W.C.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1909, 4,146 chapels and 2,120 pastors. The members numbered 422,455, Sunday-school teachers 59,195, and Sunday scholars 579,242. In the U.S. they form one of the most numerous religious bodies, the "members" alone numbering nearly 6,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy.—*President of the Baptist Union*, 1910–11, Sir George Watson Macalpine. *Sec.*, Rev. J. H. Shakespeare, M.A. *Office*, Baptist Church House, Southampton Row, London, W.C.

The WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, *q.v.* At the present time the body numbers—churches, 1,456; chapels and places of worship, 1,704; ministers and preachers, 1,310; deacons, 5,955; communicants, 184,558; on probation, 2,124; Sunday-school teachers, 28,447; scholars and teachers, 216,855; number belonging to the congregations (including communicants),

344,545. A sum amounting to £297,237 14s. 3d. was collected for various religious purposes in 1908. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language generally used in these schools. There are 329 English chapels and preaching stations with 27,575 communicants; all the rest are Welsh.—*Moderator of General Assembly*, Rev. Principal Owen Prys, M.A., Theological College, Aberystwyth. *Secs.*, Revs. J. Gwynoro Davies, Barmouth, and Maurice Griffith, M.A., Aberystwyth. *Statistical Secs.*, Rev. T. J. Morgan, Garn, Bowstreet, and Rev. E. Jones Evans, Walton, Liverpool.

The SALVATION ARMY is one of the most recent religious denominations, and one of the most successful. In Sept., 1910, the number of *Officers, Cadets* and *Employés* was 21,390, of *Corps* and *Outposts* 8,768, *Local Officers* 60,260. The number of countries occupied was 56, and of languages used 33. Connected with the Salvation Army are numerous philanthropic institutions, including 118 Rescue Homes for Fallen Women, 22 Maternity Homes and 37 Children's Homes, 149 Slum Posts, 17 Prison-Gate Homes, 229 Shelters and Cheap Food Depôts for the Homeless, 157 Workshops and Factories, 60 Labour Bureaux, 18 Farms, &c. GENERAL, Wm. Booth, 101 Queen Victoria St., London, E.C.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the **Unitarians**, with about 350 ministers, 345 chapels, and other places of worship. The **Society of Friends**, which consists of 19,348 members in Great Britain and Australasia, and 2,440 in Ireland, has 398 recorded ministers, including over 150 women; their places of worship, in 1909, numbered 434. The Friends support their own poor. *Central Office for Great Britain*, 136 Bishopsgate, E.C. Ireland has a separate organization, with *Office*, 6 Eustace Street, Dublin. The **Churches of Christ** have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The **Moravians** (*Offices*, 32 Fetter Lane, E.C.) have about 60 congregations and preaching stations. The **Catholic Apostolic Church** have above 80 churches; the New Church (**Swedenborgians**), 75 societies, with about 6,800 registered members; the Latter-Day Saints (**Mormors**) have 82 churches. Among the inhabitants of the United Kingdom are about 230,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers (*Chief Rabbi*, Dr. Hermann Adler, C.V.O., Chief Rabbi's Office, Finsbury Square, E.C.). The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at eleven millions. The Brethren, or **Plymouth Brethren**, have 23 places of worship in London and the suburbs. The Greeks have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and a mosque has been opened for Moslems.

The Roman Catholic Church.

IN *England* there are 1 Archiepiscopal and 15 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 30 Archiepiscopal and 109 Episcopal Sees, with 39 Vicariates and 11 Prefectures Apostolic, as follows:—

Balance due to Chest	3,243 15 2
	£56,274 5 7

THE UNIVERSITY OF LONDON, South Kensington, S.W. 1836 and 1900.

THE University was reconstituted in 1900, and has now an "Academic" Department for the organisation and control of higher education in its various constituent "Schools" and other Institutions throughout London, as well as an "External" Department for the continuation of its old functions of examining and conferring degrees upon students throughout the country and in all parts of the Empire.

Number entered by matriculation or otherwise in 1909–10, 4,053. Internal students at present time, 4,250.

Visitor, H.M. the King in Council.
Chancellor, Rt. Hon. Earl of Rosebery, K.G., K.T., D.C.L., LL.D., F.B.A., F.R.S.
Vice-Chancellor, Prof. M. J. M. Hill, SC.D., F.R.S.
Chairman of Convocation, Sir Edward Henry Busk, LL.B.
Principal, Henry Alexander Miers, D.SC., F.R.S.
Registrars: (*Academic Council*) P. J. Hartog, B.SC.; (*External Council*) A. Milnes, M.A.; (*University Extension*) R. D. Roberts, D.SC.
Secretary to the Senate, P. M. Wallace, M.A.
Sec. to Finance Committee, W. K. Hill, B.A.
Sup. of Examinations, W. H. Sampson, B.A.
Clerk of Committees, C. F. Treherry, D.SC.
Goldsmiths' Librarian, R. A. Rye.
Clerk of Convocation, H. E. Allen, LL.B.

Representative in Parliament, Sir Philip Magnus, B.SC.
Representative on General Medical Council, Frederick Taylor, M.D.
Public Orator, Prof. E. A. Gardner, M.A.
Esquire Bedell, H. E. Vincent, M.D.

THE SENATE.

The Chancellor, The Vice-Chancellor, The Chairman of Convocation. *By the Crown*, F. D. Acland, Hon. W. P. Reeves, Prof. A. Schuster, Sir John Wolfe-Barry. *By Convocation*—(*Divinity*), Rev. J. A. Douglas; (*Arts*), R. C. B. Kerin, Prof. S. L. Loney, Dr. T. L. Mears, Lord Justice Fletcher Moulton, Sir Albert Rollit; (*Laws*), The Master of the Rolls (Sir Herbert Cozens-Hardy); (*Music*), C. B. Edgar; (*Medicine*), Prof. Sir Thomas Barlow, Dr. E. G. G. Little; (*Science*), Dr. C. W. Kimmins, Sir Philip Magnus, Dr. G. T. Moody, Dr. J. Wade, Dr. R. M. Walmsley, Dr. S. R. Wells. *By Royal College of Physicians*, Sir William Allchin, Dr. F. Taylor. *By Royal College of Surgeons*, Prof. R. J. Godlee, Sir Alfred Gould. *Co-opted to represent University College*, Dr. T. Gregory Foster, Lord Reay. *Co-opted to represent King's College*, Dr. T. Buzzard. *By King's College* (*Theological Department*), Rev. Dr. A. C. Headlam. *By Lincoln's Inn*, Lord Macnaghten. *By Inner Temple*, Arthur Cohen. *By Middle Temple*, Dr. R. A. McCall. *By Gray's Inn*, C. A. Russell. *By Law Society*, J. W. Budd, H. J. Johnson. *By Corporation of London*, Ald. Sir Thomas B. Crosby. *By London County Council*, Sir Wm. Collins, Cyril Jackson. *By City and Guilds of London Institute*, Lt.-Gen. J. W. Laurie. *By the Faculties*—(*Theology*), Rev. Prof. W. H. Bennett; (*Arts*), Rev. Prof. A. Caldecott, Miss B. Edgell, Prof. M. J. M. Hill, Prof. A. F. Pollard; (*Laws*), C. V. Barrington; (*Music*), Prof. Sir Frederick Bridge; (*Medicine*), Dr. H. A. Caley, L. E. Hill, Prof. E. H. Starling; (*Science*), Prof. A. W. Crossley, J. L. S. Hatton, Pro . J. M. Thomson, Dr. A. D. Waller; (*Engineering*), Prof. J. D. Cormack; (*Economics*), Sidney J. Webb.

ORGANISATION OF TEACHING.

The Teaching of the University is organised under three categories:—(1) That conducted by the University itself; (2) that conducted by the several "Schools of the University"; (3) that conducted at the other Institutions at which there are "Recognised Teachers of the University."

The University.

University College, since January 1, 1907, is a "School of the University" in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics; and on January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, but is divided into two separate institutions, viz.: (*a*) "King's College" (in the Faculties of Arts, Laws, Medicine, Science, Engineering and Economics) and (*b*) "King's College for Women" (in the Faculties of Arts and Science). The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Matriculated students working at these Institutions in any of these Faculties are "Internal Students of the University." Other Institutions maintained directly by the University are the Brown Animal Sanitary Institution, Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, and Francis Galton Laboratory for National Eugenics at University College.

UNIVERSITY COLLEGE, Gower Street, W.C.
(1826).
Chairman of Committee, The Rt. Hon. Lord Reay G.C.S.I., LL.D.
Treasurer, Sir Felix Schuster, Bart.
Provost, T. Gregory Foster, PH.D.
Secretary, Walter W. Seton, M.A.
Lady Superintendent of Women Students, Ros Morison.
Librarian, R. W. Chambers, M.A.

KING'S COLLEGE, Strand, W.C.
(1829).
Principal, Rev. A. C. Headlam, D.D.
Vice-Principal, Prof. J. M. Thomson, LL.D. F.R.S.
Secretary, Walter Smith.
Librarian, F. W. Walton, M.A.
Warden of King's College for Women, Hilda I Oakeley, B.A.
Secretaries, Lucy Knowles and Hilda F Saunders.

GOLDSMITHS' COLLEGE, New Cross, S.E.
(1905).
Warden, William Loring, M.A.
Principal of Day Training Dept., The Warden.
Vice-Principals, do., T. Raymont, M.A.; Caroline Graveson, B.A.

PROFESSORS AND OTHER TEACHERS.

The Teaching Staff of the University is organised under two categories:—(1) "Appointed Teachers," *i.e.*, such as have been appointed by the University with the express designation of "Appointed Teachers"; (2) "Recognised Teachers," *i.e.*, such as have been appointed either by the University itself or by one of its

Schools" or by one of the other Institutions which instruction is given under its auspices, and have been recognised by the Senate as conducting work of University standard.

APPOINTED TEACHERS.

Professors.

Anatomy, G. D. Thane, LL.D.
Applied Mathematics (Goldsmid), Karl Pearson, M.A., F.R.S.
Archæology (Yates), E. A. Gardner, M.A.
Architecture, F. M. Simpson, F.R.I.B.A.
Botany (Quain), F. W. Oliver, D.Sc., F.R.S.
Chemistry, General, Sir William Ramsay, K.C.B., D.Sc., F.R.S.
Do., Organic, J. Norman Collie, LL.D., F.R.S.
Comparative Law (Quain), Sir John Macdonell, C.B., LL.D.
Comparative Philology (vacant.)
Education, John Adams, M.A.
Egyptology (Edwards), W. M. Flinders Petrie, D.C.L., F.R.S.
Electrical Engineering (Pender), J. A. Fleming, D.Sc., F.R.S.
Engineering, D. S. Capper, M.A.; W. E. Dalby, M.A.
English History, A. F. Pollard, M.A.
English Lang. and Lit. (Quain), W. P. Ker, LL.D.
French & Romance Philology (Fielden), L. M. Brandin, Ph.D.
Geology (Yates-Goldsmid), E. J. Garwood, M.A.
German, R. C. Priebsch, Ph.D.; J. G. Robertson, Ph.D.
Greek, J. A. Platt, M.A.
Hygiene (Chadwick), H. R. Kenwood, C.M.
Latin, A. E. Housman, M.A.
Mathematics (Astor), M. J. M. Hill, Sc.D., F.R.S.
Mechanical Engineering, J. D. Cormack, D.Sc.
Music (King Edward), Sir Frederick Bridge, M.V.O., Mus.Doc.
Pharmacology, A. R. Cushny, M.D., F.R.S.
Philosophy (Grote), Carveth Read, M.A.
Physics (Quain), F. T. Trouton, D.Sc., F.R.S.
Physiology (Jodrell), E. H. Starling, M.D., F.R.S.
Political Economy, Edwin Cannan, LL.D.; H. S. Foxwell, M.A.
Protozoology, E. A. Minchin, M.A.
Sociology (Martin White), L. T. Hobhouse, M.A.; E. A. Westermarck, Ph.D.
Zoology & Comparative Anatomy (Jodrell), J. P. Hill, D.Sc.

Director of the Physiological Laboratory, A. D. Waller, M.D., F.R.S.

Readers.

Ancient History, M. O. B. Caspari, M.A.
Economic History, Mrs. Knowles, Litt.D.
Experimental Psychology, C. E. Spearman, Ph.D.
Foreign Trade, A. J. Sargent, M.A.
Geography, H. J. Mackinder, M.A., M.P.
German, H. G. Atkins, M.A.; W. Perrett, Ph.D.; J. Steppat, Ph.D.
Greek, J. M. MacGregor, M.A.
Meteorology, W. N. Shaw, Sc.D., F.R.S.
Palæography & Economic History, H. Hall, F.S.A.
Statistics, A. L. Bowley, M.A.
Tibetan Language, F. W. Thomas, Ph.D.

RECOGNISED TEACHERS.

The number of "Recognised Teachers" in the several Faculties is as follows:—

Theology, 20; *Arts*, 150; *Laws*, 16; *Music*, 19; *Medicine*, 348; *Science*, 223; *Engineering*, 60; *Economics*, 13. There are also a number of "Temporarily Recognised Teachers," who deliver special Lectures in *Physiology*, *Botany*, *Zoology*, *Geology*, and *Sociology*, under the direct control of the University.

DEANS OF THE FACULTIES, 1908-10.

Theology, Rev. Prof. Albert William Greenup, D.D.
Arts, Rev. Prof. Alfred Caldecott, D.Lit.
Laws, William Feilden Craies, M.A.
Music, Charles William Pearce, Mus. Doc.
Medicine, Prof. Sidney Harris Cox Martin, M.D., F.R.S.
Science, Prof. Arthur William Crossley, D.Sc., F.R.S.
Engineering, Prof. William Ernest Dalby, M.A.
Economics, Arthur Lyon Bowley, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.
Hackney College, Hampstead (Congregational).
Principal, Rev. P. T. Forsyth, D.D.
Regent's Park College, N.W. (Baptist).
Principal, Rev. G. P. Gould, M.A.
King's College, Strand, W.C. (Theological Department).
Principal, Rev. A. C. Headlam, D.D.
St. John's Hall, Highbury (The London College of Divinity, Church of England).
Principal, Rev. A. W. Greenup, D.D.
Wesleyan College, Richmond (Wesl. Methodist).
Principal, Rev. Dr. W. T. Davison.

Arts, Science, and Engineering:—

The East London College, Mile End Road, E.
Principal, John L. S. Hatton, M.A.
Registrar, T. C. Hodson.

Arts and Science:—

Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.
Secretary, Miss A. Martin Leake.
Bedford College for Women, York Place, Baker Street, W.
Principal, Miss M. J. Tuke, M.A.
Secretary of Council, Miss E. T. McKnight, M.A.

Arts:—

Westfield College, Hampstead, N.W.
Resident Mistress, Miss C. L. Maynard.
Secretary, Miss S. M. Smee.

Medicine:—

The Medical Schools of certain Hospitals, &c. (*see* pp. 279–280.)

Science and Engineering:—

Imperial College of Science and Technology, South Kensington, S.W.
Rector, Sir Alfred Keogh, K.C.B., LL.D.
Secretary, Alexander Gow, B.Sc.

Science—In Agriculture only:—

South-Eastern Agricultural College, Wye, Kent. (Under the County Councils of Kent and Surrey.)
Chairman, Rt. Hon. Lord Ashcombe.
Clerk to the Governors, J. T. Welldon, B.A. (Ashford).
Principal, M. J. R. Dunstan, M.A., F.R.S.E.
Vice-Principal, F. V. Theobald, M.A.
Secretary & Bursar, H. W. Kersey.

Engineering:—

Central Technical College, Exhibition Road, S.W.
Dean, Prof. W. E. Dalby, B.Sc.
Sec., Board of Studies, A. L. Soper.
Registrar, John Jones.

Economics and Political Science:—

London School of Economics and Political Science, Clare Market, Kingsway, W.C.
President, Lord Rothschild.
Chairman, Sidney Webb, LL.B.
Director, Hon. W. P. Reeves.

THE UNIVERSITY OF DURHAM. 1831.

TERMS (1911).—*Epiph.*, Jan. 20 to March 21. *Easter*, Apr. 28 to June 27. *Mich.*, Oct. 13 to Dec. 12.

Chancellor, Very Rev. the Dean of Durham.
Vice-Chancellor, F. B. Jevons, D.Litt.

PROFESSORS.

Divinity & Eccles. Hist., Rev. R. J. Knowling, D.D.
Greek and Classical Lit., Rev. A. H. Cruickshank, M.A.
Mathematics, R. A. Sampson, D.Sc.
Hebrew, Ven. H. W. Watkins, D.D.
Medicine, Sir G. H. Philipson, D.C.L.
Surgery (Emeritus), F. Page, M.D.
Physiology, Sir Thomas Oliver, M.D.
Anatomy, R. Howden, M.B.
Comparative Pathology, H. J. Hutchens, M.A., D.S.O.
Midwifery, R. P. R. Lyle, M.D.
Music, J. C. Bridge, D.Mus.
Registrar, W. K. Hilton, M.A.
[*Affiliated Colleges* — Codrington, Barbados; Fourah Bay, Sierra Leone.]

UNIVERSITY COLLEGE.

Master, Rev. H. Gee, D.D.
Censor and Bursar, W. K. Hilton, M.A.

HATFIELD HALL.

Principal, F. B. Jevons, D.Litt.
Bursar, A. Robinson, D.C.L.

ST. CHAD'S HALL.

Principal, Rev. S. R. P. Moulsdale, M.A.

ST. JOHN'S HALL.

Principal, Rev. S. N. Rostron, M.A.

HALL OF RESIDENCE FOR WOMEN.

Principal, E. Robinson.

UNATTACHED STUDENTS.

Censor, Rev. J. H. How, M.A.

HOME STUDENTS (Women).

Censor, E. M. Ellershaw, B.A.

COLLEGE OF MEDICINE, Newcastle, 1832.

President, Sir G. H. Philipson, D.C.L.
Registrar, F. Page, M.D.
Treasurer, C. A. Cochrane, M.A.
Secretary, R. Howden, M.B.

ARMSTRONG COLLEGE, Newcastle, 1871 (formerly Durham College of Science).

TERMS (1910).—Sept. 26 to Dec. 21. 1911.—Jan. 9 to March 18; April 19 to June 27.

President, Rt. Hon. R. Spence Watson, D.C.L.
Principal, W. H. Hadow, D.Mus.
Secretary, F. H. Pruen, M.A.
Treasurer, T. Hodgkin, D.C.L.

PROFESSORS.

Mathematics, C. M. Jessop, M.A.
Physics, H. Stroud, D.Sc.
Chemistry, P. Phillips Bedson, D.Sc.
Geology, G. A. Lebour, D.Sc. (*Vice-Principal*).
Natural History, G. S. Brady, D.Sc., F.R.S. (*Hon.*).
Zoology, A. Meek, M.Sc.
Botany, M. C. Potter, Sc.D.
Classics, J. W. Duff, D.Litt.
Eng. Lang. & Literature, Allen Mawer, M.A.
Agriculture & Rural Econ., D. A. Gilchrist, M.Sc.
Engineering, R. L. Weighton, D.Sc.
Electrical Engineering, W. M. Thornton, D.Sc.
Naval Architecture, J. J. Welch, M.Sc.
Mining & Surveying, Henry Louis, D.Sc.
Education, Mark R. Wright, M.A.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£2,000.)

Founded 1850; re-organised 1880 and 1903.

TERMS (1910).—*Mich.*, Oct. 4 to Dec. 21.
,, (1911).—*Lent*, Jan. 11 to March 28.
Easter, April 25 to July 8.

Chancellor, Viscount Morley of Blackburn, O.M.
Vice-Chancellor, Sir Alfred Hopkinson, K.C., LL.D.
Treasurer, E. J. Broadfield, LL.D.
Registrar, Edward Fiddes, M.A.
Bursar, Sydney Chaffers, M.A.
Tutor, Women Students, Phoebe Sheavyn, D.Lit.
Clerk of Convocation, Percy Raby, LL.B.

Faculty of Arts.

Greek, Ronald M. Burrows, D.Litt.
Hellenistic Greek, J. H. Moulton, D.Lit.
Latin, R. S. Conway, Litt.D., *Dean*.
English Lit. & Language, C. H. Herford, Litt.D.
French, L. E. Kastner, M.A.
German, Arwid Johannson, M.A.
Semitic Languages, Hope W. Hogg, M.A.
Chinese, E. H. Parker, M.A.
Mediæval & Modern History, T. F. Tout, M.A.
Ancient & Mediæval History, J. Tait, M.A.
Economic History, George Unwin, B.A.
Philosophy, S. Alexander, LL.D.
Education, J. J. Findlay, Ph.D.; M. E. Sadler, LL.D.
Political Economy, S. J. Chapman, M.A.
Architecture, S. H. Capper, M.A.

Faculty of Science.

Mathematics, Horace Lamb, LL.D., F.R.S.
Physics, Ernest Rutherford, D.Sc., F.R.S.; Arthur Schuster, Sc.D., F.R.S.
Engineering, J. E. Petavel, D.Sc., F.R.S.
Chemistry, H. B. Dixon, Ph.D., F.R.S.; W. H. Perkin, Ph.D., F.R.S.
Metallurgy, H. C. H. Carpenter, Ph.D.
Zoology, S. J. Hickson, D.Sc., F.R.S.
Botany, F. E. Weiss, D.Sc., *Dean*.
Do., Cryptogamic, W. H. Lang, D.Sc.
Geology, Sir T. H. Holland, K.C.I.E., F.R.S.; W. Boyd Dawkins D.Sc., F.R.S.

Faculty of Law.

Professors, Sir A. Hopkinson, K.C., LL.D., and J. S. Beaton, M.A.

Faculty of Commerce.

Professors, S. J. Chapman, M.A., *Dean*; and George Unwin, B.A.

Faculty of Music.

Dean, Walter Carroll, Mus.D.

Faculty of Theology.

Dean, Rev. W. F. Adeney, D.D.
Biblical Criticism, A. S. Peake, M.A.; H. W. Hogg, M.A.
Comparative Religion, T. W. Rhys Davids, LL.D.

Faculty of Technology.

Dean, J. H. Reynolds, M.Sc.
Mechanical Engineering, J. T. Nicolson, D.Sc.
Electrical Engineering, A. Schwartz, M.Sc.Tech.
Chemistry, E. Knecht, Ph.D.

Faculty of Medicine.

Anatomy, Grafton Elliot Smith, M.D., F.R.S.
Physiology, W. Stirling, M.D., *Dean*.
Materia Medica, R. B. Wild, M.D.
Pathology, J. Lorrain Smith, M.D., F.R.S.
Medicine, Clinical, Graham Steell, F.R.C.P.
Do., Systematic, George R. Murray, M.D.
Clinical Surgery William Thorburn, F.R.C.S.
Systematic Surgery, G. A. Wright, F.R.C.S.
Obstetrics & Gynæcology, Sir W. J. Sinclair, M.D.
Forensic Medicine, J. Dixon Mann, M.D.
Public Health & Bacteriology, A. S. Delépine, M.B.

TRAINING COLLEGE (for Men and Women).

Professors, J. J. Findlay, Ph.D.; M. E. Sadler, LL.D.

THE UNIVERSITY OF BIRMINGHAM.

Birmingham, 1900. (£2,000.)

TERMS (1910).—Oct. 3 to Dec. 17.
,, (1911).—Jan. 9 to Mar. 25; Ap. 24 to July 1.

Chancellor, Rt. Hon. Joseph Chamberlain, M.P.
Vice-Chancellor, C. G. Beale, M.A.
Principal, Sir Oliver Lodge, D.Sc., F.R.S.
Vice-Principal & Registrar, Robert S. Heath, D.Sc.
Secretary, George H. Morley.

PROFESSORS.

Faculties of Science, Arts, and Commerce.

Mathematics, R. S. Heath, D.Sc.
Physics, J. H. Poynting, Sc.D., F.R.S.
Chemistry, P. F. Frankland, Ph.D., F.R.S.
Zoology, F. W. Gamble, D.Sc., F.R.S.
Botany, G. S. West, M.A., D.Sc.
Geology & Physiography, C. Lapworth, LL.D., F.R.S.
Mechanical Engineering, F. W. Burstall, M.A.
Civil Engineering, S. M. Dixon, M.A.
Electrical Engineering, Gisbert Kapp, M.Sc.
Brewing, Adrian J. Brown, M.Sc.
Metallurgy, T. Turner, M.Sc.
Mining, J. Cadman, D.Sc.
Commerce, W. J. Ashley, M.Com.
Accounting, C. E. Martineau, M.A.
Finance, A. W. Kirkaldy, M.Com.
Greek and Latin, E. A. Sonnenschein, D.Litt.
English Lang. & Lit., E. de Sélincourt, D.Litt.
Mental and Moral Philosophy, J. H. Muirhead, LL.D.
French, H. L. Chatelain, D.ès-Lett.
German, Karl Wichmann, Ph.D.
History, C. R. Beazley, M.A., D.Litt.
Education, Alfred Hughes, M.A.
Music, Granville Bantock, M.A.

Faculty of Medicine.

Medicine, R. Saundby, M.D.; A. H. Carter, M.D.
Surgery, G. Barling, F.R.C.S.; Jordan Lloyd, M.D.
Anatomy, P. Thompson, M.D.
Physiology, E. W. Wace Carlier, M.D.
Elementary Biology, F. W. Gamble, D.Sc., F.R.S.
Therapeutics, Sir Robert M. Simon, M.D.
Forensic Medicine, J. T. J. Morrison, F.R.C.S.
Hygiene and Public Health, A. Bostock Hill, M.D.
Midwifery, Edward Malins, M.D.
Pathology, R. F. C. Leith, F.R.C.P.
Lunacy & Mental Dis., E. B. Whitcombe, M.B.
Ophthalmology, Priestley Smith, F.R.C.S.
Dental School, J. Humphreys, M.D.S. (*Hon. Sec.*).

DAY TRAINING COLLEGES.

Head Mistress (women), Miss A. H. Joyce, B.A.
Master of Method (men), Frank Roscoe.

THE UNIVERSITY OF LIVERPOOL.

Liverpool, 1903. (£2,000.)

TERMS (1910).—Oct. 4 to Dec. 16.
,, (1911).—Jan. 10 to March 24; April 25 to July 8.

Chancellor, The Earl of Derby, G.C.V.O., C.B.
Vice-Chancellor, A. W. W. Dale, LL.D.
Registrar, P. Hebblethwaite, M.A.
Librarian, John Sampson, D.Litt.

PROFESSORS.

Faculties of Arts, Science, Medicine, Law and Engineering.

Greek (vacant).
Latin, J. P. Postgate, F.B.A.
Classical Literature, A. W. W. Dale, LL.D.
French, C. Bonnier, Ph.D.
Spanish, J. Fitzmaurice Kelly, F.B.A.
Teutonic Languages, Kuno Meyer, Ph.D.
Celtic, Kuno Meyer, Ph.D.
English Lang. & Philol., H. C. Wyld, B.Litt.
English Literature, Oliver Elton, M.A.
Economic Science, E. C. K. Gonner, M.A.
History, J. M. Mackay, LL.D.
Modern History, Ramsay Muir, M.A.
Russian History, Language and Literature, Bernard Pares, M.A.
Philosophy, Alexander Mair, M.A. (*Dean, Arts*).
Education, E. T. Campagnac, M.A.
Classical Archæology, R. C. Bosanquet, M.A.
Methods and Practice of Archæology, J. Garstang, D.Sc.
Egyptian Archæology, Percy E. Newberry, M.A.
Mediæval Archæology, F. P. Barnard, M.A.
Social Anthropology, J. G. Frazer, D.C.L.
Law, G. H. Emmott, LL.M. (*Dean, Law*).
Commercial Law, W. J. Sparrow, LL.D.
Architecture, C. H. Reilly, M.A.
Physiology, C. S. Sherrington, M.D., F.R.S.
Mathematics, F. S. Carey, M.A.
Physics, L. R. Wilberforce, M.A.
Chemistry, E. C. C. Baly, F.I.C., F.R.S.
Physical Chemistry, F. G. Donnan, Ph.D.
Natural History, William A. Herdman, D.Sc., F.R.S.
Botany, R. J. H. Gibson, M.A. (*Dean, Science*).
Engineering, W. H. Watkinson, M.Eng.
Civil Engineering, S. W. Perrott, M.A.I.
Electrical Engineering, E. W. Marchant, D.Sc.
Anatomy, A. Melville Paterson, M.D.
Medicine, T. Robinson Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Pathology, Sir Rubert Boyce, M.B., F.R.S.
Midwifery and Gynæcology, H. Briggs, F.R.C.S.
Therapeutics, J. Hill Abram, M.D.
Hygiene, E. W. Hope, D.Sc.
Tropical Med., Maj. Ronald Ross, C.B., F.R.S.
Bio-Chemistry, B. Moore, D.Sc.
Comparative Pathology, H. E. Annett, M.D.
Forensic Medicine, R. J. M. Buchanan, M.D.
Dean, Medicine, K. W. Monsarrat, F.R.C.S.
Dean, Engineering, J. Wemyss Anderson, M.Eng.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss G. M. Butler, M.A.

DAY TRAINING COLLEGE (Men and Women).

Principal, J. H. Gettins, B.A.
Mistress of Method, Miss S. Melhuish, M.A.
Warden, F. T. Sharpe, M.A.

THE UNIVERSITY OF LEEDS.

Leeds, 1904. (£2,000.)

TERMS (1910).—Oct. 3 to Dec. 21.
,, (1911).—Jan. 11 to March 29; April 26 to July 1.

Chancellor, The Duke of Devonshire, LL.D.
Pro-Chancellor, Arthur G. Lupton, LL.D.
Vice-Chancellor, Sir Nathan Bodington, LL.D.
Registrar, W. F. Husband, LL.B.

PROFESSORS.

Faculties of Arts (including Commerce & Law), Science & Technology.

Classics, W. Rhys Roberts, Litt.D.; B. M. Connal, M.A.
English Lang. and Lit., C. E. Vaughan, M.A. (*Dean, Arts*).
French, Paul Barbier fils, M.A.
German, A. W. Schüddekopf, Ph.D.
History, Arthur J. Grant, M.A.
Economics, D. H. Macgregor, M.A.
Education, J. Welton, M.A.
Law, W. R. Phillips, LL.M.
Mathematics, L. J. Rogers, M.A.
Physics, W. H. Bragg, M.A., F.R.S.
Chemistry, A. Smithells, B.Sc., F.R.S. (*Dean, Science*).

Organic Chemistry, J. B. Cohen, B.Sc., Ph.D.
Zoology, W. Garstang, M.A., D.Sc.
Botany, V. H. Blackman, M.A., Sc.D.
Geology, P. F. Kendall, M.Sc.
Engineering, J. Goodman, M.Sc.
Mining, G. R. Thompson, B.Sc.
Textile Industries, Roberts Beaumont, M.Sc.
Dyeing, A. G. Green, M.Sc.
Leather Industries, H. R. Procter, M.Sc. (*Dean, Technology*).
Fuel & Metallurgy and Gas Engineering, W. A. Bone, D.Sc., F.R.S.
Agriculture, R. S. Seton, B.Sc.

School of Medicine.

Anatomy, J. Kay Jamieson, M.B.
Physiology and Histology, De Burgh Birch, M.D.
Pathology, A. S. Grünbaum, M.D., F.R.C.P. (*Dean, Medicine*).
Medicine, T. Wardrop Griffith, M.D.
Clinical Medicine, A. G. Barrs, M.D.
Surgery, R. Lawford Knaggs, M.D.
Clinical Surgery, B. G. A. Moynihan, F.R.C.S.
Obstetrics, J. B. Hellier, M.D.
Therapeutics, Pharmacy, and Materia Medica, H. J. Campbell, M.D.
Public Health, J. S. Cameron, M.D.
Forensic Medicine, F. W. Eurich, M.D.

UNIVERSITY OF SHEFFIELD, 1905. (£2,000.)

TERMS (1910).—Oct. 5 to Dec. 21.
,, (1911).—Jan. 16 to Mar. 25; Apr. 19 to June 30.
Chancellor, The Duke of Norfolk, E.M., K.G., Litt.D.
Vice-Chancellor, Sir Charles Eliot, K.C.M.G., LL.D.
Treasurer, A. J. Hobson, J.P.
Registrar, W. M. Gibbons, M.A.
Librarian, T. Loveday, M.A.
Tutor for Women Students, Miss M. J. Sorby.

PROFESSORS.

Mathematics, A. H. Leahy, M.A. (*Dean, Pure Science*).
Physics, W. M. Hicks, Sc.D., F.R.S.
Chemistry, W. Palmer Wynne, D.Sc., F.R.S.
Zoology and Biology, Alfred Denny, M.Sc.
Botany, B. H. Bentley, M.A.
Geography, R. N. Rudmose Brown, D.Sc.

German, Julius Freund, Ph.D.
Philosophy, T. Loveday, M.A.
Economics, D. Knoop, M.A.
Education, J. A. Green, M.A.
Law, W. F. Trotter, LL.M. (*Dean, Law*).
Engineering, W. Ripper, D.Eng. (*Dean, Applied Science*).
Mining Engineering, F. W. Hardwick, M.A.
Applied Chemistry, L. T. O'Shea, M.Sc.
Metallurgy, J. O. Arnold, D.Met.; A. McWilliam, M.Met.
Architecture, W. S. Purchon, A.R.I.B.A.
Anatomy, C. J. Patten, M.D.
Physiology, J. S. Macdonald, B.A.
Medicine, W. Dyson, M.D.; D. Burgess, F.R.C.P.
Materia Medica, &c., W. T. Cocking, M.D.
Surgery, R. J. Pye-Smith, F.R.C.S.
Pathology, J. M. Beattie, M.D. (*Dean, Medicine*).
Midwifery, R. Favell, Ch.M.
Public Health, R. P. Williams, M.D.

TRAINING COLLEGE.

Master of Method, C. Birchenough, M.A.
Mistress of Method, Katherine L. Johnston, B.A.

UNIVERSITY OF BRISTOL. 1909. (£2,000.)

TERMS (1910).—Oct. 3 to Dec. 20.
,, (1911).—Jan. 17 to Mar. 25; Apr. 24 to July 1.
Chancellor, Henry Overton Wills, J.P.
Vice-Chancellor, Sir Isambard Owen, D.C.L.
Treasurer, George A. Wills, J.P.
Registrar, James Rafter.

PROFESSORS.

Faculty of Arts.

Greek (vacant).
Classics, Francis Brooks, M.A., *Dean*.
English Language and Lit. (vacant).
Modern History, G. H. Leonard, M.A.
Public Administration and Economics (vacant).
Psychology, C. Lloyd Morgan, LL.D., F.R.S.
Mathematics, F. R. Barrell, M.A., B.Sc.

Faculty of Science.

Mathematics, F. R. Barrell, B.Sc., *Dean*.
Physics (vacant).
Chemistry, Francis Francis, D.Sc.
Geology, S. H. Reynolds, M.A.

Faculty of Medicine.

Medicine, F. H. Edgeworth, M.D.; J. Michel Clarke, M.D.
Surgery, Charles A. Morton, F.R.C.S.; James Swain, F.R.C.S.
Anatomy, Edward Fawcett, M.D., *Dean*.
Physiology, A. F. Stanley Kent, M.A.
Obstetrics, Walter C. Swayne, M.D.
Pathology and Morbid Anatomy, I. Walker Hall, M.D.

Faculty of Engineering
(provided and maintained in the Merchant Venturers' Technical College).

Applied Chemistry, Julius Wertheimer, B.Sc. *Dean*.
Mathematics, Edmund S. Boulton, M.A.
Civil Engineering, Robert M. Ferrier, M.Sc.
Mechanical and Mining Engineering, John Munro, A.R.C.S.
Electrical Engineering, David Robertson, B.Sc.
Motor-Car Engineering, William Morgan, B.Sc.

DAY TRAINING COLLEGES.

Master of Method, T. S. Foster, M.A.
Mistress of Method, Miss M. F. Pease.

HALL OF RESIDENCE FOR WOMEN.

Lady Supts., Miss H. Cashmore; Miss A. Cook.
Warden and Tutor, Miss M. C. Staveley, M.A.

ENGLISH UNIVERSITY COLLEGES.

EXETER—ROYAL ALBERT MEMORIAL, UNIVERSITY COLLEGE.
Principal, A. W. Clayden, M.A.
Sec. and Registrar, A. Woodbridge.
DAY TRAINING COLLEGE (Men and Women).—*Lady Tutor*, Miss A. J. Walker, M.A.

NEWCASTLE-UPON-TYNE — ARMSTRONG COLLEGE. (*See* University of Durham.)

NOTTINGHAM—UNIVERSITY COLL. 1880
Principal, Rev. J. E. Symes, M.A.
Registrar, P. H. Stevenson, F.C.I.S.
DAY TRAINING COLLEGE. — *Normal Master*, Prof. Henderson, B.A.; *Normal Mistress*, Mi Bird, L.L.A.

READING—UNIVERSITY COLLEGE. (£3,90
Principal, W. M. Childs, M.A.
Registrar, F. H. Wright, M.A.

SOUTHAMPTON—HARTLEY UNIV. COLL
Principal, S. W. Richardson, D.Sc.
Registrar, D. Kiddle.

Wales.

THE UNIVERSITY OF WALES. 1893.
(£4,000.)

"PRIFYSGOL CYMRU."

ancellor, H.M. The King.
nior Deputy do., The Lord Kenyon, K.C.V.O.
ce-Chancellor, Principal Griffiths, D.Sc., F.R.S.
urden, Guild of Graduates, C. Morgan, B.A.
eas., Lt.-Gen. Sir J. Hills-Johnes, V.C., G.C.B.
gistrar, J. M. Angus (Cathays Park, Cardiff).
eas., Guild of Graduates, Edgar Jones, M.A.
rk, Guild of Graduates, J. G. Davies, M.A.

I. UNIVERSITY COLLEGE OF WALES—Aberystwyth (1872). (£8,000.)

rincipal, Thomas Francis Roberts, LL.D.
gistrar, J. H. Davies, M.A.
brarian, J. D. Williams, B.A.

PROFESSORS.

eek, J. W. Marshall, M.A.
tin, E. Bensly, M.A.
iental, German, & Italian Languages, H. Ethé, Ph.D.
glish Lang. and Lit., J. W. H. Atkins, M.A.
story, E. Edwards, M.A.; T. S. Roberts, M.A.
th., Nat. Philos., & Astron., R. W. Genese, M.A.
plied Mathematics, G. A. Schott, D.Sc.
gic and Philosophy, J. Brough, LL.D.
litical Science, W. Jenkyn Jones, M.A.
emistry, J. J. Sudborough, D.Sc.

estry, Fraser Story, F.R.S.E.

HALL OF RESIDENCE FOR WOMEN.

rden, Miss D. Chapman, M.A.

III. UNIVERSITY COLL. OF SOUTH WALES AND MONMOUTHSHIRE—Cardiff (1883). (£8,000.)

Principal, Ernest Howard Griffiths, Sc.D., F.R.S.
Registrar (vacant).

PROFESSORS.

Greek, G. Norwood, M.A.
Latin, D. A. Slater, M.A.
Logic and Philosophy, J. S. Mackenzie, Litt.D.
Economics and Polit. Science, H. S. Jevons, B.Sc.
English Lang. & Literature, H. Littledale, M.A.
French Lang. & Literature, Paul Barbier.
Education, W. Phillips, M.A.; H. M. Mackenzie, M.A.
Applied Mathematics, R. H. Pinkerton, M.A.
Celtic, Thomas Powel, M.A.
Experimental Philosophy, The Principal.
Physics, A. L. Selby, M.A.
Chemistry, C. M. Thompson, D.Sc.
Engineering, A. C. Elliott, D.Sc.
Zoology, W. N. Parker, Ph.D.
Botany, A. H. Trow, D.Sc.
Geology, W. S. Boulton, B.Sc.
History, H. Bruce, M.A.
Metallurgy, A. A. Read, M.Met.
Music, D. Evans, Mus.Bac.

Faculty of Medicine.

Anatomy, David Hepburn, M.D., F.R.S.E.
Physiology, J. B. Haycraft, M.D., F.R.S.E.
Pathology and Bacteriol., E. E. Roberts, M.D.

ABERDARE HALL.

Principal, Miss Kate Hurlbatt.

LAMPETER—ST. DAVID'S COLLEGE. 1827.

Number of Students (1909–10), 140.
Principal & Sen. Bursar, Rev. Ll. J. M. Bebb, D.D.

PROFESSORS.

Theology and Greek, The Principal.
Math. & Phys. Science, A. W. Scott, M.A.
Latin, G. W. Wade, D.D., *Librarian.*
Theology and Hebrew, E. T. Green, M.A., *Censor.*
Welsh, E. L. Thomas, M.A.
English & Philos., H. Walker, LL.D., *Jr. Bursar.*
Theology (Lect.), Rev. C. Cryer, M.A.
Mathematics (Lect.), Rev. B. Davies, M.A.
History (Lect.), A. H. Dainton, B.A.

[Lampeter possesses by Charter the privilege of conferring degrees B.A. and B.D., and is affiliated to Oxford and Cambridge.]

Scotland.

UNIVERSITY OF ST. ANDREWS. 1411.
(£10,800.)

Number of Students (1908–1909), 585.
Winter Term (1910–1911), 5 Oct. to 15 March.
Summer Term (1911), 19 April to 27 June.

Chancellor, Rt. Hon. Lord Balfour of Burleigh, K.T.
Vice-Chancellor, Principal Sir James Donaldson, LL.D.
Rector, Rt. Hon. Lord Avebury, LL.D.
Principal, Sir James Donaldson, LL.D.
Representative in Parliament, Rt. Hon. Sir R. B. Finlay, K.C., LL.D.
Registrar & Secretary, Andrew Bennett.
Librarian, J. M. Anderson. *Factor*, W. Wilkie.

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD.

Principal, Sir James Donaldson, LL.D. £900

PROFESSORS.

Humanity, Wallace M. Lindsay, M.A..... 750
Logic & Metaphysics, G. F. Stout, LL.D. 650

Greek, John Burnet, M.A. £750
Mathematics, P. R. Scott Lang, M.A. (*Dean, Arts*) 750
Moral Philosophy, Alfred E. Taylor, M.A. ... 650
Nat. Philos., A. S. Butler, M.A. 750
Natural History, W. C. McIntosh, M.D. 650
Chemistry, James C. Irvine, Ph.D. 650
Education, John Edgar, M.A. 550
Engl. Literature, A. Lawson, M.A. 650
Anatomy, James Musgrove, M.D. (*Dean, Science*) 619
Physiology, Percy T. Herring, M.D. 550

COLLEGE OF ST. MARY.

Prin., Very Rev. A. Stewart, D.D. (*Dean, Theol.*).

PROFESSORS.

Primarius Prof. of Divinity, The Principal £683
Biblical Criticism, Rev. Allan Menzies, D.D. 584
Ecclesiastical Hist., Rev. John Herkless, D.D. 610
Oriental Languages, Rev. D. M. Kay, B.D.... 650

UNIVERSITY COLLEGE, DUNDEE (1880).

Principal, John Yule Mackay, LL.D. £850
Secretary, W. Arnot Watterston.

PROFESSORS.

Mathematics, J. E. A. Steggall, M.A. £600
Natural Philosophy, William Peddie, D.Sc. 600
Chemistry, Hugh Marshall, D.Sc. 600
Natural History, D'Arcy W. Thompson, B.A. 600
Botany (*White's*), Patrick Geddes, F.R.S.E.... 312
Anatomy (*Cox's*), J. Yule Mackay, LL.D.
Physiology, E. W. Reid, B.A. .....
Engin. and Drawing, A. H. Gibson, D.Sc. 600

CONJOINT MEDICAL SCHOOL, DUNDEE.

PROFESSORS.

Pathology, L. R. Sutherland 406
Surgery, D. MacEwan, M.D. 187
Medicine, Alex. M. Stalker 121
Midwifery, Jno. A. C. Kynoch (*Dean, Medicine*) 137
Materia Medica, Chas. R. Marshall..... 432

UNIVERSITY OF GLASGOW. 1450.
(£20,880.)

Number of Students (1909–10), 2,728.
TERMS (1910).—17 Oct. to 23 Mar.
„ (1911).—25 April to 4 July.
Chancellor, The Earl of Rosebery, K.G., K.T., LL.D.
Vice-Chancellor, The Principal.
Rector, The Lord Curzon of Kedleston.
Principal, Sir Donald MacAlister, K.C.B., D.C.L. *£1,100
Representative in Parliament, Sir Henry Craik K.C.B., LL.D.

PROFESSORS.

Humanity, J. S. Phillimore, M.A. *£1,000
Greek, Gilbert A. Davies, M.A. *1,000
Civil Engineering & Mechanics, Archibald Barr, D.Sc. 900
Logic & Rhetoric, Robert Latta, D.Ph. (*Dean, Arts*) *800
Moral Philosophy, Hy. Jones, LL.D. *800
Natural Philosophy, A. Gray, LL.D., F.R.S. *1,000
Mathematics, George A. Gibson, LL.D. ... *1,000
English Lang. & Lit., Wm. M. Dixon, Litt.D. 900
History, Dudley J. Medley, M.A. 900
Astronomy, Ludwig Becker, Ph.D. 600
Naval Architecture, J. Harvard Biles, LL.D. 800
Divinity, Rev. H. M. B. Reid, D.D. *521
Church History, James Cooper, B.D. *437
Biblical Criticism, George Milligan, D.D. 558
Hebrew & Semitic Lang., W. B. Stevenson, B.D. £*700
Law, William M. Gloag, K.C., B.A. *800
Conveyancing, James Moir, LL.D. 600
Materia Medica, R. Stockman, M.D. 700
Chemistry, John Ferguson, LL.D. 1,300
Surgery, Sir William Macewen, M.D., F.R.S. 800
Practice of Medicine, S. Gemmell, M.D. ... *800
Midwifery, Murdoch Cameron, M.D. 700
Anatomy, Thomas H. Bryce, M.D. *1,200
Zoology, John G. Kerr, M.A., F.R.S. 800
Geology, John W. Gregory, D.Sc., F.R.S. (*Dean, Science*) 700
Mining, Chas. Latham, M.INST.M.E. 600
Botany, Frederick O. Bower, D.Sc., F.R.S. 830
Physiology, D. Noel Paton, M.D. 1,100
Forensic Medicine, John Glaister, M.D. ... 600
Clinical Surgery (vacant) 216
Clinical Medicine (vacant) 305
Pathology, Robert Muir, M.D. (*Dean, Medicine*) 1,100
Political Econ., W. Smart, LL.D. (*Dean, Law*) 600
Clerk of Senatus, Professor W. Stewart, D.D.
Assistant do., W. L. Addison; A. Morrison.
Librarian, James L. Galbraith.
Registrar of Gen. Council, W. I. Addison.
Clerk to Gen. Council, Archibald Craig, LL.B.
Sec. to Univ. Court, A. E. Clapperton, B.L.

UNIVERSITY OF ABERDEEN. 1494.
(£14,400.)

Number of Matriculated Students (1909–10), 1,010.
Winter Term (1910), 12 October to 23 December; *Spring Term* (1911), 10 January to 17 March; *Summer Term*, 18 April to 30 June.
Chancellor, Lord Strathcona and Mount Royal, G.C.M.G., D.C.L. 1903
Rector, Rt. Hon. H. H. Asquith, M.P. 1908
Vice-Chancellor and Principal, Rev. G. A. Smith, D.D. *£800
Represent. in Parlt., Sir Henry Craik, K.C.B., LL.D.
Secretary of the University, Donaldson R. Thom M.A.
Registrar, R. Walker, LL.D.
Librarian and Clerk of the General Council, P. J. Anderson, LL.B.

PROFESSORS.

Greek, John Harrower, M.A., LL.D. *£800
Humanity, Sir Wm. M. Ramsay, D.C.L. *800
English, Herbert J. C. Grierson, M.A. 700
Hist. & Archæology, Chas. Sanford Terry, M.A. ‡700
Logic, William Leslie Davidson, LL.D. 700
Moral Philosophy, Jas. Black Baillie, D.Ph. 700

Pathology, George Dean, M.B., C.M. ..... †900
Natural History, J. Arthur Thomson, M.A. 700

* The sums appended to the various Chairs are the Normal Salaries received in the year 1909–1910 with the exception of those marked † which are the amounts received in the year 1908–1909. Each of those marked * has a official residence in addition; the salaries marked † are fixed on the understanding that the Professors do not engage in private practice.

UNIVERSITY OF EDINBURGH. 1582.

(£25,920.)

Number of Matriculated Students (1908–9), 3,286.

WINTER SESSION, October to March.

SUMMER SESSION, May to July.

Chancellor, Rt. Hon. Arthur J. Balfour, M.P., D.C.L.

Rector, Rt. Hon. George Wyndham, LL.D., M.P.

Vice-Chancellor and Principal, Sir William Turner, K.C.B., D.C.L.

Representative in Parliament, Sir J. B. Tuke, M.D.

Sec. of Univ. Court, Emer. Professor Taylor, D.D.

Sec. of Senatus, Professor Sir L. J. Grant, Bt., LL.D.

Clerk of Senatus, James Dowie.

Secretary and Registrar of General Council, John Stirton.

PROFESSORS.

Humanity, W. R. Hardie, M.A.	£1,100
Greek, Alexander W. Mair, M.A.	1,100
Mathematics, Geo. Chrystal, LL.D. (*Dean, Arts*)	1,270
Logic & Metaphysics, A. S. Pringle Pattison, LL.D.	900
Moral Philosophy, James Seth, M.A.	900
Natural Philos., James G. MacGregor, D.Sc.	1,100
Rhetoric & Eng. Lit., Geo. Saintsbury, M.A.	900
Astronomy, F. W. Dyson, M.A.	400
Agriculture & Rural Economy, Robt. Wallace	600
Music (*Music*)	652
Sanskrit & Comp. Phil., Julius Eggeling, Ph.D.	600
Engineering, T. H. Beare, B.Sc.	800
Geology, James Geikie, LL.D. (*Dean, Science*)	800
Commercial and Political Economy and Mercantile Law, Joseph S. Nicholson, D.Sc.	800
Education, Alexander Darroch, M.A.	700
Fine Art, G. Baldwin Brown, M.A.	600
Ancient History and Palæography, P. Hume Brown, LL.D.	750
Celtic Languages & Lit., D. Mackinnon, M.A.	600
Divinity, William P. Paterson, D.D.	634
Ecclesiastical Hist., Jas. Mackinnon, Ph.D.	394

Lady Registrar, Miss Lucy P. Gwynn	1905

THE NATIONAL UNIVERSITY OF IRELAND. 1910. Dublin.

Chancellor, His Grace the Most Revd. Archbishop Walsh, D.D.

Vice-Chancellor, Sir Christopher Nixon, Bart., M.D.

Registrar, Joseph McGrath, LL.B.

SENATE.

The Chancellor; The Vice-Chancellor; Alexander

Anderson, D.Sc. ; B. C. A. Windle, D.Sc., F.R.S. ; D. J. Coffey, M.A. ; The Registrar ; His Grace the Most Revd. Archbishop Healy, D.D. ; Rt. Hon. Christopher Palles, LL.D. ; The Hon. Mr. Justice Barton, M.A. ; Sir George Roche ; Sir Stanley Harrington, B.A. ; S. H. Butcher, LL.D., M.P. ; W. F. T. Butler, M.A. ; A. W. Conway, D.Sc. ; M. F. Cox, M.D. ; Rev. Wm. Crawford, M.A. ; Rev. Wm. Delany, S.J., LL.D. ; A. Dempsey, M.D. ; S. Gwynn, B.A., M.P. ; Miss M. T. Hayden, M.A. ; Douglas Hyde, LL.D. ; J. S. M'Ardle, M.Ch. ; J. A. M'Clelland, D.Sc. ; John MacNeill, B.A. ; W. Magennis, M.A. ; Thomas Maguire ; The Right Rev. Monsignor Mannix, D.D. ; H. C. M'Weeney, M.A. ; Rev. A. Murphy ; J. F. O'Carroll, M.D. ; Charles A. O'Connor, M.A., K.C. (Solicitor-General) ; P. T. O'Sullivan, M.D. ; C. Yelverton Pearson, M.D. ; J. P. Pye, D.Sc. ; P. Semple, M.A. ; A. Senier, Ph.D. ; G. Sigerson, M.D. ; L. A. Waldron.

CORK—UNIVERSITY COLLEGE. 1845.

President, Bertram C. A. Windle, D.Sc., F.R.S.
Registrar, J. P. Molohan, M.A.
Bursar & Secretary, Harry C. Clifton, B.A.
Librarian, J. Fawcett, M.A.

PROFESSORS.

Archæology, The President.
English, William F. P. Stockley, M.A.
Greek Language, Charles Haynes Keene, M.A.
History, Patrick J. Merriman, M.A.
Irish, Rev. R. Henebry, Ph.D.
Latin, John P. Molohan, M.A.
Mathematics, Arthur H. Anglin, M.A.
Philosophy, G. J. Stokes, M.A.
Romance Languages, Miss Mary Ryan, M.A.
Botany and Agriculture, Major H. A. Cummins, M.D., C.M.G.
Chemistry, A. E. Dixon, M.D.
Geology and Geography, Isaac Swain, B.A.
Physics, William Bergin, M.A.
Zoology, Marcus M. Hartog, D.Sc.
Law of Real Property, G. Lawrence, B.L.
Law of Contracts, W. J. Dunlea, LL.D.
Anatomy, D. P. Fitzgerald, M.B.
Materia Medica, John Dundon, M.B.
Medicine, W. E. Ashley Cummins, M.D.
Obstetrics and Gynæcology, Henry Corby, M.D.
Pathology, A. E. Moore, M.B., B.Ch.
Physiology, D. J. Barry, F.R.C.S.
Surgery, C. Yelverton Pearson, F.R.C.S.
Engineering, C. W. O'D. L. Alexander, M.Sc.
Economics and Commerce, Thomas Smiddy, M.A.

GALWAY—UNIVERSITY COLLEGE. 1845.

President, Alexander Anderson, LL.D.
Registrar, E. Townsend, D.Sc.
Bursar, J. I. Lynham, F.R.U.I.

PROFESSORS.

History, English Lit. & Mental Science, Wilbraham FitzJohn Trench, M.A., M.R.I.A.
Greek, Robert K. McElderry, M.A.
Latin, Charles Exon, M.A.
Mathematics, William A. Houston, M.A.
Natural Philosophy, The President.
Chemistry, Alfred Senier, Ph.D.
Natural Hist., &c., R. J. Anderson, M.D.
Modern Languages, V. Steinberger, F.R.U.I.
English Law, James A. Sweetman, LL.D.
Anatomy & Physiology, Joseph E. Pye, F.R.U.I.
Medicine, John I. Lynham, F.R.U.I.
Surgery, W. Westropp Brereton, L.R.C.S.I.
Materia Medica, Nicholas W. Colahan, M.D.
Midwifery, Richard John Kinkead, M.D.
Civil Engineering, Edward Townsend, D.Sc.

DUBLIN—UNIVERSITY COLLEGE. 1909.

President, Denis J. Coffey, M.A.
Registrar, Professor Arthur W. Conway, D.Sc.
Secretary & Bursar, John W. Bacon, M.A.
Librarian, David J. O'Donoghue.

PROFESSORS.

Greek, Rev. Henry Browne, M.A.
Latin, Patrick Semple, M.A.
Mathematics, Henry C. McWeeney, M.A.
English Literature, Robert Donovan, B.A.
English Language and Philology, Rev. George O'Neill, M.A.

Constitutional Law, J. G. Swift McNeill, K.C., M.P.
Law of Property, Charles F. Doyle, M.A., K.C.
Civil Engineering, Pierce F. Purcell, M.A.
Economics of Ireland, T. M. Kettle, B.A., M.P.
Political Economy, Rev. Thomas A. Finlay, M.A.
Architecture (vacant).
Commerce, Charles H. Oldham, B.A.

THE QUEEN'S UNIVERSITY OF BELFAST. 1909.

Chancellor, The Earl of Shaftesbury, K.C.V.O.
President, Rev. Thomas Hamilton, D.D.
Secretary, J. M. Finnegan, B.Sc.

PROFESSORS.

Greek, Sir Samuel Dill, Litt.D.
Latin Language, Robert Mitchell Henry, M.A.
Mathematics, Alfred Cordew Dixon, Sc.D., F.R.S.
Physics, William Blair Morton, M.A.
English Literature, G. Gregory Smith, M.A.
History, F. M. Powicke, M.A.
Logic and Metaphysics, John Park, D.Lit.
Chemistry, Edmund A. Letts, D.Sc., F.R.S.E.
Zoology, Gregg Wilson, D.Sc.
German, Max Freund, Ph.D.
French, D. L. Savory, M.A.
Jurisprudence, J. A. Strahan, M.A.
English Law, Jas. Sinclair Baxter, LL.B.
Anatomy, Johnson Symington, M.D., F.R.S.
Physiology (Dunville), T. Hugh Milroy, M.D.
Medicine, J. A. Lindsay, F.R.C.P.
Surgery, Thomas Sinclair, F.R.C.S.
Materia Medica, Sir William Whitla, M.D.
Midwifery, Sir John W. Byers, M.D.
Pathology (Musgrave) W. St. C. Symmers, M.B.
Botany, D. T. Gwynne-Vaughan, M.A.
Engineering, J. Humil, B.A.
Economics, Thomas Jones, M.A.

Professional Education.

AGRICULTURE.

ASPATRIA AGRICULT. COLL., near Carlisle.
Principal, J. Smith Hill, B.Sc.
Practical Agric. & Agric. Eng., H. F. Hill.
Agricultural Chemistry, J. Robinson, N.D.A.
Bookkeeping & Practical Surveying, R. S. Biscoe, F.A.S.I.
Agric. Law, Botany & Forestry, The Principal.
Veterinary Science, H. Thompson, M.R.C.V.S.

CAMBRIDGE UNIVERSITY (see pp. 267–68).

CIRENCESTER ROYAL AGRICULT. COLL.
Principal, J. R. Ainsworth Davis, M.A.
Agriculture, Dairying, and Poultry Farming, Drysdale Turner; C. D. Stewart.
Estate Manage. & Forest., H. Pritchard, F.S.I.
Chemistry, E. Kinch, F.C.S.; W. James.
Geology, Botany, & Nat. Hist., R. G. Stapledon, M.A.
Physics and Mechanics, M. Kershaw, B.A.
Land Surv., Prac. Engineering, etc., W. A. Thain.
Veterinary Science, Bacteriology, &c., A. C. Duncan, M.R.C.V.S.

DAUNTSEY AGRICULTURAL SCHOOL, West Lavington, Wilts.
Headmaster, F. O. Solomon, F.H.A.S.
Literature, C. T. Apps, M.A.
Science & Mathematics, J. Watson, B.Sc.

DURHAM (Coll. of Science, see p. 272).

GLASGOW (West of Scotland Agricultural College).
Chairman, Very Rev. John Gillespie, LL.D.
Secretary, J. Cuthbertson (6 Blythswood Sq.).
Agriculture, Robert Patrick Wright, F.R.S.E.
Botany, A. N. McAlpine, B.Sc.
Chemistry, R. A. Berry, F.I.C.
Forestry, J. Nisbet, D.Œ.

HARPER ADAMS AGRICULTURAL COLLEGE, Newport, Salop.
Principal, P. H. Foulkes, B.Sc.
Vice-Principal & Math., J. C. Brown, P.A.S.I.
Clerk, R. P. Liddle.
Chemistry, B. F. Davis, F.I.C.; D. W. Scotland, N.D.A.
Botany & Horticulture, G. T. Malthouse, F.R.H.S.; W. Shove.
Veterinary, W. T. Wilson, F.R.C.V.S.
Dairying, F. Pendlebury; *Poultry*, F. Rhodes.
Agriculture, W. Vaughan; J. Williams.

MIDLAND AGRICULTURAL AND DAIRY COLLEGE, Kingston-on-Soar, Derby.
Principal, J. F. Blackshaw, F.C.S.

READING (Univ. Coll., see p. 274).

S.E. AGRICULTURAL COLLEGE (see p. 271).

UCKFIELD AGRICULTURAL & HORTICULTURAL COLLEGE & TRAINING FARM. (East Sussex County Council.)
Chemistry, S. A. Woodhead, M.Sc., *Principal*.
Agriculture, T. Hacking, A.Sc.
Land Agency, Surveyg., &c., C. J. Goody, P.A.S.I.
Veterinary Hygiene, E. W. Morris, M.R.C.V.S.
Horticulture, W. Goaring, F.R.H.S.
Poultry Farming, S. C. Sharpe.
Beekeeping, R. Baldwin; *Carpentry*, G. Alderton.

WISLEY SCHOOL OF HORTICULTURE, Ripley, Surrey.
Director, F. J. Chittenden, F.L.S.
&c., Rev. W. Wilks, M.A.

ART AND ARCHITECTURE.

The examination of Architects is conducted by the Royal Institute of British Architects in London and at various Provincial centres. The diplomas granted are A.R.I.B.A. and F.R.I.B.A.

BIRMINGHAM, Municipal School of Architecture.—*Director*, J. L. Ball; *Sec.*, A. H. Leaney.
BRADFORD (City of), School of Art.—*Principal*, C. Stephenson, A.R.C.A.
BRIGHTON, Municipal School of Art.—*Head Master*, W. H. Bond.
BRISTOL, University College (*q.v.*).
" Merchant Venturers' College (*q.v.*).
DERBY, Technical College.—*Principal*, F. W. Shurlock, B.Sc.
DUBLIN, Metropolitan School of Art, Kildare St.—*Headmaster*, James Ward, A.R.C.A.; *Registrar*, B. I. Tilly.
GLASGOW, School of Art.—*Pres.*, Sir James Fleming. *Professors*, Maurice Greiffenhagen; Paul Artot; E. Bourdon, B.A.; A. McGibbon, A.R.I.B.A.; Johann Keller; W. E. F. Britten.
" Technical College (*q.v.*).

" Architectural Association, 18 Tufton St., S.W.—*Secretary*, D. G. Driver.
" University College (*q.v.*).
" King's College (*q.v.*).
MANCHESTER, Municipal School of Art.—*Head Master*, R. Glazier, A.R.I.B.A.
NEWCASTLE, Armstrong College.—*Head Master*, R. G. Hatton, A.R.C.A.
NOTTINGHAM, University College (*q.v.*).

DENTAL.

ROYAL DENTAL HOSPITAL LONDON SCHOOL OF DENTAL SURGERY, 32 Leicester Square, W.C.—*Dean*, W. H. Dolamore, L.R.C.P.

DRAMA.

ACADEMY OF DRAMATIC ART, 62a Gower St., W.C.—*Pres.*, Sir Squire Bancroft; *Administrator*, Kenneth R. Barnes, M.A.

ENGINEERING.

There are Faculties of Engineering at the Universities of *Cambridge*, *London*, *Durham*, *Manchester*, *Leeds*, *Liverpool*, *Birmingham*, and *Sheffield*; *Wales*; *St. Andrews*, *Glasgow*, and *Edinburgh*; *Dublin*, *Royal University of Ireland*, and the Queen's Colleges at *Belfast*, *Cork*, and *Galway*.

CRYSTAL PALACE SCHOOL OF PRACTICAL ENGINEERING.—*Principal*, J. W. Wilson, M.INST.C.E.; *Vice-Principal*, M. Wilson, A.M.I.C.E.
ELECTRICAL STANDARDIZING, TESTING AND TRAINING INSTITUTION, Faraday House, 62–70 Southampton Row, W.C. *Princ.*, Alex. Russell, D.Sc.
POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Marine, Motor, Mechanical and Colonial), 307, 309, 311 Regent St., W.—Henry Spooner, M.I.M.E.
SEAFIELD PARK ENGINEERING COLLEGE, Fareham, Hants.—*Master*, W. Arthur Rix, M.A.

LEGAL.

GENERAL COUNCIL OF THE BAR.

(2 Hare Court, Temple, E.C.)

[The Council is the accredited representative of the Bar, and its duty is to deal with all matters affecting the profession, and to take such action thereon as may be deemed expedient.]

Chairman, W. English Harrison, K.C.
Vice-Chairman, E. L. Levett, K.C.
Hon. Treasurer, T. T. Methold.
Secretary, H. C. A. Bingley; *Clerk*, C. H. Worthy.

INNS OF COURT BAR LIBRARY.

(Royal Courts of Justice.)

Secretary and Librarian, R. Riches.

THE LAW SOCIETY

(100–113 Chancery Lane, W.C.)

[The Society controls the education and examination of articled clerks, the admission of solicitors, and the discipline of the profession. Number of members, 8,755.]

President, 1910–11, Henry James Johnson.
Vice-President, William John Humfrys.
Secretary, Samuel Pratt Berens Bucknill.

LEGAL EDUCATION COMMITTEE (containing Representatives of the Council, of Provincial Law Societies, and of Law Students).—*Chairman (ex officio)*, the President of the Society; *Vice-Chairman (ex officio)*, the Vice-President of the Society. *Principal and Director of Legal Studies*, Edward Jenks. *Readers*, A. Andrewes-Uthwatt; A. M. Latter. *Tutors*, N. H. Baynes; A. T. Bucknill; F. M. Caporn; L. R. Dicksee; M. L. Gwyer; A. B. Langridge; R. A. Wright.

The Society's system provides a complete scheme of education for articled clerks in legal subjects; and the classes are open to all male students on payment of the prescribed fees.

COUNCIL OF LEGAL EDUCATION.

(15 Old Square, Lincoln's Inn, W.C.)

[Established by the four Inns of Court to superintend the Education and Examination of Students for the Bar.]

Chairman, Right Hon. Lord Macnaghten.
Vice-Chairman, The Hon. Mr. Justice Channell.
Chairman of the Board of Studies, Rt. Hon. Lord Justice Cozens Hardy.
Clerk of the Council, Frederick Dapp.

READERS.

Jurisprudence, &c., J. Pawley Bate, LL.D.
Assistant, S. H. Leonard, B.C.L.

Procedure, Civ. & Crim., W. B. Odgers, D.C.L., K.C.
Real and Personal Property, A. F. Topham, LL.M.
Assistant, W. J. Whittaker, LL.B.
Common Law, Hugh Fraser, LL.D.
Assistant, J. Gerald Pease, B.A.
Equity, J. Andrew Strahan, LL.B.
Assistant, G. M. T. Hildyard, B.A.
Hindu & Mahomedan Law (Lecturer), Sir E. J. Trevelyan.

MEDICAL.

GENERAL MEDICAL COUNCIL, 299 Oxford St., W.—*President*, Sir Donald MacAlister, K.C.B., M.D. *Registrars: England*, H. E. Allen, LL.B.; *Scotland*, J. Robertson, 54 George Sq., Edinburgh; *Ireland*, Richard J. E. Roe, 35 Dawson St., Dublin.

Any unqualified person practising as an Apothecary is liable to a penalty under the Apothecaries Act, 1815. The use by unregistered persons of any title implying registration, or that they are recognised by law, is made an offence by the Medical Act, 1858.

There is a similar penalty in regard to Dentistry.

MEDICAL SCHOOLS OF THE UNIVERSITY OF LONDON.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—Clinical practice comprises a service of 674 beds, besides 70 beds for convalescent patients at Swanley, in Kent. 34 resident appointments, and all clinical clerkships, dresserships, &c., are chosen from the students without fee; scholarships and prizes of nearly £900 awarded annually; a college attached where students may reside. In-patients, 1908, 8,087; out-patients, 131,923.—*Dean of the Medical School*, T. W. Shore, M.D.

LONDON HOSPITAL AND MEDICAL COLLEGE.—The largest general hospital in England; 922 beds; 135 qualified appointments annually, and numerous clinical clerkships, dresserships, &c. Resident appointments carry rooms and board. 39 prizes and scholarships awarded annually.—*Warden*, Munro Scott, Turner Street, Mile End.

GUY'S HOSPITAL.—Number of beds in constant occupation, 620. The various appointments and offices are filled by students, selected according to merit. Scholarships and Prizes amounting in all to nearly £1,000 are awarded annually.—*Dean*, Dr. Eason.

ST. THOMAS'S HOSPITAL. (Founded 1228.)—651 beds; numerous prizes and scholarships; over 30 house appointments open to qualified students; clinical clerkships and dresserships may be held without extra fees. The School Buildings are among the most complete in London.—*Medical Secretary*, G. Q. Roberts, M.A.

ST. GEORGE'S HOSPITAL MEDICAL SCH.—Beds, 436, including 100 convalescent beds at Wimbledon. Numerous scholarships, &c., and 2 registrarships value £200 per annum.—*Dean*, E. I. Spriggs, M.D.

MIDDLESEX HOSPITAL.—Number of beds, 340. Three entrance scholarships, value £100, £50, and £25, also one of £50 for students of Oxford or Cambridge, awarded annually. — *Dean*, H. Campbell Thomson, M.D.

ST. MARY'S HOSPITAL.—Number of beds, 301. In-patients 1909, 4,242. Out-patients 1909, 26,816. Six entrance scholarships, value £145 to £25, awarded annually in Sept.—*Dean*, Sir John Broadbent, Bart.

CHARING CROSS HOSPITAL MEDICAL COLLEGE.—Number of beds, 200.—*Dean*, F. C. Wallis, F.R.C.S.

WESTMINSTER HOSPITAL.—Number of beds, 212.—*Dean*, E. Rock Carling, F.R.C.S.

UNIVERSITY COLLEGE HOSPITAL, Gower St., W.C.—Number of beds, 305.—*Dean*, Raymond Johnson, B.S.

KING'S COLLEGE HOSPITAL, Portugal St., Lincoln's Inn Fields, W.C.—Number of beds, 224.—*Dean*, J. Charlton Briscoe, F.R.C.S.

LONDON (ROYAL FREE HOSPITAL) SCHOOL OF MEDICINE FOR WOMEN, 8 Hunter St., Brunswick Sq., W.C.—Scholarships of £30 and £60 awarded annually. Resident and other appointments open to qualified students. Fees are inclusive of all necessary classes, and students can hold all clinical clerkships, &c., at the Royal Free Hospital without extra fee. Clinical posts at New Hospital for Women are also open to them.—*Dean*, Miss Cock, M.D.; *Sec.*, Miss L. M. Brooks.

Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Evans, 12 King's Bench Walk, Temple, E.C.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connection with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town. The admission of schools to the Conference is decided by the committee, and in considering applications the committee has regard to the scheme or other instrument under which the school is administered, the numbers in the school, and the number of resident undergraduates of Oxford and Cambridge educated at the school. As a general rule there should be 100 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school. The Universities Joint Committee (consisting of 5 Headmasters, 5 members of the Hebdomadal Council of Oxford, and 5 members of the Council of the Senate of Cambridge) meets periodically to consider matters of joint interest to the Universities and Public Schools.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy.*, H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.).—The qualification for membership is the holding of the head mastership of a day school for boys, the school being (*a*) recognised by the Board of Education as Secondary; (*b*) administered under a definite form of public or corporate control (*e.g.*, Board of Education Scheme); (*c*) managed by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

*The * denotes membership of the Head Masters' Conference; the §, of the Incorporated Association of Head Masters.*

The Bankers' Clearing-House.

THE BANKERS' CLEARING-HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1909, was £13,525,446,000, an increase of £1,405,084,000 as compared with the year 1908. On Stock Exchange days the payments were £2,129,205,000, an increase on the year 1908 of £456,707,000. The payments on Consols account days for the same period amounted to £677,847,000, an increase of £32,801,000 as compared with 1908, and on the 4ths of the months the payments for 1909 amounted to £310,173,000, an increase of £53,506,000 as compared with 1908. The establishment is managed by a Committee of Bankers—*Chairman*, The Rt. Hon. Lord Avebury, F.R.S.; *Deputy Chairman*, Sir Felix Schuster, Bart.; *Hon. Sec.*, R. Martin Holland; *Acting Managers*, P. W. Matthews (*Chief Inspector*); A. E. Salt (*Deputy Inspector*).

Joint-Stock Banks.

A List of the principal Joint-Stock Banks doing business in the United Kingdom, with particulars of their Share Capital, reserve fund, highest and lowest price in 1910 (1st January—30th September), and Dividend for last complete year.

Colonial and Foreign Banks, with their London Agents.

* *The numbers given in the following List refer to the List of Banking Offices in London on pages 314-318, and indicate that a branch is in operation at the place named. Head Offices being designated (H.O.). Where there is no London Office the name of the bank is given, followed by the reference number of the London Agent of the bank in square brackets, thus* [ ].
